Major Rules Changes for 2008

The numbers at the left below refer to rule and section, respectively. Page numbers are listed at the far right. Each changed segment is identified in the rules by a shaded background.

<i>Rule</i>	<i>Description of change</i>	<i>WR-</i>
2.11.2	Time advantage shall be used for all competition.....	23
3.4.1	The NCAA Official Weigh-In form shall be used for all competition.....	32
3.4.3	Wrestlers reporting to weigh-ins shall be properly groomed. Penalties added for those who fail to comply.....	33
3.9.3	Medical checks shall be conducted each day of competition and shall take place at the site of competition	35
4.17.1	Official verification of entries for tournaments takes place at registration.....	46
6.5	Forceful slap to the head or face, gouging or poking the eyes added to unnecessary roughness.....	66
6.6.1	The protocol for a referee reporting a flagrant misconduct violation charged.....	66

Coaches' Code of Conduct

It is the moral obligation of all collegiate wrestling coaches to conduct themselves in such a way as to reflect credit upon their institutions, their profession and themselves. Personal grooming and appropriate dress is a standard of professionalism. Jeans, T-shirts, sweatsuits or warm-up suits (top or bottom), headwear, and similar apparel are not considered suitable attire and are prohibited. Moral obligation and ethical conduct are part of winning and losing. Good sportsmanship, appearance, pride, honor and concern for the well-being of the competitors should be placed before all else. The rules have been established in the spirit of this statement.

Student-Athletes' Statement of Conduct and Responsibility

It is the responsibility of all wrestlers to conduct themselves in such a way as to reflect credit upon their institutions, the sport and themselves. Further, all wrestlers should realize that their personal appearance, behavior and standards are related closely to the image of the sport as perceived by all segments of the public and wrestling communities. This applies to conduct as a competitor on the mat, while attending the event, while traveling to and from the event, and conduct both on and off campus. Moral obligation and ethical conduct are part of winning and losing. Good sportsmanship, pride, honor and personal behavior should be placed above all else. The rules have been established in the spirit of this statement.

Referees' Code of Conduct

Wrestling referees have the responsibility for conducting bouts in a dignified, professional and unbiased manner and shall deal with all situations in the spirit of good sportsmanship and in the best interest of the wrestlers and the sport. The character and conduct of referees must be above reproach. When in uniform or on site, a referee shall not fraternize with contestants and/or coaches. Referees must keep themselves prepared both physically and mentally to administer bouts. Referees will enforce the rules firmly and fairly in both letter and spirit in such a way that attention is drawn to the wrestlers rather than themselves.

Spectator Sportsmanship

The NCAA promotes good sportsmanship by student-athletes, coaches and spectators. We request your cooperation by supporting the participants and officials in a positive manner. Profanity, racial or sexist comments, or other intimidating actions directed at officials, student-athletes, coaches or team representatives will not be tolerated and are grounds for removal from the premises.

Part I:

THE RULES

NCAA Wrestling Rules and Interpretations have been designated as either administrative rules or conduct rules. Typically, administrative rules are those dealing with preparation for the contest. The conduct rules are those that deal directly with the contest itself. Some administrative rules (as indicated) may be altered by the mutual consent of the competing institutions. Such rules are listed below and designated within the text. All other rules are unalterable and cannot be changed by mutual consent.

All NCAA member institutions are required to conduct their intercollegiate contests and follow weight-management procedures according to these playing rules.

The administrative rules that may be altered by mutual consent of the competing institutions are Rule 4.16 through 4.22, 4.24 through 4.26, 5.2 (tournament scoring chart) and 5.4.

Those seeking clarification of the **NCAA weight-management program optimal-performance system** may call or write to the *NCAA Wrestling Committee liaison to the NWCA for the NCAA Weight-Management System*:

Ron Beaschler

Phone: 757/719-5061; E-mail: pat.mccormick@hamptonu.edu

RULE 1

Meet, Mats, Wrestlers, Uniforms and Equipment

Meet

1.1 Length

A meet shall be conducted in 10 weight classifications or matches between wrestlers of the same weight class. Matches shall be seven minutes long, divided into three periods, with the first period three minutes and the second and third periods two minutes each. Multiple meets may be conducted in matches less than seven minutes long (e.g., double duals, quadrangulars, tournaments, etc.). Matches less than six minutes long shall not be included on a wrestler's official NCAA Individual Season Wrestling Record Form. (See Rule 1.16.)

1.2 Representation

An institution shall be represented by only one wrestler in each weight class, and no substitution is allowed for an injured wrestler in any match in a dual meet, multiple dual meet or tournament.

1.3 Home-Team Designation

For scoring and identification purposes, the home team will be considered "green" and the visiting team, "red." (For exception, see Rule 8.2.7.)

1.4 Team Captains

Each team shall designate to the referee one or more contestant(s) as its captain(s). One of the visiting captain(s) shall call a disk toss. The colored disk shall fall unimpeded to the mat and shall determine: (1) choice of options at the beginning of the second period for each weight class and (2) which individual is to appear on the mat first for each weight class. The

winner of the disk toss may choose the odd or even number of the 10 weight classes, with 125 being odd, 133 being even, etc. (See Rules 3.3, 4.6 and 4.10.)

1.5 Persons Subject to the Rules

All wrestlers, coaches, athletic trainers and other persons affiliated with a team are subject to the rules and shall be governed by the decisions of the official. (For crowd-control measures, see Rule 6.4.2.)

Mats

1.6 Dimensions

Mats should have a wrestling area between 32 and 42 feet in diameter. There shall be a mat area (or apron) with a minimum width of 5 feet that extends entirely around the wrestling area. The apron area shall be designated by use of either contrasting colors or a 2-inch wide line. This 2-inch wide line that outlines the edge of the wrestling area is a part of the wrestling area and therefore in bounds. (See illustration below.)

The entire wrestling area and apron shall be the same thickness, which shall not be more than 4 inches nor less than the thickness of a mat that has

the shock-absorbing qualities of a 2-inch-thick hair-felt mat. All mats that are in sections shall be secured together.

It is recommended that when competition is held on a concrete floor or like surface, sufficient padding be placed under the mat for the protection of the student-athletes.

Since shrinkage occurs in wrestling mats, it is recommended that when purchasing or reconditioning a mat, the wrestling area be a minimum of 34 feet in diameter.

It is the responsibility of the home institution's game-management personnel to ensure that the wrestling mat(s) and surrounding facilities meet all regulations. The meet referee shall verbally alert home management of any variance from the stated facility and mat requirements, with questions and/or disagreements being resolved by the participating institutions' representatives.

1.7 Starting Lines

There shall be placed at the center of the mat two 1-inch starting lines, one of which shall be in the center of the mat. The lines shall be 3 feet long and 10 inches apart. Two 1-inch lines shall close the ends of the starting lines. One of the two lines shall be green and located closest to the home team, and the other shall be red and located closest to the visiting team. (See Rule 8.2 Note.) When in the down starting position, the defensive wrestler shall assume a position facing away from the scorer's table. The arrow in the diagram on the preceding page should point away from the scorer's table.

Wrestlers

1.8 Limitations

Contestants shall not be permitted to represent their institution in more than one weight class in any meet.

1.9 Forfeits

A contestant shall not accept a forfeit in one weight class and compete in another class.

1.10 Shift in Weight Class

A contestant who weighs in for one weight class may be shifted to a higher weight class. Heavyweights must weigh a minimum of 183 pounds. (See Rule 3.1.8.)

Uniforms and Equipment

1.11 Uniforms

Mandatory competition equipment shall conform to the following guidelines:

1.11.1 *Uniform.* The uniform shall consist of either a one-piece singlet that may be worn with or without full-length tights, or a spandex/lycra-type shirt and shorts.

1.11.1.1 *Singlet.* A singlet covering the upper torso shall not be cut away in excess of the uniform pictured in Illustration Nos. 1, 2 and 3. Specifically, the front and back of the singlet shall not be cut lower than the armpit. Under the arms, the singlet shall not be cut lower than half the distance between the armpit and the belt-line. The outermost garment shall have a minimum inseam length of 4 inches and shall not extend beyond the top of the knees. (See Illustration Nos. 1 and 4.)

1.11.1.2 *Spandex/lycra.* The shirt shall be form-fitted, sleeveless or short-sleeved and shall not cover or extend beyond the elbow. In addition, the length of the shirt must be longer than the torso to prevent the shirt from becoming untucked. The shirt shall remain tucked into the shorts at all times during competition. The shorts shall be form-fitting with a minimum 4-inch inseam and shall not extend beyond the top of the knees. (See Rule 1.14.4.)

Bermuda-length undergarments and other accessories that extend beyond the 4-inch inseam of a uniform are not permitted. (See Illustration Nos. 1 and 4.)

If sufficient reason is determined by the referee, the only acceptable upper-body undergarment is a tight-fitting, short-sleeved unadorned T-shirt.

Team uniformity in clothing, to include the school's official warm-up and match uniforms, is required. The name or initials of the wrestler's

institution shall be displayed on competition uniforms with letters at least 2 inches high.

For dual meets and each session of a tournament (including NCAA championships competition), the match uniform worn by team participants must be identical in design and color. This rule does not apply to open and early-season tournaments. (See Rules 4.3.1 and 4.17.8 and Illustration Nos. 1 through 4.) See Rule 4.13.4 for violations.

- 1.11.2 *Footwear.* Light, heelless wrestling shoes reaching above the ankle and tightly secured shall be worn. Any match delay or stoppage directly related to shoelaces shall be treated as delay of match and, therefore, a stalling violation.
- 1.11.3 *Ear Protection.* A protective ear guard must be worn anytime live wrestling takes place (this includes practice, dual meets and all collegiate and open tournaments). This rule does not apply to passive drilling or the warm-up period before competition.

It should (a) provide adequate ear protection, (b) not be an injury hazard to the opponent and (c) have an adjustable locking device to prevent it from coming off or turning on the wrestler's head.

- 1.11.4 *Anklets.* In all tournaments, the home management shall provide red and green anklets approximately 3 inches wide for identification of the wrestlers. It is also recommended that these anklets be used in dual meets.
- 1.11.5 *Legal Apparel and Equipment.* Uniforms and all other items of apparel and equipment (e.g., warm-ups, socks, T-shirts, headgear, and towels) may bear only the manufacturer's normal label or trademark as it is used on all such items for sale to the general public. This label or trademark must be contained within a four-sided geometrical figure (i.e., rectangle, square, parallelogram) that does not exceed 2¼ square inches in area. This restriction is applicable to all apparel worn by student-athletes during the conduct of the institution's competition, which includes any pregame or postgame activities. Noncompliance can affect a student-athlete's eligibility. See NCAA Bylaw 12.5.4 for more information.

1.12 Appearance

Contestants shall not wear finger rings and/or jewelry, must be cleanshaven, with sideburns trimmed no lower than ear-lobe level and hair trimmed and well-groomed and be free of oils and/or greasy substances. (See Rule 6.7.) Because of the body contact involved, this rule has been approved in the interests of health, sanitary and safety measures. The hair, in its natural state, shall not extend below the top of an ordinary shirt collar and on the sides shall not extend below ear-lobe level. A neatly trimmed mustache that does not extend below the line of the lower lip is permissible. (See Rule 8.4.1.2.)

If an individual has hair longer than allowed by rule, it may be braided or rolled if it is contained in a cover so that the hair rule is satisfied. The cover shall either be a part of the headgear or worn under the headgear. A bandanna is not considered a legal hair cover. The cover must be of a solid material and be non-abrasive. All hair covers will be considered special equipment.

1.13 Special Equipment

Special equipment is defined as any equipment worn that is not required by rule and includes, but is not limited to, hair coverings, face masks, pads and braces. Any device, apparatus or tape that does not allow normal movement of the joints and prevents one's opponent from applying normal holds shall be barred. Any legal device that is hard and abrasive must be covered and padded. Loose pads are prohibited. (See Rule 1.14.1.) It is recommended that all wrestlers wear a protective mouth guard.

1.14 Enforcement

- 1.14.1 *Legality—Mat Markings, Equipment and Appearance.* The legality of mat markings and equipment (official team warm-ups, uniforms, headgear, special equipment, pads, etc.) and each contestant's appearance shall be decided by the referee.
- 1.14.2 *Health and Safety Measures.* The referee also shall determine whether each contestant has complied with specified health, sanitary and safety measures. (See Rule 1.12.) These shall constitute the sole reasons for disqualification as to application of this rule and shall not be arbitrary or capricious. (Regarding communicable skin diseases, see Rule 3.9.4 and Appendix D.)

- 1.14.3 *Noncompliance—Appearance and Equipment.* When a contestant appears on the mat ready to wrestle in a dual meet or tournament and the referee determines that the contestant does not comply with the required rules as to appearance and equipment, the offending contestant shall be charged an injury timeout, the injury clock started, and stopped when the referee determines that the contestant is in compliance. (See Rule 7.1.) The time used shall be cumulative with the offender's 1½ minutes of allowed injury time and shall count as the contestant's first timeout. If the contestant is not in compliance at the end of 1½ minutes, that contestant shall be disqualified from participation.
- 1.14.4 *Equipment Delays.* The wearing of wrestling equipment (e.g., headgear, uniforms, knee pads) that repeatedly causes delays in the normal progression of the match may result in an injury timeout being called. (See Rule 7.1.)

1.15 Videotaping

Videotapes shall not be used in dual meets to make corrections. (For tournaments, see Rule 4.25.)

1.16 Individual Season Record Form

When compiling a student-athlete's win-loss record for the season, all matches against competitors who compete on intercollegiate teams at four-year, degree-granting institutions and matches against competitors from two-year institutions shall be counted.

All matches competed during the season as defined in NCAA Bylaw 17.29 of the current NCAA Manual, including open or unattached competition, must be listed. Unattached student-athletes must be listed with their college affiliation (e.g., Unattached State University). Matches against club or armed services student-athletes shall not be counted.

Matches wrestled against rostered competitors that are ineligible or redshirting at four-year, degree-granting institutions shall be counted. However, the ineligible student-athlete may not count those matches wrestled during this period.

Should the student-athlete become eligible (e.g., remove his or her redshirt status) at anytime during the season, matches wrestled while ineligible will count on the wrestler's Individual Season Record Form.

When completing the Individual Season Record Form, the person(s) who is responsible for its accuracy is reminded to record all required information. Failure to correctly complete the Individual Season Record Form may result in the assessment of an institutional penalty. See Appendix I for more detailed information.

Rules interpretations can be found in the back of this book on the designated page:

1. *Shift in Weight Class, 1.10, WI-2*
2. *Shoelaces, 1.11.2, WI-2*
3. *Ear Protection, 1.11.3, WI-2*
4. *Videotaping, 1.15, WI-3*
5. *Individual Season Record Form, 1.16, WI-3*

RULE 2

Definitions

Wrestling Positions

2.1 Starting Position

- 2.1.1 *Neutral Position.* The match will start with both contestants standing opposite each other with their lead foot on the green or red area of the starting lines, and their other foot even with or behind the lead foot. In the neutral position, neither wrestler has control. When the referee sounds the whistle, the wrestlers will begin wrestling. (See Illustration No. 8.)

In matches involving sight-impaired wrestlers, a finger-touch method shall be used in the neutral position and contact shall be maintained throughout the match. (See Illustration No. 7.)

- 2.1.2 *Defensive Starting Position.* The defensive wrestler takes a stationary position at the center of the mat with both hands and knees on the mat, as directed by the referee. Both knees must be on the mat even with and behind the rear starting line. The heels of both hands must be on the mat in front of the forward starting line. The elbows shall not touch the mat. This position also must allow the offensive wrestler to be able to assume a legal starting position on either side of the defensive wrestler. (See Illustration Nos. 9 through 11.)
- 2.1.3 *Offensive Starting Position.* The offensive wrestler shall be on the right or left side of the opponent with at least one knee on the mat and head on or above the midline of the opponent's back. One arm (right or left) is first placed loosely around the defensive wrestler's body perpendicular to the long axis of the body, with the palm of the hand placed loosely against the defensive wrestler's navel, and the palm of the other hand (left or right) is placed on or over the back of the near elbow, this being the near side. One knee shall be on the mat to the outside of the near leg, not touching the defensive wrestler; and a knee or foot may be placed in

back of the defensive wrestler's feet, not touching the defensive wrestler. (See Illustration Nos. 9 through 11.)

The time sequence to be followed in assuming the offensive position is to:

- 1) Set the knee(s) and feet;
- 2) Place the palm of one hand on the navel;
- 3) Place the palm of the other hand on or over the near elbow;
- and
- 4) The referee shall pause momentarily before starting wrestling.

2.1.4 *Optional Offensive Starting Position.* Wrestlers selecting the optional starting position must indicate their intent to the referee. The referee shall inform the defensive wrestler of the offensive wrestler's intention and allow the defensive wrestler to adjust.

The offensive wrestler may select a position on either side or to the rear of the defensive wrestler with all weight supported by both feet, one knee or both knees. The offensive wrestler is to place both hands on the opponent's back (area between neck and waist), thumbs touching. Only the hands of the offensive wrestler are to be in contact with the defensive wrestler.

The offensive wrestler is not to place one or both feet or knees between the opponent's feet or legs, or in front of the forward starting line or the line extended. In addition, the offensive wrestler is not to straddle the opponent. (See Illustration Nos. 12 and 13.)

2.1.5 *Offensive or Optional Starts.* For either the offensive or optional starts, the referee will direct the offensive wrestler to take a starting position after the defensive wrestler is stationary in the starting position.

2.2 Stalemate

When the contestants are interlocked in a position other than a pinning situation in which neither wrestler can improve their position, the referee shall stop the match as soon as possible; wrestling will be resumed as for out of bounds. (See Rule 2.5.)

2.3 Position of Advantage

The offensive wrestler maintains the position of advantage until the opponent (defensive wrestler) is awarded an escape or a reversal by the referee.

2.4 In Bounds

Contestants are considered to be in bounds if the supporting point(s) of either wrestler are on or inside the boundary line. A wrestler's supporting point(s) is the point(s) of the body touching, or within, the wrestling area that bears the wrestler's weight, other than that point(s) being used to hold the opponent. [Down on the mat, the usual point(s) of support is the knee(s), the side of the thigh, the buttock(s) or the hand(s).] Wrestling shall continue as long as the supporting point(s) of either wrestler remains in bounds. For the purpose of awarding a point(s) at the edge of the wrestling area, a point(s) shall be awarded when control is established or lost while any part of a supporting point or any part of a foot of either wrestler finishes on the mat in bounds.

When the defensive wrestler's back is exposed to the mat in a pinning situation while at least the supporting point(s) of either wrestler is in bounds, wrestling shall continue as long as there is a possibility of the offensive wrestler bringing the opponent back in bounds. In this situation, the defensive wrestler's shoulder(s) or scapulae is a supporting point(s). Near-fall points may be earned or a fall called if any part of the defensive wrestler's pinning area is in bounds. (See Illustration Nos. 57 and 58.)

If there is no action at the edge of the mat and one wrestler is out of bounds, the referee may stop the match.

2.5 Resumption of Wrestling After Out of Bounds

The contestants at the resumption of a match shall be in the neutral or the starting position on the mat as determined by the position held upon going out of bounds. If the wrestlers are neutral, the match shall be resumed with both wrestlers opposite each other and with one foot or both feet on the green or red area of the starting lines. If one wrestler has the advantage, that contestant will take the offensive starting position at the center of the mat, and the opponent will assume the defensive starting position.

Scoring Opportunities

2.6 Takedown

A takedown shall be awarded when, from the neutral position, a contestant gains control by taking the opponent down to the mat beyond reaction time and the supporting point(s) of either wrestler is in bounds. (See Illustration Nos. 48 through 51.) When a significant portion of the defensive wrestler's weight is borne on a hand(s), it is considered a supporting point(s).

For the purpose of awarding takedown points at the edge of the wrestling area, points shall be awarded when control is established while any part of one supporting point or any part of a foot of either wrestler finishes on the mat in bounds. (See Illustration Nos. 42 through 48.) If the foot of the wrestler attempting a takedown was outside the wrestling area, breaking the boundary of an imaginary cylinder surrounding and extending above the wrestling area, a takedown shall not be awarded. (See Illustration No. 50.)

2.7 Escape

A defensive wrestler is awarded an escape when the offensive wrestler loses control of the opponent while any part of a supporting point or any part of a foot of either wrestler remains on the mat in bounds. An escape may be awarded while the wrestlers are still in contact.

2.8 Reversal

A reversal occurs when the defensive wrestler comes from the bottom/defensive position and gains control of the opponent, either on the mat or in a rear-standing position. For the purpose of awarding reversal points at the edge of the wrestling area, points shall be awarded when control is established while any part of a supporting point or any part of a foot of either wrestler remains on the mat in bounds. (See Illustration Nos. 57 and 58.)

2.9 Near Fall

2.9.1 Two-point Near Fall. A near fall is a position in which the offensive wrestler has the opponent in a controlled pinning situation in which (1) the defensive wrestler is held in a high bridge or on both elbows, or (2) any part of one shoulder or scapula, or the head is touching the mat and the other shoulder or scapula is held at an angle of 45 degrees or less to the mat, or (3) any part of both shoulders or both scapulae are held within four inches of the mat. Two points shall be awarded for such near-fall situations when one

of these three criteria have been met for two seconds. (See Illustration Nos. 72 through 75.) In any pinning situation, a near fall may occur if any part of the defensive wrestler's pinning area remains in bounds. (See Illustration Nos. 57 through 58.) A continuous roll-through is not to be considered a near fall.

2.9.2 *Three-point Near Fall.* If a criterion for a near fall is met and held uninterrupted for five seconds, three points shall be awarded.

2.9.3 *Counting the Near Fall.* A verbal count and, whenever possible, a visual hand count shall be used in determining a near fall. (See Rule 8.4.5.) A near fall is ended when the defensive wrestler gets out of a pinning situation. The referee must not signal the score for a near fall until the situation is ended. Only one near fall shall be scored when using the same pinning combination, regardless of the number of times the offensive wrestler places the defensive wrestler in a near-fall position during the pinning situation.

Only the wrestler with the advantage, who has the opponent in a pinning situation, may score a near fall. Bridge-backs in body scissors or bridge-overs with a wristlock are not considered near-fall situations, even though a fall may be scored.

When defensive wrestlers place themselves in precarious situations during attempted escapes or reversals, particularly leg vines and body scissors, a near fall shall not be scored unless the offensive wrestler has control of and definitely has restrained the opponent in a pinning situation for two seconds. (See Illustration No. 75.)

2.9.4 *Injury, Two Points.* When a pinning combination is executed legally and a near fall is imminent, but the defensive wrestler is injured, indicates an injury or has excessive bleeding before a near-fall criterion is met, action will be stopped and a two-point near fall shall be awarded.

2.9.5 *Injury, Three Points.* When a criterion for a two-point near-fall is met and the match is stopped for an injury, the defensive wrestler indicates an injury or has excessive bleeding, action will stop and a three-point near fall shall be awarded.

2.9.6 *Injury, Four Points.* When the criteria for a three-point near-fall are met, and a match is stopped for an injury, the defensive wrestler indicates an injury or has excessive bleeding, a fourth point shall be awarded.

- 2.9.7 *Assessing Penalty Points in Near-fall Situations.* Points for unnecessary roughness, unsportsmanlike conduct, technical violations or illegal holds committed by the defensive wrestler during near-fall situations shall be added in addition to points earned, including the points awarded as described in Rules 2.9.4, 2.9.5 and 2.9.6. In addition, wrestling shall continue during a violation(s) by the defensive wrestler if no risk of injury exists. (See Penalty Table No. 1 and WI, Rule 2.9, Situation 1.)
- 2.9.8 *Injury Timeout Assessment.* Except for a bleeding injury in Rules 2.9.4, 2.9.5 and 2.9.6, an injury timeout must be assessed. (See Rule 7.1.2.)

2.10 Imminent Scoring

When a match is stopped for an injury during a scoring situation (e.g., takedown, reversal, escape) and the referee determines that scoring would have been successful if the wrestling had continued, the referee shall charge an injury timeout to the injured contestant and award applicable points to the non-injured wrestler. (See Rules 2.9.4, 2.9.5 and 2.9.6; for imminent scoring with locked hands, see Rule 6.11.)

2.11 Time Advantage

- 2.11.1 *Recording Time Advantage.* The offensive wrestler who has control in an advantage position is gaining time advantage (i.e., “riding time”). A timekeeper records that wrestler’s accumulated time advantage throughout the match. A multiple timer may be used to record the time advantage. At the end of the match, the referee subtracts the lesser time advantage from the greater. If a contestant has one minute or more of net time advantage, that wrestler is awarded one point. (See Rule 4.11 for Overtime.)
- 2.11.2 *Use of Time Advantage in Tournaments.* The recording of time advantage (riding time) is required for use in all competition. Dual meets, team-advancement tournaments and tournament competition that do not utilize time advantage shall not count on the NCAA Individual Season Record Form. (See Rule 1.16.)

End of Match

2.12 Fall

Any part of both shoulders or part of both scapulae (For pinning area, see Illustration No. 2.) of either wrestler held in contact with the mat for

one second constitutes a fall. The one-second count (one-thousand-one) shall be a silent count by the referee and shall start only after the referee is in position to observe that a fall is imminent, after which the shoulders or scapulae area must be held in continuous contact with the mat for one second before a fall is awarded.

- 2.12.1 *Awarding a Fall at Edge of Wrestling Area.* When awarding a fall at the edge of the wrestling area, a fall may be awarded when any part of the pinning area is in bounds. (See Rule 2.4 and Illustration Nos. 57 and 58.)
- 2.12.2 *No Fall.* If any portion of the body of one of the wrestlers is out of bounds so that the wrestler is disadvantaged, no fall shall be awarded and out of bounds shall be declared.
- 2.12.3 *Out of Bounds.* When the match is stopped for out of bounds in a fall situation, the match shall be resumed in the starting position on the mat with the offensive wrestler in the advantage position. (See Rules 2.1.2, 2.1.3 and 2.5.)
- 2.12.4 *Indicating the Fall.* As soon as the criteria listed in the first part of this section are met, the referee shall indicate the fall by striking the mat with the palm of the hand.
- 2.12.5 *End of Period.* When the referee is able to determine that a fall has occurred and the period ends before the referee strikes the mat, the fall shall be awarded. (See Rule 8.4.16.)
- 2.12.6 *Determining Fall.* If the referee cannot determine that a fall has occurred before the period ends because of crowd noise or other circumstances, the assistant referee, if available, shall be consulted. If there is no assistant or if the assistant referee is in doubt, the referee shall ask the match timekeeper if the signal hand hit the mat before the period ended. (See Rule 8.4.16.)

2.13 Technical Fall

A technical fall terminates the match and occurs when a wrestler has earned a 15-point advantage over the opponent. A time-advantage point cannot be awarded until the third period has concluded. A wrestler earning a differential of 15 points during a match can lose only by committing an act of flagrant misconduct. (See Rules 5.3.2, 5.3.3 and 5.4.3.)

2.14 Major Decision

A major decision occurs when the margin of victory after three periods is eight through 14 points. (See Rules 5.3.4 and 5.4.3.)

2.15 Decision

A decision occurs when the margin of victory is fewer than eight points. A decision also is credited to the wrestler who is awarded the first point(s) in the sudden victory of an overtime match that does not end with a fall, default or disqualification. (See Rules 4.11 and 5.3.5.)

2.16 Default

A default is awarded in a match when one of the wrestlers is unable to continue due to an injury or by choice of his or her coach. A default shall be included as a win or loss in each wrestler's individual season record. (See Rules 1.16, 4.17.3 and 7.1.6.)

2.17 Disqualification

A disqualification is a situation in which a contestant is banned from participation in accordance with the Penalty Table. (See Rules 4.17.5 and 4.22.4.) A disqualification shall be included as a win or loss in each wrestler's individual season record. (See Rule 1.16.)

2.18 Forfeit

A forfeit is received by a wrestler when the opponent, for any reason, fails to appear for the match. In order to receive a forfeit or medical forfeit, the nonforfeiting wrestler must be dressed in a wrestling uniform and appear on the mat. A forfeit or medical forfeit shall be included as a win in the victor's season record. (See Rules 1.9, 1.16, 2.19, 3.6, 4.17.2, 4.17.3 and 4.17.4.)

2.19 Medical Forfeit

A medical forfeit may be declared when a contestant is injured or becomes ill during the course of tournament competition. (See Rule 4.23 for the proper protocol for declaring a medical forfeit.)

Note: For the list of proper terms and abbreviations for recording the results of a match, see Rule 5.

Rules interpretations can be found in the back of this book on the designated pages.

- 6) *Fall, 2.12, WI-7*
- 7) *Technical Fall, 2.13, WI-8*
- 8) *Default, 2.16, WI-9*

RULE 3

Weight Certification, Classification and Weighing-In

3.1 Weight Certification

3.1.1 *Establishing a Weight Class.* Each school shall have a member of the institution's athletics medical staff (e.g., physician, certified athletic trainer or registered dietician) conduct an initial weight assessment of its student-athletes not competing in a fall sport not sooner than the first official day of classes in the fall semester, trimester or quarter and not later than the first official practice (144-day calendar in Divisions I and II, and 19 weeks in Division III per NCAA Bylaw 17). During the initial weight assessment, a wrestler's minimum wrestling weight class for the season will be determined.

A person, called the assessor, who performs the assessment and submits the data, shall be a member of the institution's athletics medical staff (e.g., physician, certified athletic trainer or registered dietician). Once the assessor enters the student-athletes' data in the NWCA online Optimal Performance Calculator, the information is stored in the system for 48 hours. Coaches have read-only access during this official certification process. Within the 48-hour window, the head coach and assessor discuss and review the entered data. Both the assessor and head coach SHALL verify the data as the "official assessment" for each student-athlete. As soon as the assessor and the head coach confirm and accept the established minimum-weight classes, the information is permanently saved and unalterable.

If no action is taken to accept the assessment within the 48-hour review period, the assessment information is automatically deleted from the institution's file.

Failure to verify the assessment during the 48-hour period means the student-athlete must be reassessed and the certification process repeated.

The final assessment of the institution's rostered squad members (excluding two-sport student-athletes) shall be confirmed by the assessor and head coach before the start of the team's first official practice. A student-athlete joining the team after the first official practice shall be tested prior to his or her first practice.

Student-athletes competing in a fall sport may have their weight assessment conducted during their preseason physical examination or after their fall sport season is completed. Student-athletes tested in the preseason should be reassessed by a physician or certified athletic trainer after their fall sports season. (See Rules 3.1.4 and 3.1.5.) All wrestlers who appear on an institutional squad list must comply with weight-management regulations (e.g., wrestlers competing in open competition).

- 3.1.2 *Procedures for Two Certifications.* All student-athletes appearing on an institutional squad list for the first time and who have not been tested by an NCAA member institution through the NCAA Weight-Certification Program in previous years, are required to electronically complete both Sections I and II of the Wrestling Weight-Certification Program. Once the lowest allowable weight has been established, a wrestler may not weigh-in more than one weight class above the determined weight class. A wrestler has until December 16, 2007, to reach the lowest certified weight class.

For example, a wrestler's certification shows the 125-pound weight class to be the lowest allowable weight class he or she may wrestle. While descending to the certified weight (125), a wrestler may not wrestle at a weight class higher than 133. If he or she weighs-in at 141, he or she forfeits the right to proceed to 125, and the 133-pound weight class becomes his or her lowest allowable class.

A wrestler may not compete at his or her lowest certified weight class before the date indicated on the NCAA Weight-Loss Plan found on the NWCA online system. In order to successfully complete the second certification, the wrestler must weigh-in at the weight the wrestler wishes to certify and pass the hydration test. The first competition after the second successfully completed certification establishes the wrestler's certified weight class for the remainder of the season. All wrestlers are required to follow weight-management regulations while modifying their weight.

3.1.3 *Procedures for One Certification.* A student-athlete completing the NCAA Weight-Certification Program previously is only required to complete Section I of the weight-certification program. Wrestlers descending to their lowest certified weight class, as in the Rule 3.1.2 example, may not weigh-in more than one weight class above their predetermined lowest weight class. The student-athletes have until December 16, 2007, to reach their lowest certified weight class.

A wrestler may not compete at his or her lowest certified weight class before the date indicated on the NCAA Weight-Loss Plan form. The first competition after reaching the lowest certified weight establishes the wrestler's weight class for the season.

3.1.4 *Fall Sport Student-Athlete Reporting On or Before December 16, 2007.* A student-athlete who has completed a season of competition in a fall sport shall follow the appropriate weight-certification procedures listed in Rule 3.1.2 or 3.1.3. This student-athlete must join the team on or before December 16 for this rule to apply. A wrestler may not weigh-in higher than one weight class above his or her lowest certified weight and must reach his or her predetermined lowest weight class not later than January 12, 2008.

3.1.5 *Fall Sport Student-Athlete Reporting After December 16, 2007.* A fall sport student-athlete joining the wrestling team after December 16 shall, as in Rule 3.1.4, follow the appropriate weight-certification procedures listed in Rule 3.1.2 or 3.1.3, with one exception. After December 16, the fall sport student-athlete does not have the option of competing while reaching the certified weight. The wrestler's first competition determines the minimum weight class for the season.

Note: A student-athlete returning from an internship in or out of the United States or returning from required overseas duty, shall follow the procedures listed in Rule 3.1.4 and/or 3.1.5.

3.1.6 *Weight Class Ascent/Descent Option.* A wrestler wishing to weigh-in at a weight class no higher than one class above his or her original wrestled weight may return to the original weight class by following the mandatory requirements listed in Rule 3.1.7. This provision may be applied multiple times during the season. A wrestler returning to his or her lowest allowable weight class shall follow the prescribed weight-loss plan. The weight-loss plan shall indicate that the wrestler's original weight class can be reached not later than February 23, 2008.

- 3.1.7 *Descent and the 1.5 Percent Regulation.* In Rules 3.1.2, 3.1.3, 3.1.4, 3.1.5 and 3.1.6, the following weight-loss procedures are required. The NCAA Weight-Loss Plan found on the NWCA online system mandates a wrestler not lose more than 1.5 percent of body weight per week from the weekly weigh-in (seven days) while making the descent to the lowest certified weight class.
- 3.1.8 *Additional Weigh-In Regulations.* No wrestler may compete below the established minimum wrestling weight. A wrestler may weigh-in at the certified weight class and compete at a higher weight classification. If a wrestler weighs-in at the 141-pound weight class, but competes at the 149-pound weight class, the wrestler does not relinquish the right to wrestle at the 141-pound class. If a student-athlete weighs-in at a weight class greater than the original wrestled certified weight, that classification becomes the wrestler's certified weight. (See Rules 3.1.6 and 3.1.7.)

It should be noted that wrestlers weighing-in two weight classes above their original certified weight class are not allowed to return to the original wrestled weight class. This includes preseason competition while a wrestler is making the descent toward his or her lowest allowable certified weight. For example, if a wrestler's lowest allowable weight class is 149 and the wrestler weighs-in at 165, the student-athlete is ineligible to return to the 149-pound weight class. The lowest weight class at which this wrestler may compete is 157.

- 3.1.9 *Requirement to Submit Data.* Weight-management input, weigh-in information and, dual and individual tournament results are required components of the NCAA Weight-Management Program. Before entering any Section I certification information, each institution shall be required to enter its team's first day of practice, competition schedule and complete team roster into the NWCA online system. All Optimal Performance Calculator information shall be completed at the following link:

www.nwcaonline.com

- 3.1.10 *Penalties for Weight-Management Violations.* The following penalties may be imposed by the NCAA Wrestling Rules Committee for violations of the Wrestling Weight-Management Program that do not have a specific penalty set forth elsewhere in the rule book:
- 1) Public or private reprimand;
 - 2) Financial penalty of \$100 per institution or \$50 per individual up to a \$300 maximum penalty;

- 3) Forfeiture of contest(s);
- 4) Disassociation of the institutional staff member from all team activities for one or more competitions. If the violation occurs during the last event of the season, the disassociation carries to the next season;
- 5) Team records or performance vacated; and
- 6) Other penalties the NCAA Wrestling Rules Committee deems appropriate.

When warranted, the NCAA Wrestling Rules Committee has the authority to investigate reported violations and determine the appropriate penalty.

Note: Additional information concerning weight certification and weight-management procedures can be found in Appendix H.

Weight Classification

3.2 Weight Classes

Competition shall be divided into the following 10 weight classes for dual meets, multiple duals and tournaments.

125 lbs.	165 lbs.
133 lbs.	174 lbs.
141 lbs.	184 lbs.
149 lbs.	197 lbs.
157 lbs.	Heavyweight (183-285 lbs.)

3.3 Determining Wrestling Order

Immediately after the weigh-in for a dual meet or multiple dual meets conducted on the same day, coaches may mutually agree to determine the order of matches to be wrestled, allowing for a particular weight class to be featured. Once the first weight class is established, subsequent matches will continue in the traditional sequence of increasing weight class.

If coaches cannot agree on the wrestling order, a random draw shall be conducted to determine which weight class will be wrestled first.

Note: For example, if the 165-pound weight class is selected by mutual consent or random draw, the sequence of weight classes would be 165, 174, 184, 197, Heavyweight and then 125 through 157. (See Rule 1.4.)

When multiple dual meets are wrestled on the same day at different sites, the order of matches to be wrestled at the second site will be decided by mutual agreement or a random draw conducted by the coaches, not more than one hour before the first match.

Weighing-In

3.4 Time

3.4.1 *Weigh-ins.* Weigh-ins shall be conducted in a private, secured area at the site of competition or in an adjacent building to the competition, and attendance shall be limited to the contestants, coaches of the contestants, required medical personnel, the person(s) supervising the weigh-in and others deemed necessary. The referee or other authorized persons should supervise the weighing-in of contestants. It is mandatory that the NCAA Official Weigh-in form, generated by the NWCA Web site, be used for all competition. Contestants should weigh-in with shorts for dual meets and tournaments. (See Rule 3.9.2.)

It is recommended that a digital scale be used for weigh-ins and that all scales used for weigh-ins be certified before the start of each season.

At all official weigh-ins, the wrestler should stand with both feet flat in the middle of the scale, facing away from the dial or weight indicator. (See Rule 3.6.)

3.4.2 *Dual, Triangular, Quadrangular Meets.* Contestants shall weigh-in one hour or less before the first match begins on a predetermined scale provided by the host school or organization. When junior varsity competition is held before varsity competition, the varsity contestants shall weigh-in one hour before the scheduled start of the varsity meets. Teams failing to comply with the weigh-in rules shall forfeit. (See Rule 4.2.) When a team is wrestling multiple dual meets at home or at different sites on the same day, weigh-ins for all teams involved shall be held one hour before the start of the first scheduled contest. The team(s) at subsequent site(s) shall conduct an honor weigh-in at the same time at its site(s). No team shall weigh-in more than once a day. Weigh-in times for multiple team competitions not covered by rule shall be resolved by the host school's athletics administration.

At the scheduled time for weigh-ins, all student-athletes who wish to compete must present themselves at the scale(s). During the weigh-in period, contestants may not leave the weigh-in area, and activities that promote dehydration are prohibited. The weigh-in shall proceed through the weight

classes beginning at the lowest weight class. When all wrestlers for a weight class have had an opportunity to weigh-in and the next class is called, that weight class is closed. Upon completion of the heavyweight class, weigh-ins are concluded. No additional time shall be granted.

At the official weigh-in, a contestant may step on and off the scale three times to allow for mechanical inconsistencies in the scale.

3.4.3 Tournaments. Wrestlers reporting to weigh-ins for team-advancement tournaments or individual-advancement tournaments shall appear properly groomed. For example, cleanshaven and with hair not longer than allowed by rule. Failure to comply shall be penalized as follows: first offense—warning; second offense—warning; third offense—deduct one team point; fourth offense—deduct two team points and remove head coach from the premises; fifth and subsequent violations—deduct two team points. Violations are cumulative by team for all days a weigh-in is conducted.

For individual or team-advancement tournaments, weigh-ins will be held two hours or less before the first matches begin on the first day and one hour or less before the first matches begin on subsequent days. These weigh-ins may be conducted by team.

In tournaments, including team-advancement tournaments requiring multiple-day weigh-ins, a 1-pound allowance for each consecutive day of competition shall be granted. In team-advancement tournaments, the 1-pound allowance will only be granted to individuals who weighed in during the first day of competition.

At the scheduled time for weigh-ins, all activities that promote dehydration must cease and all student-athletes who wish to compete must present themselves at the scales. The weigh-in shall proceed through the weight classes, beginning at the lowest weight class.

If a contestant fails to make weight on one of the designated scales, the contestant may step on each additional official scale one time in an attempt to make weight immediately after the heavyweight class. The contestant may not leave the weigh-in area. At this time, weigh-ins are concluded.

All tournament directors shall follow NCAA weigh-in guidelines and playing rules. In addition, currently enrolled student-athletes listed on an institution's squad list must adhere to NCAA rules relating to weighing-in.

- 3.4.4 *Subsequent-day Weigh-ins.* Dual meets and multiday dual meets shall be conducted with no weight allowance permitted, nor can an allowance be mutually agreed upon.
- 3.4.5 *NCAA Official Weigh-in Form.* For dual meets, both coaches shall keep on file a copy of the NCAA Official Weigh-in form, the only acceptable form permitted by rule and generated by the NWCA Web site, until the end of the season. A copy of the NCAA Official Weigh-in form shall be hand carried to each site of competition, including tournaments. It is recommended in tournament competition that coaches retain a copy of their team's NCAA Official Weigh-in form. For all individual-advancement tournaments, including preseason open tournaments, in order to verify the student-athlete's lowest allowable weight class, the NCAA Official Weigh-in form shall be submitted before weighing-in a team or an individual student-athlete. A computer-generated weigh-in sheet may be used to record the actual weights for individual-advancement tournaments to include preseason open tournaments. **In tournament competition, the host site shall be responsible for retaining both the NCAA Official Weigh-in form(s) and the actual weights of each participant. The actual weight and results of all rostered student-athletes who compete unattached at open tournaments shall be entered into the NWCA online system.**

3.5 Prohibited Practices

The use of laxatives, emetics, excessive food and fluid restriction, self-induced vomiting, hot rooms, hot boxes, saunas, and steam rooms is prohibited for any purpose. The use of diuretics at any time is prohibited by NCAA legislation for all sports. Regardless of purpose, the use of vapor-impermeable suits (e.g., rubber or rubberized nylon) or any similar devices used solely for dehydration is prohibited. Artificial means of rehydration (i.e., intravenous hydration) are also prohibited. Violators of these rules shall be suspended for the competition(s) for which the weigh-in is intended. A second violation would result in suspension for the remainder of the season.

3.6 Failure to Make Weight

Any contestant failing to make weight at the designated time shall be ineligible for that weight class. For dual meets, a forfeit shall be scored and team points awarded to the opponent. In tournaments, a forfeit shall be awarded to the opponent and points for the forfeit and advancement shall be scored or the tournament bracket redrawn. In addition, a contestant who fails to make weight on the second or

subsequent day(s) of a tournament shall forfeit all points previously earned. (See Rules 2.18, 4.17.4 and 4.17.6, and the Summary of Scoring Chart.)

3.7 Practice-Room Temperature

The wrestling practice facility must be kept at a temperature not to exceed 80 degrees Fahrenheit at the start of practice.

It is understood that some practice facilities cannot maintain this exact temperature due to physical plant deficiencies. It is within the spirit of the rule that every effort shall be made to maintain the 80-degree temperature throughout the practice. The penalty for this violation is the same as for using prohibited dehydration methods and is assessed against the coach. (See Rule 3.5.)

3.8 CPR and First Aid Training

All coaches, including volunteers, shall be certified in cardiopulmonary resuscitation (CPR) annually by the date of the first practice. Similarly, coaches and volunteers must be certified in basic first aid every three years.

3.9 Medical Examinations

3.9.1 *Qualified Examiners.* A physician or a certified athletic trainer shall examine all contestants for communicable skin diseases before all tournaments and meets. (See Appendix D, Skin Infections.) It is recommended that this examination be made at the time of weigh-in.

Medical professionals of both genders may participate in the medical examinations.

3.9.2 *Dress for Examinations.* Male student-athletes shall wear shorts and female student-athletes shall wear shorts and a sports bra during examinations.

3.9.3 *Medical Checks—Tournaments.* At the time of medical/skin checks, all competitors are required to report to the designated area. Medical/skin checks will start at the lowest weight class. All competitors in that weight class need to be examined before moving on to the next weight class. The medical/skin checks will proceed through all weight classes in the weight class order. When all wrestlers for a weight class have been examined and the next class is called, that weight class is closed. The medical/skin check is completed once all heavyweight wrestlers have been examined. The games committee may consider extenuating circumstances. (See Rule 4.16.3.) Medical checks shall be conducted each day of competition and shall take place at the site of competition.

- 3.9.4 *Presence of Communicable Skin Disease.* The presence of a communicable skin disease (or any other condition that, in the opinion of the examining physician or certified athletic trainer, makes the participation of that individual inadvisable) shall be full and sufficient reason for disqualification.
- 3.9.5 *Written Documentation.* If a student-athlete has been diagnosed as having such a condition, and is currently being treated by a physician (ideally a dermatologist) who has determined that it is safe for that individual to compete without jeopardizing the health of the opponent, the student-athlete may compete. However, that contestant's coach or athletic trainer shall provide current written documentation from the treating physician to the medical professional at the examination, describing: (1) the diagnosed skin disease or condition; (2) the prescribed treatment and the time necessary for it to take effect; and (3) that the skin disease or condition would not be communicable or harmful to the opponent at the time of competition. Such documentation shall be furnished at the medical examination.
- 3.9.6 *Final Determination.* Final determination of the participant's ability to compete shall be made by the host site's physician or certified athletic trainer who conducts the medical examination after review of any such documentation and the completion of the exam. (For physicians' and certified athletic trainers' guidelines regarding the dispensation of skin infections, see Appendix D.)

Rules interpretations may be found in the back of this book on the designated pages.

- 1) *Establishing a weight class: 3.1, WI-10*
- 2) *Procedures for two certifications: 3.1.2, WI-10*
- 3) *Weighing-in: 3.4.2, WI-11*
- 4) *Medical checks: 3.9, WI-11*

RULE 4

Conduct of Meets and Tournaments

4.1 Match Parameters

A match begins with the start of the first period and ends with the conclusion of wrestling. The conclusion of wrestling occurs when time expires at the end of the third period, when overtime ends, or when a fall, technical fall, disqualification or default occurs.

4.2 Notification and Agreement

All options of rules of competition (including ground rules) proposed by the home coach must be submitted to the coach of the visiting team(s) a sufficient length of time before the date of the meet for agreement to be reached on same. No such action is binding unless approved by the visiting team or teams.

The visiting team may request that the home management notify the visiting team at least 10 days before the date of the meet to verify the exact time and place of the meet, time of the weigh-ins, and the name of the NCAA certified referee, who should mutually be agreed upon.

4.3 Contestants, Coaches and Medical Personnel Attire

4.3.1 *Contestants' Attire.* All contestants shall be uniformly attired in their school's official warm-up and match uniform. For all competition, it is required that all clothing (i.e., sweats, warm-ups, shorts, T-shirts) worn by a student-athlete in the competition area be either unadorned (plain) or of the representative institution's school colors. (See Illustration Nos. 5 and 6.) No hats, stocking caps or other inappropriate apparel are permitted. If the item contains a logo, it is required that it be of the school that is represented. Coaches and student-athletes should be aware of NCAA brand name restrictions. Violation of this rule shall result in the head coach being penalized under control of mat area. (See Rule 4.13.4.)

4.3.2 Coaches' Attire. The wearing of jeans, T-shirts, sweatsuits and warm-up suits (top and/or bottom), headwear, and similar apparel are not suitable attire for coaches during dual and tournament competition and, therefore, are prohibited. Each coach in violation of this rule shall be penalized under control of mat area. (See Rule 4.13.4.) Further, the coach(es) in violation shall not sit in the designated reserved zone for coaching if the prohibited apparel is not replaced with suitable attire. (See Rule 8.6.8.)

4.3.3 Medical Personnel Attire. Medical personnel must be appropriately attired. For dual and tournament competition, no T-shirts, sweatsuits, jeans, shorts or headwear may be worn. Violations shall be penalized under control of mat area. (See Rule 4.13.4.)

Note: The NATA strongly encourages trainers to dress in a manner befitting their profession.

4.4 Prematch Period and Procedures

The prematch period is defined as from the time a contestant steps onto the mat until the first period of the match begins, as indicated by the referee's whistle. Failure to comply with prematch procedures, and other acts of unsportsmanlike conduct, will result in penalization for unsportsmanlike conduct according to Rule 6.4 and the Penalty Table.

It is recommended that each team's competing contestants be introduced by name and weight class before the start of a meet.

4.5 Intentional Delay During Premeet Period

A team intentionally delaying its appearance on the mat beyond five minutes of the established meet starting time shall have one team point deducted.

4.6 Starting the Meet

In dual-meet competition, the wrestlers must be ready to go onto the mat immediately when called by the referee. The wrestler to be sent onto the mat first shall be determined by the premeet disk toss. If the even-numbered matches (second, fourth, sixth, etc.) are selected, the coach would send a wrestler onto the mat first for the even matches. The opposing team would then send its wrestler onto the mat first for the odd-numbered matches. (See Rules 1.4 and 4.10.) As soon as either contestant steps onto the mat, that contestant cannot be withdrawn or replaced.

4.7 Length of Matches

For dual meets, all matches shall be seven minutes long, divided into three periods, with the first period lasting three minutes and the second and third periods, two minutes each. The time of the match is continuous, except when the referee stops or starts a match. Multiple dual meets and tournament matches may be less than seven minutes long and divided into three periods. (See Rule 1.1.) A default, disqualification, fall or technical fall terminates the match. At the conclusion of the first period, the referee shall grant the proper wrestler choice of position to begin the second period, which shall be started as soon as possible by the referee. Upon expiration of the second period, the referee shall grant the appropriate wrestler the choice of position for the third period, which shall start as soon as possible. (See Rule 4.10.)

4.8 Wrestle-back Matches

Wrestle-back matches consist of three periods and may be seven minutes, but not less than six minutes in length, to count on the NCAA Individual Season Record Form. (See Rule 1.16.)

4.9 Postmatch Period and Procedures

4.9.1 *Postmatch Period.* The postmatch period is defined as from the conclusion of wrestling until the contestants leave the mat. During this period, the wrestlers will return to and remain in the center of the mat while the referee checks with the scorer's table. Upon the referee's return to the mat, the contestants will give a traditional handshake in a sportsmanlike manner and the referee will declare the winner in accordance with the Referee Signals. (See Illustration Nos. 105 and 106.)

4.9.2 *Failure to Comply.* Failure to comply with the postmatch procedures, including unsportsmanlike conduct and flagrant misconduct, will be penalized according to Rules 6.4, 6.6 and the Penalty Table.

4.10 Choice of Position

4.10.1 *Dual Meets.* Immediately before the contest starts, the referee shall call the captains to the center of the mat and decide by the toss of a colored disk that shall fall to the mat unimpeded and determine which team has the choice at the start of the second period in each weight class.

The winner of the disk toss may choose the odd or even number of the weight classes. (See Rule 1.4.)

The wrestler who has the choice may select the top, bottom or neutral position, or defer choice until the third period. (For exceptions, see Rule 4.11.1.) If the wrestler with choice defers, the opponent may select top, bottom or neutral. If the wrestler with the choice does not defer, the opponent will have the choice of top, bottom or neutral to begin the third period. The choice of odd or even matches in dual meets is not altered in case of a fall, default, forfeit or disqualification.

4.10.2 *Tournaments.* Immediately after the end of the first period, the referee shall determine by toss of a colored disk that shall fall to the mat unimpeded and shall determine which wrestler has the choice at the start of the second period. The wrestler granted the choice shall have the options listed in Rule 4.10.1. The other wrestler shall have the choice at the start of the third period.

4.10.3 *Dual Meets and Tournaments.* If the score is tied at the end of the regulation match (third period), see Rule 4.11.1 to determine which wrestler has the choice of top or bottom position in the tiebreaker periods.

It is recommended that a visual method at the scorer's table be used to indicate which wrestler has the choice in the first tiebreaker period in the first round of overtime. For example, the basketball red or green possession arrow indicator may be used or a dowel rod painted accordingly. (See Rule 8.9.9.)

4.11 Overtime

4.11.1 *First Round of Overtime.* In tournament or dual-meet competition when contestants are tied at the end of three regular periods, the first round of overtime will begin with a sudden-victory period of a maximum of one minute with no rest between the regular match and the sudden-victory period (wrestle-back matches included).

The sudden-victory period will begin with both wrestlers in the neutral position. (For exception, see Rule 7-1.) The wrestler who scores the first point(s) will be declared the winner.

Advantage time shall not be used in any sudden-victory period.

If the first points were awarded simultaneously, as in a double stall, the match will proceed immediately to the tiebreaker periods.

If no winner has been declared at the end of the one-minute sudden-victory period, two 30-second tiebreaker periods will be wrestled. The two tiebreaker periods will be wrestled in their entirety. The choice for position in the first tiebreaker period will be determined at the conclusion of the regulation match and granted to the wrestler who scores the first points other than penalty points and escapes in the regulation match. Time advantage of one minute or more for either wrestler shall be included in this determination. (For time advantage use in tournaments, see Rule 2.11.2.)

When the only points scored are either escapes and/or penalty points, the choice of position will be granted to the winner of a toss of a colored disk. The referee will toss the disk at the conclusion of the sudden-victory period and allow it to fall to the mat unimpeded. The wrestler winning the toss may select only the top or bottom position.

A wrestler choosing the defensive (bottom) position in the first tiebreaker period shall assume the offensive (top) position in the second tiebreaker period. (For exception, see Rule 7.1.1.)

The two 30-second tiebreaker periods will be wrestled with the time advantage kept and recorded (See Rule 2.11.2.), and all points scored. The contestant with the greater number of points, or who is awarded a fall, default or disqualification, is declared the winner.

- 4.11.2 *Second Round of Overtime.* If the score remains tied after the 30-second tiebreaker periods in the first round of overtime, a second round begins with a sudden-victory period of a maximum of one minute.

If the score remains tied after the sudden-victory period, two 30-second tiebreaker periods will be wrestled. The choice for position will be granted to the contestant who did not have the choice in the first tiebreaker round. (See Rule 4.11.1.)

The two 30-second tiebreaker periods will be wrestled in their entirety, time advantage shall be kept and recorded (See Rule 2.11.2.), and all points will be scored. The contestant with the greater number of points, or who is awarded a fall, technical fall, default or disqualification, is declared the winner.

If the score remains tied at the end of the second round of overtime, time advantage shall be used to determine the winner. If a contestant has one second or more of net time advantage accumulated from the two rounds of tiebreaker periods, that wrestler is declared the winner. (See Rule 2.11.2.)

- 4.11.3 *Continuation of Overtime.* If the score remains tied after the second and any subsequent round(s) of overtime, and no net time advantage exists, the match will continue in the same fashion (sudden-victory period of a maximum of one minute, two 30-second tiebreaker periods). The winner is declared using the same methods described in Rule 4.11.2.
- 4.11.4 *Overtime as Extension of Regulation Match.* The sudden-victory and tiebreaker periods will be regarded as extensions of the regulation match. All points, penalties, cautions, warnings, timeouts and injury time will be cumulative throughout the regulation match, the sudden-victory period and the tiebreaker periods; however, time advantage from the regulation match does not carry over.
- 4.11.5 *Equal Number of Penalties—Sudden-Victory Period.* In a situation in which both wrestlers are penalized an equal number of points simultaneously during the sudden-victory period in any round of overtime, those points will be added to both scores, the sudden-victory period will be terminated, and the wrestlers will proceed to the tiebreaker periods.
- 4.11.6 *Injury Due To Illegal Act in Overtime.* If an injury occurs as a result of an illegal act during the sudden-victory period of any round of overtime, the match is concluded. If an injury occurs as a result of an illegal act during the tiebreaker periods of any round of overtime, recovery time is applicable. (See Rule 7.4.)
- 4.11.7 *Flagrant Misconduct In Overtime.* A wrestler earning the first point(s) in the sudden-victory period of any round of overtime can lose only by committing flagrant misconduct. A wrestler who is declared the winner at the end of any round of overtime can lose only by committing flagrant misconduct. (See Rule 6.6.)

4.12 Breaking Team Ties in Dual-Meet Advancement Tournaments

When two teams finish in a tie in a dual-meet advancement tournament, the following criteria shall be applied to determine a winner:

- 4.12.1 Greater number of victories.
- 4.12.2 Greater number of six-point victories (including falls, forfeits, defaults and disqualifications).
- 4.12.3 Greater number of five-point technical falls.
- 4.12.4 Greater number of four-point technical falls.
- 4.12.5 Greater number of major decisions.
- 4.12.6 Fewest number of matches forfeited.
- 4.12.7 Greater number of total near-fall points earned. (This should include additional points earned for excessive bleeding or injury when near-fall points are awarded).
- 4.12.8 Greater number of takedowns.
- 4.12.9 Greater number of reversals.
- 4.12.10 Greater number of escapes.
- 4.12.11 Greater number of riding-time points.
- 4.12.12 Greater number of stalling points.
- 4.12.13 Colored disk toss.

One team point shall be awarded to the team winning by criteria. The method of recording the score in breaking team ties shall be the score followed by the number of criteria that broke the tie (e.g., Team A 17, Team B 16, criterion 4.12.5.) **In regular-season dual-meet competition, team ties shall not be broken.**

4.13 Control of Mat Area

All personnel, other than actual participating contestants, shall be restricted to a designated reserved zone.

- 4.13.1 *Dual Meets*. For dual meets, this zone shall be at least 10 feet from the mat and scorer's table.
- 4.13.2 *Tournaments*. For tournaments, an 8-foot restricted zone shall be placed in any two corners of the mat. The eight feet should be measured

from the corner, along a line connecting the center to that corner. (See diagram in Rule 1.6.)

A maximum of three team personnel will be permitted in the restricted area. If three team personnel are used, two must hold coaching credentials and one must be a properly credentialed medical person. A chair will be placed behind the coaches for a credentialed medical person. Unauthorized team personnel in the corner shall be penalized according to Rule 4.13.4.

- 4.13.3 *Coaches and Medical Personnel.* Coaches may leave this zone only to (1) approach the scorer's table to correct the score or time or to ask for an interpretation of score or time; (2) approach the scorer's table to question the referee's application of a rule; or (3) move toward the mat during a charged timeout or at the end of a match. (See Rule 4.15.) Medical personnel may leave the restricted zone only during an injury timeout.
- 4.13.4 *Failure to Comply.* Failure to comply will be treated in the following manner: first violation—warning; second violation—warning; third violation—deduct one team point; fourth and subsequent violations—deduct two team points and remove individual(s) involved from the premises.

These offenses are accumulated per institution throughout each dual meet and for the duration of multiple duals and tournaments, including dual-meet tournaments. Penalties for control of the mat area and for questioning the referee shall be cumulative and sequential.

4.14 Correction of Error

- 4.14.1 *First or Second Period.* Errors occurring during the first or second period shall be corrected with wrestling resuming immediately. If the incorrect wrestler is given the choice at the start of the second period, no rewrestling is necessary. The opponent shall be given the choice at the start of the third period.
- 4.14.2 *Timekeeper, Scorers, Referee.* If there is an error on the part of the timekeeper, scorers or referee, the error shall be corrected and the referee will inform the wrestlers, coaches and announcer of the correction. During a dual meet, correction shall be made by the referee before the start of a subsequent match. An error during the last match of a dual

meet must be corrected before the referee has signed the scorebook. For a tournament, the correction shall be made by the referee and shall take place before the contestants leave the mat area. Any error not resolved by the referee shall be arbitrated by the tournament committee.

- 4.14.3 *Clerical Error.* A clerical error in recording team scoring in a dual meet or tournament that does not necessitate additional wrestling may be corrected when discovered.

4.15 Questioning the Referee

- 4.15.1 *Coach.* A coach shall be permitted, without penalty, to approach the scorer's table with the intent of correcting or asking for an interpretation of the score or time.

When a coach believes the referee has misapplied a rule, the coach may approach the scorer's table and request that the match be stopped when there is no significant action. The referee and coach shall discuss the situation in a rational manner directly in front of the scorer's table. Both wrestlers shall remain in the center of the mat. Failure to comply shall be penalized as a control-of-mat-area violation. (See Rule 4.13.4.)

At this point, there are only two alternatives for the referee to consider. If there was a misapplication of a rule, the referee shall make the necessary adjustments at the scorer's table and resume the match. If there was no misapplication error, the referee shall determine the coach's action as intentional delay of the match and shall penalize the coach according to Rule 4.13.4.

- 4.15.2 *Badgering—Coach or Team Member.* Badgering the referee by the coaching staff or any member of the team shall not be permitted. Failure to comply shall be considered questioning the referee's judgment and shall be penalized according to Rule 4.13.4.
- 4.15.3 *Penalties Cumulative and Sequential.* Penalties for questioning the referee and for control of the mat area shall be cumulative and sequential.

Tournaments

4.16 Tournament Committee (alterable)

All tournaments should have a tournament committee designated before the start of competition. This committee should consist of at least three members and should have the following duties:

- 4.16.1 Administration of the tournament.
- 4.16.2 Arbitration of all disputes. (For protest protocol, see Appendix A.)
- 4.16.3 Consideration of extenuating circumstances relating to tournament operations.
- 4.16.4 Address immediately sportsmanship violations by team personnel.

4.17 Administration (alterable)

- 4.17.1 *Verification of Entries.* Individual or team entry for tournament competition becomes official at registration. Failure to verify entries by the stipulated deadline may result in disqualification from a tournament. Contestants thereafter failing to make verified weight shall not be allowed to participate in another weight classification.
- 4.17.2 *Mat Reporting Time.* Contestants shall be allowed a maximum of five minutes to appear ready to compete at the specified mat. Failure to appear shall result in forfeit. (For exception, see Rule 4.23.)
- 4.17.3 *Defeat Due to Injury.* In a tournament, defeat due to injury does not eliminate a contestant from further competition, except when a medical forfeit has been granted. A contestant who sustains injury or becomes ill during the course of tournament competition may request a medical forfeit in subsequent rounds of the tournament without appearing on the mat, providing that medical personnel or an authorized institutional representative has informed the official scorer of the wrestler's inability to continue. (See Rule 4.23, medical forfeit.) A contestant who forfeits for medical reasons shall retain advancement points and placement points previously earned but cannot advance further in the tournament.
- 4.17.4 *Forfeit.* A forfeit shall eliminate a contestant from further competition in that tournament.

- 4.17.5 *Disqualification*. A disqualification may eliminate a contestant from further competition in tournaments. In cases in which the disqualified wrestler is eliminated from further competition, all vacancies created in the tournament pairing shall be scored as forfeits. (See Note B under Penalty Table and Rule 5.4.1.)
- 4.17.6 *Failure to Make Weight*. Any contestant who fails to make weight for each day of a tournament shall forfeit all points previously earned, be ineligible for further competition and shall not place in the tournament, except as covered in Rule 4.23.
- 4.17.7 *Rest Between Matches*. It is recommended that no contestant wrestle two matches in any tournament with less than 45 minutes of rest between matches.
- 4.17.8 *Presentation of Awards*. It is recommended that medals and team trophies be presented formally in a ceremony made as impressive as possible. When student-athletes are receiving individual and/or team awards, they shall wear their school's official warm-up. No extra equipment, including all types of headwear, signs, etc., may be worn or carried at the awards ceremony. All additional institutional personnel to be included in the team photo must be appropriately dressed.

4.18 Places Scored (alterable)

In tournaments awarding four or more places, it is recommended that the loser in the final first-place match automatically take second place. The winner in the final wrestle-back match should be awarded third place, and the loser should be awarded fourth place. In tournaments in which six or more places are scored, the defeated wrestlers in the wrestle-back semifinals should wrestle for fifth and sixth places. In tournaments in which eight places are scored, the defeated wrestlers in wrestle-back quarterfinals should wrestle for seventh and eighth places.

4.19 Drawings (alterable)

Immediately after the verification of entries, drawings should be made in accordance with the illustrations provided in this rule. It is recommended that the championship and wrestle-back drawings for each weight class be on the same page and indicate the sessions in which each round will be contested.

4.20 Seeding (alterable)

When there are two outstanding contestants in any class, it is recommended that they be placed in opposite halves of the drawing bracket. In case several seeded wrestlers are of equal ability, their seeded positions should be determined by drawing.

If there is one outstanding wrestler in any class and also two others who are distinctly superior to the remainder in that class, those wrestlers should be seeded in different quarter-brackets of the half-bracket opposite from the outstanding wrestler.

Consideration for determining seeded wrestlers, but not necessarily in this order, is given to: (a) a contestant's won-loss record; (b) head-to-head competition; (c) common opponents; and (d) returning place-winner.

4.21 Byes (alterable)

Byes shall be determined for each individual weight class. The first round for each weight class shall be determined based on the number of byes for that weight class. At no time shall there be equal or more byes than the number of competitors in a weight class. When the number of competitors is four, eight, 16, 32, 64 or another power of two, there shall be no byes in the first round.

When the number of competitors is not equal to a power of two, the number of byes shall be equal to the difference between the number of competitors and the next higher power of two. This establishes the bracket size and the bracket's first round. The number of pairs that meet in the first round shall be equal to the difference between the number of competitors and the next lower power of two.

There shall be no byes after the first round, and no further drawing is necessary for the championship or wrestle-back rounds. The byes, if even in number, shall be divided equally between top and bottom. When byes are required for the first round, they shall be placed by mutual consent or drawn so that they are distributed evenly throughout the bracket. No 1/2, 1/4, 1/8, etc. bracket shall have more than one more bye than its paired bracket. (See Rule 5.4.2.)

Examples:

- Weight class 125 has 20 wrestlers; there shall be 12 byes and four pairings.

- Weight class 133 has eight wrestlers; there shall be no byes and four pairings.
- Weight class 141 has 14 wrestlers; there shall be two byes and six pairings.

If a wrestler receives a bye and then wins the next match, one point in the championship bracket and 1/2 point in the wrestle-back bracket shall be awarded. (See rule 4.5.2.)

4.22 Contestants Eligible for Third-Place Matches (Wrestle-backs) (alterable)

4.22.1 Establishing Wrestle-back Order. Immediately after completion of the first match of the round of 16 in each weight class, wrestle-back rounds should start among all contestants defeated by the winner of this round of 16. At the conclusion of the championship quarterfinals, the losers of those quarterfinals should be cross-bracketed into the third round of wrestle-backs. At the conclusion of the championship semifinals, the losers of those semifinals should be bracketed into the wrestle-back semifinals. (See Rule 4.22.2.)

After completion of the second through eighth matches in the round of 16 for the same weight, the same plan in the preceding paragraph should be followed.

In the double-elimination format, all defeated wrestlers (except those ejected for flagrant misconduct) are eligible for wrestle-backs.

4.22.2 Establishing Order for Third Place and Subsequent Places. Wrestle-back matches to determine third place and subsequent places may be conducted in accordance with the original first-round drawings. Therefore, those eligible for the third-place wrestle-backs should be matched in the order in which they were defeated by the quarterfinalists in each eighth-bracket.

The winner of the wrestle-back matches involving eligible wrestlers from the first eighth-bracket should be matched with the winner of the wrestle-back matches involving eligible wrestlers from the second eighth-bracket. The winner of this match should be paired with the loser of the championship quarterfinal match in the fourth quarter of the bracket (cross-bracketing) in the third round of wrestle-backs. Following the same procedure, the winner of wrestle-back matches drawn from

the third and fourth eighth-brackets should be matched against the loser from the third quarter of the bracket, the winner from the fifth and sixth eighth-brackets against the loser from the second quarter of the bracket, and the winner from the seventh and eighth eighth-brackets against the loser from the first quarter of the bracket.

The non-winners of the championship semifinals are not cross-bracketed. The loser of the upper-bracket semifinal is placed in the upper bracket of the wrestle-back semifinals, and the loser of the lower-bracket semifinal is placed in the lower bracket of the wrestle-back semifinal. The eligible contestants are designated in Rule 4.22.1.

The order of matches depends on the number of competitors in the brackets. Each bracket shall be cross-bracketed based on the size of each individual bracket. Some examples are shown in the charts at the end of this rule.

- 4.22.3 *Rematch in Wrestle-back.* If two wrestlers who previously have competed against each other in the tournament are paired again in the wrestle-back bracket, the matches should be conducted and scored as if they had not wrestled previously.
- 4.22.4 *Disqualification – Both Wrestlers.* If both wrestlers are disqualified simultaneously, the match shall go immediately to overtime. Any subsequent point violation by either wrestler will result in disqualification.

If both wrestlers are disqualified for flagrant misconduct, neither wrestler shall continue in the tournament. (See Rule 6.6.)

4.23 Medical Forfeit

A contestant who is injured or becomes ill during the course of tournament competition may declare a medical forfeit in subsequent rounds of the tournament without appearing on the mat, provided medical personnel or an authorized institutional representative has informed the official scorer of the wrestler's inability to continue. In order to retain advancement and placement points previously earned in the tournament, this declaration must be made no later than the start of the subsequent session, or if the injury took place during the last session of the day, before weighing-in the next day. A participant declaring a medical forfeit is excused from further weigh-ins.

If both contestants are forced, due to injury, to declare a medical forfeit, the next round's opponent wins by medical forfeit. (See scoring abbreviations.)

A contestant who forfeits for medical reasons is eliminated from further competition. A medical forfeit shall count as a win but not as a loss on the wrestler's season record. The nonforfeiting wrestler must appear on the mat in uniform to have his or her hand raised in order to win by medical forfeit. (See Rule 2.18.) Even though no one is charged with a loss, all medical forfeits must be represented on each wrestler's Official NCAA Individual Season Wrestling Record form.

4.24 Protests (alterable)

Tournament administrators should appoint a committee to hear all protests at respective tournaments. A coach only may protest errors in recording points or match results and nonjudgment errors in the application of rules. A coach shall inform the official scorer and the referee of his or her intent to protest the match **before** the match sheet is removed from the scorer's table. The referee will note this intent to protest the match on the match sheet and shall notify the opposing wrestler and coach not to leave the area until the matter is settled. These protests should be filed with the tournament committee in writing within a 10-minute period after the match. (See Rules 4.16.2, 4.25 and Appendix A.)

4.25 Use of Video During Protests (alterable)

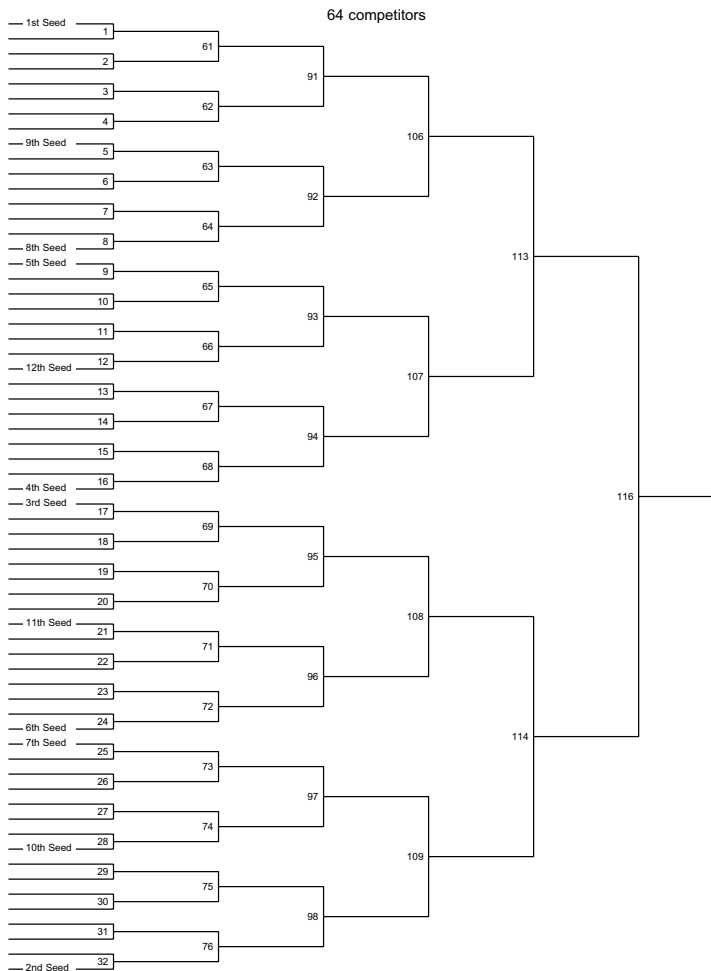

In tournaments, the official videotape may be used to correct errors in the mechanics of scoring and other nonjudgment areas as a part of a formal protest. The official videotape shall be designated by the tournament committee and used to record all tournament matches. (See Rule 1.15.)

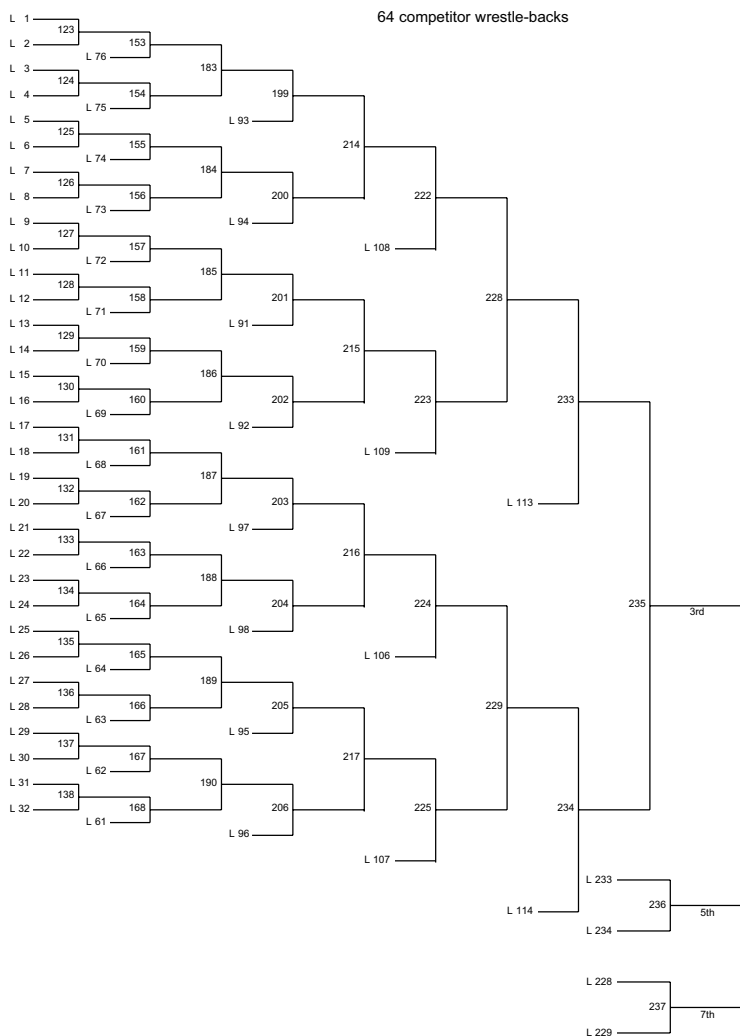

4.26 Optional Bracketing (alterable)

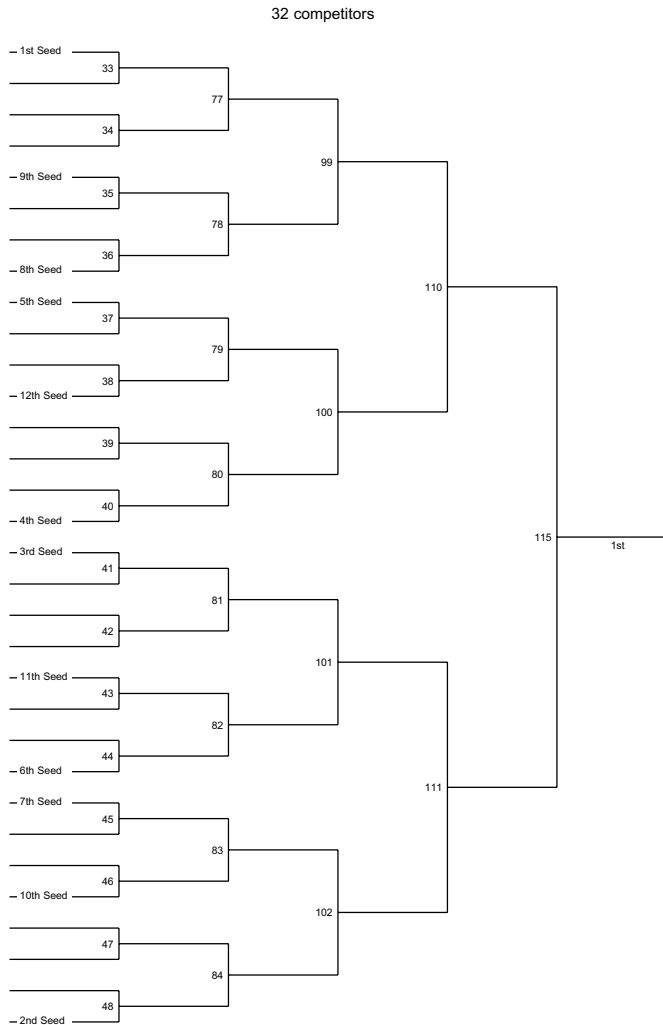

Any non-NCAA qualifying tournament may use bracketing agreed upon by the participating schools.

Rules interpretations can be found in the back of this book on the designated pages.

RULE 5

Scoring

Match

5.1 Scoring and Timing

Match and meet scoring and timing should be kept in plain view of spectators, contestants and coaches. It is strongly recommended that a timing device be available and visible for the purpose of recording time advantage. Information on time advantage should be made available to coaches during the progress of the match by the timekeeper.

Individual

5.2 Points

In all matches, the contestants are awarded points by the referee in accordance with the following system. The numbers in parentheses show the rule under which the situation is defined.

Takedown (Rule 2.6)	2 points
Escape (Rule 2.7)	1 point
Reversal (Rule 2.8)	2 points
Near Fall (Rule 2.9)	2, 3 or 4 points
Time Advantage (Rule 2.11)	1 point

for one minute or more of net accumulated time in the advantage position. One point is the maximum to be awarded for the match. This point shall be included in the final score.

(See Rule 6 and the Penalty Table for the effect of penalties on scoring.)

Note 1: Method of recording score for an overtime match.

*Example: 5-3 (SV-1) or 3-1 (SV-2)**

*7-6 (TB-1) or 4-2 (TB-2)***

*6-6 RT (TB-2)****

*Fall 7:26 (SV-1) or Fall 10:45 (TB-2)*****

Note 2: The use of the number designates the overtime round (i.e., SV-2 indicates the second overtime.)

- * Use SV designation only for overtime matches that end in the sudden-victory period.
- ** Use TB designation only for overtime matches that end at the conclusion of the tie-breaker periods.
- *** Correct method of recording result when no points are scored in the second round and one wrestler wins by net time advantage.
- **** Correct method of recording a fall in either the sudden-victory or tiebreaker periods.

The score at the end of regulation shall not be listed.

TOURNAMENT SCORING CHART (Alterable)

	1st	2nd	3rd	4th	5th	6th	7th	8th
Four Places	10	7	4	2				
Six Places	12	10	9	7	6	4		
Eight Places	16	12	10	9	7	6	4	3

Team

5.3 Dual Meets

- 5.3.1 Six team points shall be scored toward the team total for each contestant who wins by a fall, default, forfeit or disqualification.
- 5.3.2 Five team points shall be scored for a technical fall if the winning wrestler was awarded a near fall during the match.
- 5.3.3 Four team points shall be scored for a technical fall if the winning wrestler failed to score a near fall during the match.
- 5.3.4 Four team points shall be scored for a major decision.
- 5.3.5 Three team points shall be scored for a decision.

Note: For definitions of the above 5.3.1 through 5.3.4, see Rule 2, Definitions.

5.4 Tournaments (alterable)

- 5.4.1 *Places.* In tournaments, individual placement points should be awarded as soon as earned. Placement points already earned shall be deducted in case of forfeit or disqualification for flagrant misconduct. (For medical forfeits, see Rules 4.17.3 and 4.23.)

In events scoring eight places, the winner of each championship quarterfinal should be awarded six place points, the winner of each

championship semifinal should be awarded six additional place points and the winner of each championship final should be awarded four additional place points.

The winner of the wrestle-back semifinals receives three points. In the previous wrestle-back round, the winner receives three points and before that, three points.

The winner of third place and the winner of fifth place should receive one additional place point, while the winner of seventh place should receive one additional place point.

In tournaments scoring six places, the winner of each championship quarterfinal should be awarded four place points, the winner of each championship semifinal should be awarded six additional place points and the winner of each championship final should be awarded two additional place points. The winner of the wrestle-back quarterfinal match should receive four place points. The winner of the wrestle-back semifinals should receive three additional place points. The winner of third place and the winner of fifth place should receive two additional place points.

In tournaments scoring four places, the winner of each championship semifinal should be awarded seven place points and the winner of each championship final should be awarded three additional place points. The winner of each wrestle-back semifinal should receive two place points, and the winner of third place should receive two additional place points.

5.4.2 *Advancement Points.* One team point shall be scored for each match won in the championship bracket and $\frac{1}{2}$ point in the wrestle-back bracket, except for the final first-, third-, fifth- and seventh-place matches. One point in the championship bracket and $\frac{1}{2}$ point in the wrestle-back bracket shall be awarded for a bye if the wrestler receiving the bye wins in the next round.

5.4.3 *Additional Points.* Two additional points shall be scored for each match won by fall, default, forfeit or disqualification throughout the tournament. A total of $1\frac{1}{2}$ points shall be awarded for each match won by a technical fall if the winning wrestler was awarded a near fall during the match. One point shall be awarded for each match won by a major

decision or technical fall if the winning wrestler failed to score a near fall during the match.

SUMMARY OF SCORING

<i>Dual Meet</i>		<i>Tournament</i>	
Fall.....	6	Fall.....	2
Forfeit.....	6	Forfeit.....	2
Default.....	6	Default.....	2
Disqualification.....	6	Disqualification.....	2
Technical Fall (by 15-point differential with near fall).....	5	Advancement	
Major Decision (by 8 through 14 pts.)		Championship Bracket.....	1
or		Wrestle-Back Bracket.....	½
Technical Fall (by 15-point differential without near fall)....	4	Technical Fall (with near fall)	1½
Decision (by fewer than 8 pts.).....	3	Technical Fall (without near fall) or Major Decision.....	1
		Bye followed by a win	
		Championship Bracket.....	1
		Wrestle-back Bracket.....	½
<i>Individual Match</i>			
Takedown.....	2	Near Fall	2, 3 or 4
Escape	1	Time Advantage	1
Reversal.....	2	(Maximum for 1 minute or more)	
<i>In a dual meet, when both teams fail to enter a participant at the same weight class, it shall be scored as "no contest." In this situation, no team points are awarded.</i>			

SCORING ABBREVIATIONS

T-2	Takedown	FL-1	Fleeing

SV	Sudden victory*		
TB	Tiebreaker*		

Note: The abbreviations listed above are the only official terms for recording a result.

**For proper use of overtime abbreviations, see Rule 5.2 (Note 1).*

RULE 6

Infractions

6.1 Penalty Table

The infractions of the rules are penalized in accordance with the penalties listed on the Penalty Table found at the end of this rule.

6.2 Indicating Infractions

A match shall not be stopped to indicate an infraction: (1) when warning or penalizing either wrestler for stalling in the neutral position; or for warning or penalizing for stalling the defensive wrestler or the offensive (advantage) wrestler while in the standing position. Except for the standing position, a match shall be stopped when warning and penalizing the offensive (advantage) wrestler for stalling (See Rule 6.10.4.); (2) for locked hands or grasping clothing committed during a successful reversal, escape or takedown; (3) for applying a figure-four scissors around the head from neutral during a successful takedown; (4) for applying a figure-four scissors around both legs or the body from an advantage position during a successful reversal or escape; and (5) for illegal holds, unnecessary roughness or unsportsmanlike conduct during scoring situations, unless it is necessary to prevent an injury. The referee shall stop the match after scoring has occurred or if scoring no longer is imminent. (See Rules 6.11.2 and 6.11.3.)

6.3 Warnings and Sequence of Penalties

The Penalty Table indicates the sequence of violations, which are cumulative throughout the match. (See Note A under the Penalty Table for exceptions.)

6.4 Unsportsmanlike Conduct

6.4.1 Description of Unsportsmanlike Conduct. Unsportsmanlike conduct can occur before, during or after a match. It may include, but is not limited to, such acts as swearing, baiting an opponent, throwing headgear, failure to stop on the whistle, indicating displeasure with a call or failing to comply with postmatch procedures.

Intentional breaches of decorum shall not be tolerated. This includes such acts as spitting or blowing of the nose (into other than designated receptacles and repositories), uniform straps down while still on the wrestling area or other acts generally considered to be distasteful to spectators, coaches and fellow competitors. Such acts shall be penalized as unsportsmanlike conduct.

The penalty for unsportsmanlike conduct by a wrestler during the pre- or postmatch period will be deduction of one team point for the first violation; the penalty for the second violation will be disqualification, the deduction of one team point and removal from the premises.

The penalty for unsportsmanlike conduct by a wrestler during the match will be one point for the first violation, one point for the second violation, two points for the third violation and disqualification for the fourth violation.

Unsportsmanlike conduct before, during or after a match by coaches, athletic trainers, managers, physicians and noncompeting wrestlers will follow the sequence of penalties listed in the Penalty Table.

The penalties for unsportsmanlike conduct are cumulative throughout a dual meet or a tournament session for coaches, athletic trainers, managers and physicians. These penalties are cumulative per institution. They also are cumulative for a contestant for a match or dual meet.

6.4.2 *Spectator Sportsmanship.* The public address announcer at all dual meets and tournaments should read the following sportsmanship statement for spectators before competition begins for each dual meet or tournament session: “The NCAA promotes good sportsmanship by student-athletes, coaches and spectators. We request your cooperation by supporting the participants and officials in a positive manner. Profanity, racial or sexist comments, or other intimidating actions directed at officials, student-athletes, coaches or team representatives will not be tolerated and are grounds for removal from the premises.” (See Spectator Sportsmanship under Code of Conduct.)

The home management shall be responsible for the removal of spectator(s) upon request by the referee or assistant referee. This shall be done without penalty to either team.

6.5 Unnecessary Roughness

Unnecessary roughness involves physical acts that occur during a match. It includes any act that exceeds normal aggressiveness. It would include, but is not limited to, a forceful slap to the head or face, gouging or poking the eyes, a forceful application of a crossface, a forceful trip, or a forearm or elbow used in a punishing way, such as on the spine or the back of the head or neck. Points for unnecessary roughness shall be awarded in addition to points earned. (See Penalty Table for sequence of penalties.)

6.6 Flagrant Misconduct

6.6.1 *Prematch, Match or Postmatch Period.* During the prematch, match or postmatch period, flagrant misconduct committed by either wrestler, such as intentionally striking an opponent, deliberately attempting to injure an opponent, or any act serious enough to disqualify a wrestler from an event, shall be penalized by the deduction of one team point, disqualification of that contestant, removal from the premises, the opponent declared the winner and six team points awarded. For tournaments, a team point shall be deducted from the offender's team score, the opponent declared the winner and two team points awarded. (For flagrant misconduct in overtime, see Rule 4.11.7.)

In addition, that contestant will not be credited with points earned before the incident, nor receive placement points or an individual tournament award. Other contestants will remain in their respective positions.

A wrestler disqualified for committing an act of flagrant misconduct shall be suspended from the institution's next scheduled wrestling competition and shall not compete again until it is with the team at the team's next scheduled wrestling competition. If flagrant misconduct occurs during the last event of the season, the suspension carries over to the first event of the next season. The referee shall alert the National Coordinator of Officials that a flagrant misconduct violation occurred.

Pat McCormick, National Coordinator of Officials

pat.mccormick@hamptonu.edu

757/719-5061

The National Coordinator of Officials will contact the respective divisional chair who will communicate with the violating student-

athlete's institutional administration to ensure the suspension is served. (See Rule 8.9.13.)

Flagrant misconduct may consist of nonphysical and physical acts of misbehavior.

In triangular, quadrangular, tournament or similar dual-team events, an individual(s) penalized for flagrant misconduct shall be disqualified and removed from the premises for the duration of the event, including multiple-day competitions. "Premises" is defined as the building in which the event takes place. The table scorer is required to inform the head coach that a team member has been charged with a flagrant misconduct violation.

If a noncompeting wrestler commits an act of flagrant misconduct, the same sanctions apply as if the student-athlete were a competing wrestler.

6.6.2 *Institutional Representative.* If the offender is an institutional representative other than the competing and noncompeting wrestlers, the penalty shall be the deduction of one team point and the offender shall be removed from the premises for the duration of the event, including multiple-day events.

6.6.3 *Use of Tobacco Products.* The use of tobacco products by student-athletes, coaches or other team personnel on the premises during an event is a flagrant misconduct violation. (For referees, see Rule 8.10.) Additionally, in NCAA competition, a tobacco violation may be penalized as misconduct as defined by NCAA Bylaw 11.1.7, with the penalty to be determined by the NCAA Wrestling Committee.

6.7 Illegal Substance on Skin

The use of oil or greasy substances that cannot be completely removed shall be grounds for disqualification at the discretion of the referee. Timeout for the removal of such substances shall be cumulative with the timeout for injuries throughout the match. The total time used shall not exceed 1½ minutes. (See Rule 7.1.)

Holds

6.8 Illegal

6.8.1 Holds. Any hold shall be allowed except the hammerlock above the right angle; twisting hammerlock; full nelson; front headlock without the arm; headlock without the arm (must encircle at the elbow or above); straight head scissors (even though the arm is included); over-scissors; strangle holds; all body slams; twisting knee lock; key lock; overhead double arm bar; the bending, twisting or forcing of the head or any limb beyond its normal limits of movement; locking the hands behind the back in a front double arm bar; full back suplay from a rear-standing position; leg cut back; and any hold used for punishment alone. (See Illustration section for examples.)

Any hold with pressure exerted over the opponent's mouth, nose, throat or neck that restricts breathing or circulation is illegal.

Any leg ride that hyperextends the knee of the defensive wrestler beyond the normal limits of movement shall be called illegal. (See Illustration Nos. 100 and 101.) A variety of leg rides may be applied that do not exert hyperextensive pressure on the knee and therefore are permissible. (See Illustration Nos. 103 and 104.)

Whenever possible, an illegal hold should be prevented rather than called. When an illegal hold cannot be prevented, it must be penalized. (Example: A twisting knee lock. See Illustration Nos. 36, 37, 40 and 41.)

6.8.2 *Grasping Fingers*. Contestants may grasp all four fingers in an effort to break a hold, but pulling back the thumb or one, two or three fingers is illegal.

6.8.3 *Slam*. The term "slam" is interpreted as lifting and bringing an opponent to the mat with unnecessary force. This infraction may be committed by a contestant in either the top or bottom position on the mat and during a takedown. When a contestant lifts the opponent off the mat and brings that wrestler to the mat with excessive force, a slam shall be called without hesitation after the situation occurs.

6.8.4 *Intentional Drill*. An intentional drill or forceful fall back is illegal when the defensive wrestler is in a standing position and the offensive wrestler has a scissor hold or a cross-body ride.

- 6.8.5 *Over-Scissors*. A leg hooked over the top toe of an opponent's straight body scissors is interpreted as an over-scissor and is therefore illegal. (See Illustration No. 33.)
- 6.8.6 *Locked Hands – Guillotine*. The offensive wrestler cannot lock hands around the head of the defensive wrestler when using the guillotine until the offensive wrestler meets a near-fall criterion.
- 6.8.7 *Injury – Illegal*. For injury caused by illegal action, see Rule 7.4.
- 6.8.8 *Legal Hold – to Illegal*. A wrestler applying a legal hold should not be penalized when the opponent turns the legal hold into an illegal hold. The referee shall cause the hold to be released when it becomes illegal. However, the match need not be stopped unless the referee finds it necessary to do so in order to correct the situation. (See Rule 6.9.)
- Points for illegal holds will be awarded in addition to points earned by the offended wrestler.
- 6.8.9 *Three-quarter Nelson*. The three-quarter nelson is not to be interpreted as a headlock. (See Illustration No. 66.)
- 6.8.10 *Legal Head Lock*. Pulling the head over the shoulder with hands locked or overlapped is not to be interpreted as a headlock. (See Illustration No. 65.)
- 6.8.11 *The Double Arm Bar*. The front double arm bar is legal if hands are locked at the side. (See Illustration Nos. 61 and 62.)

6.9 Potentially Dangerous

Any hold that forces a limb to the limit of the normal range of motion, and other holds or situations that will cause injury, are potentially dangerous and shall be stopped by the referee. When “potentially dangerous” is called, no penalty points shall be awarded. The match is resumed in the neutral or starting position on the mat as determined by the position held at the time the match was stopped.

As a combative sport, wrestling allows for a level of discomfort in many legal positions. Contestants should realize, however, that any legal hold can be turned into a potentially dangerous or illegal position. Referees should verbally caution contestants against turning a legal hold into a potentially dangerous or illegal position.

Technical Violations

6.10 Stalling

6.10.1 It is the responsibility of contestants, referees and coaches to avoid the use of stalling tactics or allow their use. Action is to be maintained throughout the match by the contestants making an honest attempt to stay near the center of the mat and wrestle aggressively whether in the top, bottom or neutral position. This concept shall be demonstrated by those responsible with strict enforcement by referees. A stalling penalty is preceded by a warning, and there shall be only one warning per contestant per match.

When a referee recognizes stalling unquestionably occurring at any time and in any position, the offender will be warned and subsequent violations will be penalized without hesitation. (See Penalty Table for sequence of penalties and Rule 6.10.7.)

Note: For double stalling disqualifications in tournaments, see Rule 4.22.4.

6.10.2 *Holding Legs.* Repeatedly grasping or interlocking hands around a leg resulting in a stalemate situation, in any position, is to be considered stalling. It is stalling when the wrestler in the advantage position on the mat grasps the defensive wrestler's leg(s) with both hands or arms, unless such action is designed to break down the opponent for the purpose of securing a fall or to prevent an escape or reversal. Repeatedly grasping and holding the leg(s) with both hands or arms merely to break down the defensive wrestler or to maintain control is a violation under this rule. When the defensive wrestler has gained a standing position, the wrestler in the advantage position is allowed reaction time to begin a breakdown.

6.10.3 *Neutral Position.* Each wrestler must make an honest attempt to work toward the center of the mat and maintain an attack to secure a takedown, regardless of the time or score of the match. Contestants may maneuver to avoid the tie-up if such action is taken to improve position or acquire a takedown. Repeated movement away from the opponent without attempting a takedown is defined as fleeing the opponent and is stalling. A contestant who continuously avoids contact without initiating an attack, plays the edge of the mat, secures a single leg and does not attempt to finish the move, or uses upper-body tie-ups to control and

move the opponent without attempting a takedown, is stalling. Repeated use of the head as a lever to acquire a defensive position while in the tie-up is stalling.

- 6.10.4 *Advantage Position.* The contestant in the advantage position on the mat must wrestle aggressively and attempt to secure a fall when action permits. Whenever the offensive wrestler is content to hold the opponent on the mat and not work for a fall, the offensive wrestler is stalling.

When warning or penalizing a wrestler for stalling in the advantage position, except in the standing position, the match shall be stopped, the offensive wrestler penalized according to the Penalty Table and wrestling resumed in the offensive starting position. (See Rule 6.2[1].)

Intentionally releasing an opponent is not considered stalling. The released wrestler is to be allowed reaction time before a takedown can be attempted. The responsibility to improve in the rear-standing position lies with the both wrestlers. Failure to attempt to take the opponent back to the mat should be treated as stalling.

- 6.10.5 *Stalling – Rear-Standing Position.* Repeatedly applying the legs while in the rear-standing position is stalling.
- 6.10.6 *Defensive Position.* Refusing to wrestle aggressively in the defensive position is stalling. The contestant in the defensive position must initiate action designed to escape or reverse the opponent. Failure to make these attempts is stalling. The referee will give both visual and verbal warnings without stopping the match.

When there is little or no action in the mat position, the responsibility for initiating action rests with both wrestlers.

- 6.10.7 *Stalling in the Final 15 to 20 Seconds of a Match.* With the increased excitement among coaches, referees and spectators during the closing seconds of many matches, stalling penalties often are called unjustly and unfairly. These frequently are penalties that would not be called during comparable action earlier in the match. Stalling should be called consistently through the match. A stalling warning or penalty should be called during the concluding moments of a match only when stalling unquestionably is occurring.

- 6.10.8 *Delaying Match*. Delaying the match—such as straggling back from out of bounds or unnecessarily changing or adjusting equipment—shall be penalized as stalling.

6.11 Interlocking Hands

- 6.11.1 Wrestlers in the position of advantage may not interlock or overlap their hands, fingers or arms around their opponent's body or both legs unless all of their opponent's weight is supported entirely by the opponent's feet or the defensive wrestler's pinning area is meeting a near-fall criterion. (See Rule 2.9.)

The offensive wrestler may continue to keep locked hands after a bodylock or double-leg takedown when a near fall is imminent. The referee shall verbally inform the wrestlers when a near fall is imminent by saying "imminent." When the near fall is no longer imminent, the referee shall say "not imminent" and grant the offensive wrestler reaction time to release locked hands. (See Illustration Nos. 76 and 77.)

The mere touching of the defensive wrestler's hands to the mat is not considered a change in this position unless the hands are weight-bearing, in which case the offensive wrestler is allowed reaction time to release the lock. It is inappropriate conduct for the defensive wrestler to touch either or both hands or one knee to the mat in order to release the offensive wrestler's lock, and the referee shall not call a violation if the lock is held in such cases. (See Illustration Nos. 94 through 96.)

- 6.11.2 *Stopping the Match*. The referee shall stop the match when it is obvious that the defensive wrestler will not complete an escape or reversal. If the defensive wrestler is successful with the escape or reversal, the match shall not be stopped to award points.
- 6.11.3 *Stopping Time Advantage*. Time advantage shall be stopped at the time the referee signals that the offensive wrestler has an unfair advantage, such as locked hands, other technical violations (except when warning or penalizing the defensive wrestler for stalling or the offensive wrestler while in the standing position, or fleeing in the offensive position) or illegal holds. The referee is to signal this violation by giving the locked-hands or illegal-hold signals as shown on the Referee Signals chart at the end of the Illustrations section.

6.12 Figure-Four Scissors

The figure-four scissors is a technical violation when applied by the offensive wrestler around the body or around both legs of the defensive wrestler, or around the head, with or without the arm included, in a neutral position by either wrestler. (See Illustration Nos. 26 and 28.)

The referee shall stop the match when it is obvious that the offended wrestler will not complete the takedown, reversal or escape. If the offensive wrestler completes the takedown, the match shall not be stopped and points shall be awarded as in interlocking of hands.

6.13 Leaving Mat Without Permission

It is a technical violation to leave the mat without first receiving permission to do so from the referee.

6.14 Fleeing Wrestling Area

Fleeing the wrestling area or forcing an opponent out of the wrestling area as a means of avoiding being scored upon, is a technical violation. Both wrestlers should make every effort to remain in bounds. Fleeing occurs any time a wrestler avoids wrestling by intentionally going out of bounds, by pulling the opponent out of bounds or by pushing the opponent out of bounds. Fleeing the wrestling area will not follow the disqualification sequence. The penalty will be one point for each infraction. (See Penalty Table.)

6.15 Toweling Off

A timeout for toweling off perspiration during a match is a technical violation.

6.16 Grasping Clothing

Grasping of clothing, the mat, equipment or headgear by a contestant is a technical violation, and any advantage gained thereby shall be nullified.

6.17 False Starts

Making false starts is a technical violation. The sequence of penalties will be:

- 6.17.1 *First and Second Violations.* Visual caution, signified by a “C” formed by the forefinger and thumb.

6.17.2 *Third and Subsequent Violations.* One penalty point for each occurrence.

The sequence of penalties is inclusive with incorrect starting positions.

6.18 Incorrect Starting Positions

Assuming an incorrect starting position can be a technical violation when, in the judgment of the referee, a wrestler assumes an incorrect starting position to:

6.18.1 Gain a distinct advantage over the opponent; or

6.18.2 Demonstrate obvious disregard for the referee's instructions or the rules.

Other incorrect starting positions shall be corrected by the referee by verbal communication with the wrestler(s). The sequence of penalties is inclusive with false starts.

Rules interpretations can be found in the back of this book on the designated pages.

PENALTY TABLE

Infraction	Rule	First Violation	Second Violation	Third Violation	Fourth Violation	Fifth Violation
Unnecessary roughness ¹	6.5					
Illegal holds ¹	6.8					
Unsportsmanlike conduct ² —wrestler during match	6.4		1 point	2 points		Disqualify
Technical Violations ¹	6.11, 6.12, 6.13, 6.15, 6.16					
Technical Violations (exceptions to above)						
Stalling	6.10					
Delaying of match	6.10.8		Warning	1 point	2 points	Disqualify
Fleeing wrestling area ³	6.14		1 point for each violation.			
False starts	6.17					
Incorrect starting positions	6.18		Caution	1 point for this and subsequent violations		
Unsportsmanlike conduct ² —nonparticipating team personnel, wrestlers before and after match	6.4	1 team point	Disqualify; 1 team point; remove from premises ⁴			
Flagrant misconduct—wrestlers	6.6	Disqualify; 1 team point; remove from premises ⁴ ; opponent declared winner				

Infraction	Rule	First Violation	Second Violation	Third Violation	Fourth Violation	Fifth Violation
institutional representatives		1 team point; remove from premises ⁴				
Control of mat area ⁵	4.3					
Questioning the referee ⁵	4.13	Warning	Warning	1 team point	2 team points; remove from premises ⁴	
	8.6.8					
	4.15					
	8.6.7					
Illegal substances on skin, appearance or illegal uniform or equipment	1.11 1.12 1.13 6.7	Disqualify if not removed or corrected within contestant's remaining injury time ⁶				
Prohibited dehydration practices	3.5	Suspend wrestler for next competition(s)	Suspend wrestler for season			
Violation—practice-room temperature	3.7	Suspend coach for next competition(s)	Suspend coach for season			
Tobacco use by match official	8.10	Report to event administrator				
Grooming violation-tournaments ⁷	3.4.3	Warning	Warning	1 team point	2 team points; remove head coach from premises ⁴	2 team points for fifth and subsequent violations
Communicable skin diseases	3.9.4, Appendix D	Disqualify				

Note A: Any combination of four penalties, excluding cautions, warnings, false starts, assuming incorrect starting position and fleeing the mat accumulated during a match (including overtime) will result in disqualification.

Example of Cumulative Infractions. Offensive Wrestler A locks hands around the body of Wrestler B down on the mat.

Penalty: One point.

In the second period, Wrestler A is warned for stalling and then applies an illegal head scissors.

Penalty: One point.

In the third period, Wrestler A is called for stalling.

Penalty: Two points.

Later in the third period, Wrestler A is called for unsportsmanlike conduct.

Penalty: Disqualification.

Note B: Defaults and disqualification due to technical violation, illegal holds, injury, unnecessary roughness or unsportsmanlike conduct does not eliminate a contestant from further tournament competition. (For exceptions, see Rule 4.22.4.) Disqualification for flagrant misconduct eliminates that contestant from further competition in that tournament, and that contestant forfeits all points and placement earned in the tournament. (See Rule 4.22.4.)

¹Points for unnecessary roughness, technical violations and illegal holds will be awarded in addition to points earned by the offended wrestler.

²The penalties are cumulative throughout a dual meet or a tournament session for coaches, athletic trainers, managers and physicians. They are cumulative for a contestant for a match or dual meet. These penalties are cumulative per institution.

³Fleeing the wrestling area is a technical violation, but penalties do not follow the disqualification sequence. The penalty is one point for each infraction.

⁴Removal is for the duration of the event in which it occurs. This includes single-day and multiple-day events.

⁵These offenses are cumulative per institution throughout each dual meet and for the duration of triangular meets, quadrangular meets and tournaments.

⁶Referee may declare an official timeout to correct equipment or uniform that becomes illegal or inoperative during use.

⁷These violations are cumulative by team for all days a weigh-in is conducted.

SUMMARY OF TECHNICAL VIOLATIONS

Stalling (6.10)	Fleeing wrestling area (6.14)
Delaying match (6.10.8)—(treat under stalling)	Toweling off (6.15)
Interlocking hands (6.11)	Grasping clothing, etc. (6.16)
Figure-four scissors (6.12)	False starts (6.17)
Leaving mat without permission (6.13)	Incorrect starting position (6.18)

RULE 7

Injuries and Timeouts

7.1 Timeout

7.1.1 Injury Timeout. An injured or ill contestant may be awarded timeout up to a maximum of 1½ minutes, which is cumulative throughout the match, including overtime periods.

After the second nonbleeding injury timeout taken by a wrestler, the noninjured wrestler is granted the choice of top, bottom or neutral position on the restart. If the second timeout is taken at the conclusion of the first period, the noninjured wrestler will have the choice at the start of the second and third periods. If the second timeout is taken at the end of the second period, the opponent will have the choice at the start of the third period.

If the second nonbleeding timeout is taken at the conclusion of the third period, the opponent would have the choice of any one of the three starting positions at the beginning of the sudden-victory period. In a similar manner, if the second timeout is taken any time during the sudden-victory period, the opponent will receive the choice of starting position when the match is restarted.

Advantage time is never used in any sudden-victory period. (See Rule 4.11.1.)

If the second timeout is taken at the conclusion of the sudden-victory period, the opponent shall receive the choice of either top or bottom position at the beginning of the first tiebreaker period.

If the second timeout occurs at the conclusion of the first tiebreaker period, the opponent shall have the choice of either top or bottom position in the second tiebreaker period. If the second timeout occurs during either of the tiebreaker periods, the opponent shall have the choice of top or bottom when the match is restarted.

A third nonbleeding injury timeout will terminate the match. The noninjured wrestler shall be declared the winner by default.

- 7.1.2 *Unethical Timeouts.* Taking an injury timeout for a noninjury situation is unethical. (See Coaches Code of Conduct, and Student-Athletes' Statement of Conduct and Responsibility.) A contestant who indicates an injury for the purpose of preventing scoring or being pinned must be charged with an injury timeout. (See Rule 2.9.8.)
- 7.1.3 *Resumption of Wrestling.* If, at the expiration of the timeout, the contestant is able to continue wrestling, the match shall be resumed as if the contestant had gone out of bounds.
- 7.1.4 *Calling Timeout.* Only the referee may call timeout. Additionally, the referee shall have the prerogative to stop the match to determine the presence of an injury to a contestant before starting the injury time or recovery time.
- 7.1.5 *Bleeding Timeout.* If bleeding occurs, the referee shall interrupt the match, except if the bleeding is insignificant and point-scoring action is taking place. In that case, the match shall be interrupted as soon as the point-scoring situation is completed.

Timeout for bleeding shall not count against the wrestler's 1½ minutes of injury time.

The number and length of timeouts for bleeding is left to the discretion of the referee. If bleeding becomes excessive or causes an inordinate amount of timeouts, the referee, in consultation with a certified athletic trainer or physician, shall have the authority to default the match.

Blood on a uniform does not necessarily require a uniform change; however, in the rare case when a wrestler's uniform becomes saturated with blood, that wrestler shall be directed to change into another official uniform. (See Rule 1.11.1 and Appendix B.) If another official uniform is not available, the match shall be defaulted, with the other wrestler declared the winner.

- 7.1.6 *Defaulting the Match.* The coach has the prerogative to default (stop) a match in progress, or during a timeout, injury timeout or recovery timeout, by walking onto the edge of the wrestling area in an orderly manner to notify the referee. The contestant may terminate the match by stating clearly and verbally to the referee the intent to default. It is understood by the coach, contestant and referee that either of these procedures terminates the match in progress.

7.1.7 Official Timeout. When a contestant returns to the center of the mat ready to wrestle after an injury timeout or recovery timeout and the referee questions the contestant's ability to continue, the referee may call an official timeout for medical consultation. The official timeout occurs only after the contestant's injury time has expired. The medical personnel may examine, but not treat, the contestant during this time.

7.1.8 Displacement of Contact Lens. Time used to recover or replace a dislodged or lost contact lens may be charged against a contestant's 1½ minutes of injury time and count as an injury timeout, if the referee determines that this disrupts the flow of the match.

7.2 Match-Ending Injury

If an injured contestant is unable to continue wrestling, the match shall be awarded in accordance with Rules 7.3 and 7.4. If a contestant is rendered unconscious, that wrestler shall not be permitted to continue in the match after regaining consciousness without the approval of a physician.

A contestant who receives a temporary injury to the head, neck or spinal column that does not render that contestant unconscious shall not be permitted to continue the match without approval of a physician or certified athletic trainer.

7.3 Accidental Injury

If a contestant is injured accidentally and is unable to continue the match, the opponent shall be awarded the match by default.

7.4 Injury From Illegal Action

Each time a contestant is injured by an opponent who uses an illegal hold or who commits an act of unnecessary roughness or unsportsmanlike conduct, and is unable to continue, that wrestler is allowed a maximum of two minutes of recovery time to be ready to wrestle. This time does not count against that wrestler's cumulative 1½ minutes of injury time. If that contestant is not able to continue at the end of two minutes of recovery time, then the match is awarded to the injured contestant and scored as a default. (For exception, see Rule 7.1.6.) However, if the injured contestant recovers and wrestling resumes, that contestant then cannot be awarded the match by default for this illegal action.

7.5 Attendants During Timeout

No more than two attendants and a physician/athletic trainer shall be permitted on the mat with the wrestler during a timeout.

Rules interpretations can be found in the back of this book on the designated pages.

1) *Timeout, 7.1, WI-20*

2) *Match-Ending Injury, 7.3, WI-21*

RULE 8

Officials

8.1 Referee

8.1.1 *Certification.* A referee who wishes to officiate collegiate meets, tournaments or NCAA championships competition must be NCAA-certified on or before October 19, 2007. Certification may be completed by attending the NCAA Rules Clinic, held at the National Wrestling Coaches Association convention, and completing the registration card distributed at the clinic. Please see the NWCA Web site for convention information. A referee may also fulfill certification requirements by viewing the NCAA Wrestling Rules DVD presentation and completing registration with the NCAA not later than October 19, 2007. To view the presentation online with minimum Internet connection speed of 150 kbs, please go to www.ncaa.org, select the sports and championships tab, then select winter sport wrestling.

8.1.2 *Institutional Penalty.* An institution using a non-registered referee shall be subject to any or all of the following penalties:

8.1.2.1 Monetary fine (\$50 up to a \$300 maximum penalty);

8.1.2.2 Disqualification of head coach for one or more competitions;
and

8.1.2.3 Private or public reprimand.

Coaches and/or administrators should contact the NCAA Wrestling Rules Committee chair or committee member, the NCAA Wrestling Secretary-Rules Editor or an NCAA staff liaison to report a potential violation.

8.2 Attire

The referee shall be dressed neatly. A referee's attire for all dual meets and tournaments shall consist of:

8.2.1 Black-and-white striped or black-and-gray striped referee's short-sleeve knit shirt. When officiating tournaments or multiple duals, shirt uniformity is required.

8.2.2 Black full-length trousers.

8.2.3 Black socks and black gym shoes.

8.2.4 Black belt.

8.2.5 Red and green wristbands.

8.2.6 Other accessories—colored disk and whistle.

8.2.7 Referees shall wear a green wristband on their right wrist and red wristband on their left wrist to correspond to the starting lines of the home and visiting teams, respectively. However, referees shall have the flexibility to switch color assignments to match team uniforms.

8.3 Jurisdiction Time and Responsibility

The jurisdiction of the referee begins upon arrival at the site of competition and concludes with the signing of the scorebook in dual meets or after the last match is completed in tournaments.

On matters of judgment, the referee shall have full control of the meet. The referee's decisions shall be final; however, a referee may change a call immediately if the referee feels the original call was in error.

8.4 Duties

8.4.1 *Premeet Instruction.* Before the contestants and coaches come to the mat, the referee shall:

8.4.1.1 Verbally alert home management of any variance from the stated facility and mat requirements (See Rule 1.6 and 1.7.);

8.4.1.2 Inspect contestants for improper grooming, the presence of oils or greasy substances, long fingernails, objectionable braces, pads or taping, or the wearing of improper warm-ups and/or clothing, finger rings, jewelry, or chewing gum, none of which shall be allowed.

8.4.1.3 Clarify the rules with coaches and contestants;

8.4.1.4 Advise contestants to report to their designated areas (red and green) at the center of the mat, opposite each other and ready to wrestle; and

8.4.1.5 Advise coaches of proper coaching attire. (See Rule 4.3.2.)

8.4.2 *Team Captains.* Before a dual meet starts, the referee shall call the team captains to the center of the mat for the toss of the disk to determine

the choice of position at the start of the second period. (See Rules 1.4 and 4.6.)

8.4.3 *Referee Signals.* The referee shall use the Referee Signals Chart at the end of the Illustrations section.

8.4.4 *Timekeeper.* The referee shall signal the timekeepers as follows:

8.4.4.1 When the match is started or stopped for any reason.

8.4.4.2 When time advantage begins or ends for a contestant.

8.4.4.3 Whenever timeout is involved in any situation occurring in the match.

8.4.5 *Warning/Awarding Points.* The referee will signal and verbally notify the scorer and contestants when warnings or points are awarded to either contestant. The referee will use a verbal and point signal when calling fleeing. This can occur in the neutral, offensive and defensive positions, and while a wrestler(s) is in the wrestling area. Advantage time, if applicable, will not be stopped after the penalty. The referee should let the wrestlers know when near-fall points have been earned.

8.4.6 *Enforcing the Rules.* The referee shall be firm in enforcing the letter and spirit of the rules and penalize consistently any infractions. The referee must enforce vigorously and promptly the penalties for the infractions as provided in Rule 6.

8.4.7 *Potentially Dangerous.* The referee shall caution the user of a potentially dangerous hold in order to prevent possible injury. Such holds should be stopped by the referee, if possible, before reaching the dangerous stage. (See Rule 6.9.)

8.4.8 *Oral Commands.* The referee may use oral commands, i.e., “action, improve, center, imminent, not imminent,” to instruct, but not coach wrestlers.

8.4.9 *Injury Timeout—Nonbleeding.* Coaching an injured nonbleeding contestant is permitted.

8.4.10 *Awarding Points—Edge of Mat.* When possible, the referee should award points in on-the-edge-of-the-mat situations before blowing the whistle.

- 8.4.11 *Use of Hands in Pinning Situations.* The referee should not place either or both hands under the shoulders of a contestant unless absolutely necessary to determine a fall.
- 8.4.12 *Unexpected Developments.* The referee should meet promptly, in a spirit of good sportsmanship, any situation developing unexpectedly.
- 8.4.13 *Match Winner in Doubt.* If, at the end of a match, there is a doubt as to the winner, the referee shall order the contestants to stay on the mat, then check the time advantage and the scorers' records to decide the winner. The time advantage, if any, shall be recorded on the scoreboard, and the referee shall declare the winner.
- 8.4.14 *Certifying Final Results.* The referee shall sign the official score sheet or score book to certify the final results.
- 8.4.15 *Seating—Scorer's Table.* The referee is responsible for the seating arrangement at the scorer's table in accordance with the diagram.

SEATING ARRANGEMENT AT SCORER'S TABLE

WHEN INDIVIDUAL CLOCKS OR STOPWATCHES ARE USED

Home-Team Assistant Timekeeper	Visiting-Team Assistant Timekeeper	Match Timekeeper	Visiting-Team Scorer	Home-Team Scorer
--------------------------------------	--	---------------------	-------------------------	---------------------

WHEN MULTIPLE TIMER IS USED

	Timekeeper	Visiting-Team Scorer	Home-Team Scorer/Announcer	
--	------------	-------------------------	----------------------------	--

- 8.4.16 *Period Ends Before Awarding Fall, Point(s) or Assessing Infraction.* If the referee determines that a fall, near fall, takedown, reversal, escape or any infraction has occurred, and the period ends before the referee can so indicate, the fall or points shall be awarded or the offending wrestler penalized. If the referee is in doubt as to whether such a situation has occurred before or after the period has ended, the referee shall consult with the assistant referee, if available. If there is no assistant referee or if the assistant referee also is in doubt, the referee shall ask the match timekeeper if the indication was made by hand signal before the period ended. (See Rule 2.12.6.)

8.4.17 *Use of Assistant Referee.* A referee shall cooperate with the assistant referee and not hesitate to ask for assistance, remembering that the main objective is to make correct and fair decisions.

8.4.18 *Making Corrections.* If a correction is made, the referee should advise the wrestlers, coaches and table personnel as soon as possible.

Other Officials

8.5 Assistant Referee

In tournament competition, it is recommended that one assistant referee be assigned. The use of an assistant referee is designed to minimize human error. The assistant referee will be granted the same mobility as the referee; however, the referee will be in control of the match.

Assistant referees must aggressively take part in the officiating of each match.

When possible, the assistant referee should be in a position to observe mat action and the clock simultaneously at the expiration of each period if a towel tapper is not utilized.

8.6 Assistant-Referee Procedures

8.6.1 *Verbal Communication.* Verbal communication between the assistant referee and referee is encouraged.

8.6.2 *Disagreement.* When the assistant referee disagrees with the referee, the match should be stopped as soon as it is practical and an official timeout will be indicated. The assistant referee should avoid interrupting the match while significant action is in progress.

8.6.3 *Resolving Questions or Disagreements.* The assistant referee and the referee should discuss questions pertaining to scoring and/or timing in front of the scorer's table. When discussing a disagreement, the assistant referee and the referee should meet quickly on the apron, away from contestants and the scorer's table.

8.6.4 *Options.* An assistant referee may support, disagree with or have no opinion relative to a decision. However, the referee should prevail in the event of a disagreement.

8.6.5 *Inform Scorer's Table.* When a decision is reached, the referee shall inform the scorer's table of any change in the match scoring.

- 8.6.6 *Persons Permitted on Mat.* The referee, assistant referee and two contestants are the only individuals permitted to step onto the wrestling mat. Coaches are not permitted to address the assistant referee. (See Rules 4.13.2 and 4.13.3.)
- 8.6.7 *Reporting Violations.* If the assistant referee determines that a coach, contestant or other team representative is in violation of rules pertaining to unsportsmanlike conduct, control of the mat area or questioning judgment, the assistant referee should notify the violator and the referee when appropriate. The referee shall inform the scorer's table.
- 8.6.8 *Pre-/Postmatch Procedure.* The assistant referee shall check each corner for dress-code violations before a match begins. In addition, the assistant referee shall remain on the mat to observe potential inappropriate conduct by coaches and/or contestants until all participants leave the mat area.

8.7 Match/Meet Timekeeper

The match timekeeper is responsible for the following:

- 8.7.1 Overseeing assistant timekeepers and scorers, constantly checking their activities.
- 8.7.2 Keeping the overall time of the match.
- 8.7.3 Keeping and recording injury-charged timeouts. The time remaining shall be called out at intervals of one minute, 45 seconds and 30 seconds, and counted down from 15 seconds to zero.
- 8.7.4 Notifying the referee of a disagreement among the official scorers or timekeepers, or when requested by the coach to discuss a possible error. The timekeeper should wait until significant action has ceased before notifying the referee, who then will stop the match.
- 8.7.5 Assisting, when requested by the referee, in determining whether a situation occurred before or after the termination of a period.
- 8.7.6 Calling the minutes to the referee, contestants and spectators in each match. The last minute of each period shall be reported at 15-second intervals (45, 30, 15 seconds).
- 8.7.7 The home institution shall provide each timekeeper with a cumulative time clock(s) for recording the time during the match. The match timekeeper shall be provided with two extra cumulative time clocks

for recording time out in case of injury to the contestants. The match timekeeper also shall be provided with a gong, horn or bell. A multiple timer may be used in place of time clocks.

8.7.8 Informing contestants and coaches, when requested, of time advantage accumulated if a visual clock is not available.

8.7.9 Informing the referee when a 15-point differential occurs.

8.8 Assistant Timekeepers

Assistant timekeepers may be assigned and are responsible for the following:

8.8.1 Recording the cumulative time advantage of the contestants to whom they have been assigned (usually opponents) when indicated by the referee.

8.8.2 Constantly checking each other's recording of time advantage.

8.8.3 Constantly checking the match timekeeper's recording of time.

8.8.4 Showing the referee the actual recording of the time advantage each contestant has accumulated at the end of the match.

8.8.5 Stopping time advantage when the referee signals loss of control, illegal interlocking of hands, illegal holds or grasping of clothing.

8.9 Scorers

The scorers are responsible for the following:

8.9.1 Recording points scored by both contestants when signaled by the referee.

8.9.2 Constantly checking each other's scoring.

8.9.3 Keeping the scoreboard operator continually advised of the official score during each match.

8.9.4 Immediately advising the match timekeeper when they are in disagreement regarding the score.

8.9.5 Recording the time advantage at the end of each period.

8.9.6 Recording which contestant has the choice of position at the start of the third period.

8.9.7 Informing the timekeeper and referee when a contestant has exceeded the allotted number of injury timeouts.

- 8.9.8 Informing the timekeeper and referee when a technical fall occurs.
- 8.9.9 Circling the first points scored in the regulation match, excluding escapes and penalty points. It is recommended that a visual method be used to indicate which wrestler scored these first points, thus informing the referee, wrestlers, coaches and spectators as to which wrestler will have the first choice in the tiebreaker period, if necessary. (See Rule 4.10.3.)
- 8.9.10 Recording the time-advantage point, if earned, in the final match score.
- 8.9.11 Showing the referee the scorebook at the end of each match.
- 8.9.12 Recording the time of the fall, technical fall, disqualification or default, both on the match sheet and in the scorebook.
- 8.9.13 Informing the head coach that a team member has been charged with a flagrant misconduct violation and, by rule, disqualified from further competition. (See Rule 6.6.1.)

8.10 Tobacco Use by Match Officials

Match officials, including referees, assistant referees, timekeepers and scorers, are prohibited from using tobacco in the wrestling venue before, during or after a dual meet or tournament. Violations should be reported to the event administrator. (For student-athletes, coaches and other team personnel, see Rule 6.6.3.)

Rules interpretations can be found in the back of this book on the designated page.

- 1) *Responsibility, 8.3, WI-22*

Nos. 1, 2 and 3—FRONT, REAR AND SIDE VIEW OF OFFICIAL UNIFORM. *Front (with 4-inch inseam) and rear view of official shirt. Any shirt with more exposure is illegal. The rear view also shows a wrestler's pinning area.*

No. 4—FRONT AND REAR VIEW OF LEGAL SPANDEX/LYCRA UNIFORM.

No. 5—APPROPRIATE TEAM WARM-UP. *Team uniformity in clothing, to include the school's official warm-up, is required. Shown is an appropriate warm-up suit.*

No. 6—INAPPROPRIATE TEAM WARM-UP UNIFORM. *Inappropriate warm-up suit and headwear are shown.*

No. 7—TOUCH START (sight-handicapped). *Each contestant shall have the fingers of one hand over and the fingers of the other hand under the opponent's fingers. Fingers shall not extend beyond the knuckles.*

No. 8—NEUTRAL STARTING POSITION. *Correct starting position for neutral wrestling. Wrestlers should place lead foot or both feet on their respective, designated starting line.*

Nos. 9 and 10—LEGAL STARTING POSITION. *As required in Rules 2.1.2 and 2.1.3. (Note starting lines, Rule 1.7.)*

No. 11—ILLEGAL OFFENSIVE STARTING POSITION. *The offensive wrestler is not allowed to put a knee or foot on the far side of the defensive wrestler. In this illustration, the offensive wrestler has placed a foot on the far side in the area defined by the arrows, making it a technical violation.*

No. 13—ILLEGAL OPTIONAL OFFENSIVE STARTING POSITION. *Wrestler cannot straddle opponent's body. (2.1.4)*

No. 15—CONTROL. *Control after allowance for reaction time.*

No. 12—LEGAL OPTIONAL OFFENSIVE STARTING POSITION. (2.1.4.)

No. 14—CONTROL. *Control after allowance for reaction time.*

No. 16—CONTROL. *Possible control by controlling the top leg.*

No. 17—ILLEGAL HAMMERLOCK (ABOVE RIGHT ANGLE). *The hammerlock is a legal hold, provided the arm is not bent above the right angle (i.e., provided that the arm is not carried above the small of the back); and provided, further, that the hand is not forced away from the body, making it a twisting hammerlock. In this illustration, the arm is carried distinctly above the right angle and the hold is illegal.*

No. 18—ILLEGAL HAMMERLOCK. *The hammerlock is a legal hold, provided the hand is not forced away from the body. This illustration shows the hand being pulled away from the body, making it an illegal twisting hammerlock.*

No. 19—ILLEGAL HAMMERLOCK. *The arm is forced above a right angle and pulled away from the body; therefore, it is illegal.*

No. 20—ILLEGAL DOUBLE WRISTLOCK ON THE MAT. *Double wristlock turned into a typical twisting hammerlock that will injure opponent's shoulder if the arm is forced upward, unless opponent turns with the pressure, which often the opponent is unable to do to prevent injury to the shoulder, is illegal.*

No. 21—LEGAL DOUBLE WRISTLOCK ON THE MAT. *The double wristlock on the mat is legal if the direction of the force is perpendicular to the long axis of the body.*

No. 22—ILLEGAL KEYLOCK. *An illegal keylock by the offensive wrestler is shown. The keylock is used for punishment and is illegal in any position.*

No. 23—LEGAL FRONT HEADLOCK. *Illustration shows arm alongside of face with arm included.*

No. 24—ILLEGAL FRONT HEADLOCK. *Illegal front headlock without arm included.*

No. 25—ILLEGAL FRONT HEADLOCK. *Illegal front headlock without an arm encircled.*

No. 26—ILLEGAL HEAD SCISSORS. *This straight scissors on the head is illegal.*

No. 28—FIGURE-FOUR HEAD SCISSORS FROM A NEUTRAL POSITION. *This hold, with or without an arm trapped, is a technical violation in the neutral position.*

No. 27—LEGAL HEAD SCISSORS (FIGURE-FOUR HEAD SCISSORS). *In other than the neutral position, the figure-four head scissors is considered legal when applied as shown.*

No. 29—DRAPING HEAD SCISSORS. *Legal as shown because there is minimal pressure against the head or neck.*

No. 30—DRAPING HEAD SCISSORS. *Legal as shown.*

No. 31—ILLEGAL HEAD SCISSORS. *Even with the arm included, this is an illegal head scissors.*

No. 32—FIGURE-FOUR SCISSORS. *This hold around the body or both legs is a technical violation.*

No. 33—OVER-SCISSORS (AN ILLEGAL HOLD). *The over-scissors is barred because it is a punishing hold. Forcing the over-scissors endangers the ankle or the knee of the opponent.*

No. 34—STRAIGHT BODY SCISSORS. *A legal hold.*

No. 35—LEG CRADLE. *This hold, which uses the legs to cradle an opponent, is a legal hold.*

Nos. 36 and 37—ILLEGAL TWISTING KNEE LOCK. *This shows a twisting knee lock. It is an illegal hold (6.8). The referee should anticipate the danger of injury from this hold and be in a position to block it before it reaches the danger point. (See 6.9.)*

No. 38—ILLEGAL TWISTING KNEE LOCK. *Twisting knee-lock pressure against the normal movement of the knee joint as illustrated constitutes an illegal hold.*

No. 39—LEGAL LEG TRAP. *This is legal if heel goes to buttocks and not to side of hip. If top wrestler does not improve position, the top wrestler can be called for stalling.*

Nos. 40 and 41—ILLEGAL TWISTING KNEE LOCK. *Both illustrations show illegal twisting knee lock. The pressure is against the normal movement of the knee joint.*

Nos. 42 through 45—**TAKEDOWNS**. *At the edge of the wrestling area, points shall be awarded when control is established while at least one supporting point or any part of a foot of either wrestler finishes on the mat in bounds.*

Nos. 46 and 47—**TAKEDOWN or REVERSAL AWARDED**.

No. 48—TAKEDOWN. *This is a takedown because a part of a supporting point remains in bounds.*

No. 49—TAKEDOWN. *A takedown shall be awarded when this position is attained beyond reaction time with one or both hands bearing weight.*

Nos. 50 and 51—TAKEDOWN. *The offensive wrestler has stopped the defensive wrestler's crotch-lift roll-through attempts. In these situations, when the defensive wrestler cannot improve the position, a takedown shall be awarded.*

No. 52—OUT OF BOUNDS. *Both feet are outside the wrestling area, breaking the boundary of an imaginary cylinder surrounding the wrestling area.*

No. 53—NO TAKEDOWN. *Top man must have control of both legs before a takedown is awarded in this situation.*

No. 54—WRESTLING CONTINUES. *During takedown attempts, wrestling continues as long as one supporting point of either wrestler remains in bounds.*

Nos. 55 and 56—REVERSAL. *At the edge of the mat, reversal points shall be awarded when control is established while one supporting point or any part of a foot remains down on the mat in bounds.*

No. 57—NEAR FALL. *The shoulder and scapula of the defensive wrestler have broken the plane of the mat area. A near fall or fall may be awarded in this position.*

No. 58—IN BOUNDS. *The shoulder or scapulae of the defensive wrestler are in bounds and a near fall or fall may occur.*

No. 59—LEGAL FOOT (INSTEP) HOLD. *The defensive wrestler may grasp the instep, heel or ankle to try to escape, providing the pressure is not such as to endanger the ankle, knee or hip joint.*

No. 60—TOEHOLD. *This is a potentially dangerous hold.*

Nos. 61 and 62—LEGAL (left) and ILLEGAL (right) FRONT DOUBLE ARM BAR. *Locking hands behind the back in a double arm bar. Note that the double arm bar is legal when hands are locked at side (under armpit).*

No. 63—LEGAL LEG BLOCK. *Defensive wrestlers may use their arm or hand to block the leg and then sit back to take the opponent to the mat.*

No. 64—ILLEGAL LEG BLOCK (cut back). *Defensive wrestlers are not allowed to use their leg in a whip-like fashion to take their opponent back to the mat.*

No. 65—A LEGAL HOLD. *Pulling the head over the shoulder with hands locked or overlapped is legal. This also applies to a bridge-back situation.*

No. 66—THREE-QUARTER NELSON. *A legal hold.*

No. 67—ILLEGAL FULL NELSON. *The top wrestler may not apply a full nelson.*

No. 68—ILLEGAL FULL NELSON. *Even though the hands of the offensive wrestler are not locked or overlapped, this is a full nelson, which is illegal.*

Nos. 69 and 70—NEAR FALL. *In both illustrations above, a near fall can be scored if held for at least two seconds.*

No. 71—NEAR FALL. *A near fall can be scored in a pinning situation if both scapula of the defensive wrestler are held within four inches of the mat for at least two seconds. Note that the elbows of the defensive wrestler are not touching the mat.*

No. 72—NEAR FALL. *Although the defensive wrestler's back is not within 45 degrees, the offensive wrestler has put one of the defensive wrestler's shoulders on the mat and the other within 45 degrees of the mat, and therefore can earn a near fall if held for at least two seconds.*

No. 74—NEAR FALL. *The offensive wrestler is in control and holding the defensive wrestler in a bridge position. A near fall shall be awarded if this position is held for at least two seconds.*

No. 73—NEAR FALL. *The offensive wrestler is in control and holding the defensive wrestler's shoulder to the mat with the other shoulder at an angle of 45 degrees to the mat. A near fall shall be awarded if this position is held for at least two seconds.*

No. 75—NEAR FALL. *Illustration shows defensive wrestler bridging back to break body scissors and cross-body ride. In neither case should the near fall be awarded when the defensive wrestler is in a bridge, unless the defensive wrestler cannot turn out of the bridge when the offensive wrestler starts to assume control of the pinning situation. In cases in which defensive wrestlers initiate a bridge to free themselves from the use of legs, they should be given time to get out of the bridge.*

Nos. 76 and 77—IMMINENT NEAR FALL. *The offensive wrestler may keep “locked-hands” after a body lock or double-leg takedown when there is an imminent near fall. In the situations shown, the offensive wrestler has a body lock or double-leg takedown, has not met a near-fall criterion, and is allowed to keep locked hands while a near fall is imminent.*

Nos. 78 and 79—ILLEGAL OVERHEAD DOUBLE ARM BAR. *This hold is illegal when used as shown above, either with or without the scissors and applied with either one or both arms.*

No. 80—LEGAL GUILLOTINE. *After a near-fall criterion is met, arms can be locked around opponent’s head or neck.*

No. 81—POTENTIALLY DANGEROUS GUILLOTINE. *When applying the guillotine, forcing the arm to the limit of normal range of movement parallel to the long axis of the body is to be interpreted as potentially dangerous.*

No. 82—LEGAL CHICKEN WING. *There is no evidence of illegal pressure or twisting hammerlock; therefore, the hold is legal.*

No. 83—ILLEGAL CHICKEN WING. *Pressure (force) parallel to the long axis, regardless of whether defensive wrestler's hand is in front or back, makes this an illegal hold.*

No. 84—LEGAL ARM BAR. *The pressure is applied between 45 degrees to the long axis of the body or spine. In addition, the far arm of the defensive wrestler is not blocking the ability to turn with the applied pressure.*

No. 85—POTENTIALLY DANGEROUS ARM BAR. *The far arm of the defensive wrestler is preventing him or her from rolling through with the applied pressure.*

Nos. 86 and 87—POTENTIALLY DANGEROUS POWER HALF NELSON. *The defensive wrestler is unable to roll in the direction of the pressure because both the arm and hips of the defensive wrestler are preventing the bottom wrestler from rolling through to relieve the pressure.*

No. 88—ILLEGAL HEAD LOCK. *Locking arms around the head.*

No. 89—LEGAL HEAD PRY. *The top wrestler can use this pry as long as it includes the arm or shoulder.*

No. 90—BLOCKING ON HEAD, CHIN OR SIDE OF FACE IS LEGAL.

No. 91—ILLEGAL BLOCKING ON FACE (ON FACE PROPER). *This form of blocking is illegal because it is over mouth, nose and eyes and restricts breathing and vision, in contrast to position in No. 86.*

No. 92—A LEGAL CROSSFACE. *This hold is an effective and legal block for the double-leg pickup.*

No. 93—INTERLOCKING OF HANDS AROUND LEGS. *This is a technical violation when done by the offensive wrestler.*

No. 94—LEGAL USE OF THE HANDS IN WAIST-LOCK. *This shows the legal use of the hands of the top wrestler. The defensive contestant's supporting parts, except feet, are clearly off the mat.*

No. 95—INTERLOCKING OF HANDS AROUND THE BODY. *A technical violation. Offensive wrestler is not allowed to lock (overlap) hands, fingers, wrists or arms around body while defensive wrestler is supported by parts other than feet.*

No. 96—LEGAL USE OF HANDS IN BODY LOCK. *This complete body lock is legal because defensive wrestler is in a standing position. This hold would be a technical violation if defensive wrestler had one or both knees on the mat.*

No. 97—LEGAL BACK BOW. *This move is legal, provided the pressure is NOT driven within the arrows shown (45 degrees toward the bottom wrestler's right shoulder to straight over the head).*

No. 98—ILLEGAL TWISTING ANKLE LOCK. *The ankle is being twisted beyond its normal limits of movement.*

No. 99—ILLEGAL KNEE LOCK. *The top wrestler has obstructed the normal movement of the knee joint.*

Nos. 100 and 101—ILLEGAL LEG LOCKS. *Leg rides applied by the offensive wrestler that hyperextend the knee beyond its normal limits of movement are illegal.*

No. 102—POSSIBLE STALL, STALEMATE OR POTENTIALLY DANGEROUS. *The defensive wrestler is stalling if he repeatedly stands to cause a stalemate. The top (offensive) wrestler is stalling if he repeatedly applies legs after the defensive (bottom) wrestler is already standing. If neither wrestler can improve this position, a stalemate may be called. If, in the opinion of the referee, this situation becomes unstable, "potentially dangerous" may be called.*

Nos. 103 and 104—LEGAL LEG LOCKS. *Leg rides applied by the offensive wrestler that do not hyperextend the knee are legal.*

No. 105 and 106—INDICATING THE WINNER. *After the contestants properly shake hands, the referee indicates the winner of a match by raising the winner's hand. Note: The losing wrestler is not required to remain in the center of the mat after the hand shake.*

Part II:

INTERPRETATIONS

RULE 1

Meet, Mats, Wrestlers, Uniforms and Equipment

Rule 1.10 Shift in Weight Class

SITUATION: Team A weighs-in two wrestlers at the 125-pound weight class for a dual meet. Team B has no entry at the 141-pound weight class. QUESTION: Can the noncompeting 125-pounder move up and accept a forfeit at the 141-pound weight class without losing certification at 125 pounds? RULING: Yes. In fact, this wrestler could accept a forfeit at a higher weight class with the exception of heavyweight (See 3.1.8 and 3.2) without losing certification at the 125-pound weight class.

Rule 1.11.2 Uniforms and Equipment

SITUATION: Wrestler A fails to secure shoelaces. When wrestling begins, Wrestler A's shoelace becomes untied. The referee correctly calls a delay of match violation against Wrestler A. Once the shoe is tied, Wrestler A goes to the apron of the mat and has a coach or trainer tape the shoelace. QUESTION: Has another violation occurred? RULING: Yes. The referee shall assess an injury timeout to Wrestler A.

Rule 1.11.3 Ear Protection

SITUATION: This rule states that a protective ear guard must be worn any time live wrestling takes place. (This includes practice, dual meets and all collegiate and open tournaments.) QUESTION: Does this rule apply to the warm-up period before dual meets and tournaments? RULING: No. The warm-up period before a dual meet or tournament is not considered live wrestling.

Rule 1.15 Videotaping

SITUATION: Team A is videotaping its match during a **dual meet**. During the 125-pound match, Team B's wrestler is awarded a takedown at the end of the first period. Team A's coach protests that time had expired before the takedown was awarded and asks the referee to check the videotape.

QUESTION: Can videotapes be used to make corrections in match scores, determination of riding time or judgment calls? RULING: No. The use of videotapes to make corrections in a **dual meet** is prohibited.

Rule 1.16 Individual Season Record Form

SITUATION 1: A wrestler plans on red-shirting, but wrestles in several open tournaments at the wrestler's own expense and using his or her own personal equipment. Later, the wrestler's coach changes the wrestler's status regarding red-shirting and the wrestler competes representing the institution. QUESTION: Should these matches in the early-season open tournaments be included on the wrestler's NCAA Individual Season Record Form? RULING: Yes. Once the wrestler officially represents the institution, all of the matches wrestled during the season shall be included on the season record form.

SITUATION 2: At an individual advancement tournament, several participants are eliminated in the early rounds of competition. The coaches of these wrestlers agree to pair the wrestlers together to gain additional competition experience. QUESTION: Should these "extra" matches be recorded on the NCAA Individual Season Record Form if the matches are wrestled separately from the tournament? RULING: Yes, per NCAA Bylaws 17.02 and 17.29.

RULE 2

Definitions

Wrestling Positions

Rule 2.1 Starting Position

SITUATION: The bottom wrestler assumes a referee's position whereby the top wrestler cannot assume a legal starting position on the side of choice. The referee makes the bottom wrestler adjust position. QUESTION: Can the top wrestler now decide to change sides? RULING: No. The top wrestler has indicated the desired side to the referee. After the bottom wrestler is forced to adjust, the top wrestler cannot decide to mount a different side.

Scoring Opportunities

Rule 2.7 Escape

SITUATION 1: Wrestler B is on the bottom and applies an over-hook on Wrestler A. Wrestler B faces Wrestler A and stands up with the over-hook still in. QUESTION: When should an escape be awarded? RULING: Once Wrestler A's hand passes the midline of Wrestler B's back, the referee should award the escape.

SITUATION 2: Wrestler A is riding Wrestler B. Wrestler A moves in front of Wrestler B and applies a front-head-and-arm pinch or a head-and-under-hook tie-up. QUESTION: When should an escape be awarded? RULING: An escape should be awarded only when the referee determines control by Wrestler A is lost. In this situation, Wrestler A still maintains control and is using this position as a possible pinning situation.

SITUATION 3: Wrestler B stands up, gets hand control and begins to run away from Wrestler A. Both wrestlers go out of bounds. When the referee called the wrestlers out, Wrestler B was away from Wrestler A, but was not facing Wrestler A. QUESTION: Since no control was evident when both wrestlers went off the mat, should an escape be awarded? RULING: In order for an escape to be awarded, Wrestler B must be facing Wrestler A before

the whistle or be a considerable distance away, such that Wrestler A has no chance to bring Wrestler B back under control.

SITUATION 4: Wrestler B does a quick sit-out and turns in. Wrestler B is facing Wrestler A. Wrestler A immediately spins behind Wrestler B for control. QUESTION: Was this situation an escape for Wrestler B and a takedown for Wrestler A? RULING: The referee should be aware of reaction time. Wrestler B should be allowed reaction time to counter Wrestler A's moves. This is a subjective call on the part of the referee. The referee must use judgment regarding reaction time and the situation. Although control was lost for an instant, the referee must decide if Wrestler B had the time to react appropriately.

SITUATION 5: Wrestler A assumes an optional offensive start. On the whistle, Wrestler A pushes Wrestler B away, backs up a few feet and jumps back onto Wrestler B. QUESTION: When should an escape be awarded? RULING: An escape is awarded only when Wrestler B faces Wrestler A after totally breaking contact and after proper reaction time has elapsed.

SITUATION 6: Wrestler B attempts to reverse Wrestler A with a switch; however, just before Wrestler B comes on top for a reversal, both wrestlers go out of bounds. It was imminent that Wrestler A would have been reversed and that Wrestler A lost control of Wrestler B. QUESTION: Should a reversal, escape or nothing be awarded? RULING: Because control was lost and no reversal occurred before going out of bounds, the referee should award an escape.

SITUATION 7: Wrestler B comes out from under Wrestler A and immediately drops in for a double leg and lifts the opponent off the mat with control but fails to bring Wrestler A to the mat as the period ends. QUESTION: Does Wrestler B get credit for a reversal? RULING: No. Only one point for the escape should be awarded.

Rule 2.8 Reversal

SITUATION: As Wrestler A, who is the defensive wrestler, stands up and does a standing switch and subsequently grabs Wrestler B's leg up and off the mat in a single-leg position. QUESTION: What is the referee's call? RULING: At this point, no change is made. Wrestler B continues to receive riding time, and no points are awarded. Wrestler A can release Wrestler B's leg and receive one point for an escape, or Wrestler A may retain the single leg and attempt to earn two points for a reversal by putting Wrestler B on

the mat. A single-leg position is not enough control to justify a reversal. An escape cannot be awarded because Wrestler A could put Wrestler B to the mat for two more points for a total of a three-point move. If the period ends or both wrestlers go out of bounds while Wrestler A has Wrestler B's leg up, the referee should award a one-point escape because Wrestler B lost control.

Rule 2.9 Near Fall

SITUATION 1: Wrestler A had Wrestler B in a pinning combination. Before Wrestler A turned Wrestler B into a near-fall situation, the referee stopped the match for a potentially dangerous situation. Wrestler B did not yell in pain or request the move be broken. But once the action was broken, Wrestler B indicated a slight arm injury. QUESTION: Should the referee award a two-point near fall based upon 2.9.4, which states: "When a pinning combination is executed legally but the contestant is injured before a near-fall criterion is met and a near fall is imminent, action will be stopped, an injury timeout assessed and a two-point near fall shall be awarded"? RULING: The purpose of 2.9.4 is to prevent a wrestler from breaking a legal pinning situation by yelling and/or faking an injury to prevent being turned. Therefore, since the referee saw a potentially dangerous situation and decided to break it, no near-fall points should be given. Rule 2.9.4 is not intended to prevent the referee from stopping any action the referee sees as being potentially dangerous. If a move is stopped by the referee with no action taken by the bottom wrestler, points should not be awarded.

SITUATION 2: Wrestler A has Wrestler B in a pinning situation and a near-fall criterion is met, when Wrestler B screams in pain. QUESTION: In this situation, when can a three-point near fall be awarded? RULING: According to 2.9.5, a three-point near fall is awarded when one criterion for a near fall is met before Wrestler B screams.

SITUATION 3: Wrestler A has Wrestler B in a pinning situation and the criteria for a three-point near fall have been met, when Wrestler B screams in pain. QUESTION: Should a three-point near fall be awarded? RULING: No. According to 2.9.6, a four-point near fall is awarded when the criteria for a three-point near fall is met before Wrestler B's scream.

SITUATION 4: Wrestler A uses a Granby roll for a reversal and meets a near-fall criterion, when Wrestler B applies an illegal head scissors. QUESTION: Should the referee stop the match and award the applicable

points? RULING: No. Rule 6.2 states that wrestling may continue even though an illegal hold has been applied, unless stoppage becomes necessary to prevent injury.

Rule 2.10 Imminent Scoring

SITUATION 1: Wrestler A applies a double-leg takedown to Wrestler B. In the act of being taken down, Wrestler B suffers a knee injury. As a result, the injured wrestler's back ends up on the mat after Wrestler B falls. QUESTION: Is there a two-point takedown and a two-point near fall? RULING: The takedown is awarded, but back points are not. The back points are not awarded because there was no pinning combination and the near fall was not imminent.

SITUATION 2: Wrestler A applies a legal standing headlock on Wrestler B and takes Wrestler B directly to Wrestler B's back. While going down, Wrestler B indicates an injury. QUESTION: Should a two-point takedown and a two-point near fall be awarded? RULING: Yes. The takedown and near fall should be awarded.

End of Match

Rule 2.12 Fall

SITUATION 1: Wrestler A is pinning Wrestler B. Both wrestlers are in bounds except for Wrestler B's head and shoulders. QUESTION: Can Wrestler B get pinned in this situation? RULING: Yes. If any part of Wrestler B's pinning area is touching the mat in bounds for one second, Wrestler B is pinned.

SITUATION 2: Wrestler A has the opponent in a pinning situation. The referee calls a fall by slapping the mat; however, before the referee's hand hits the mat, the buzzer sounds to end the period. The referee could not hear the buzzer. QUESTION: What procedure should the referee follow? RULING: Rule 2.12.6 states that if the referee cannot determine that a fall has occurred before the period ends because of crowd noise or other circumstances, the assistant referee shall be consulted. If there is no assistant or if the assistant referee is in doubt, the referee shall ask the match timekeeper whether the referee's signal hand hit the mat before the period ended.

Rule 2.13 Technical Fall

SITUATION 1: Wrestler A is leading Wrestler B, 13-0. Wrestler A puts Wrestler B on Wrestler B's back and a fall is imminent. The referee starts the near-fall hand count and counts at least two seconds. QUESTION: If the referee is aware of the score, should the referee stop the match and award a technical fall? RULING: No. In a pinning situation, wrestling continues until the pinning situation actually has ended, which gives Wrestler A the possibility of pinning Wrestler B. QUESTION: If Wrestler B quickly reversed and pinned Wrestler A, what is the ruling? RULING: Because Wrestler A has earned near-fall points, any action beyond the pinning situation, except for flagrant misconduct by Wrestler A, is disregarded and Wrestler A would win the match by a technical fall.

SITUATION 2: Wrestler A, who is winning by 14 points, has Wrestler B in a pinning situation and has earned but has not been awarded a three-point near fall. Wrestler A is pinned while still trying to pin Wrestler B. QUESTION: Does Wrestler A win by technical fall or does Wrestler B win by a fall? RULING: Wrestler A wins by a technical fall. Wrestler A has earned a 15-point differential and can lose only by committing an act of flagrant misconduct.

SITUATION 3: Wrestler A is winning by 12 points and has earned a three-point near fall, but the period and match end with Wrestler B still in a pinning situation. Wrestler B has riding time. QUESTION: Since the three-point near fall was not awarded before the end of the match, does Wrestler A win by technical fall? RULING: No. Since the match ended before the awarding of the three-point near fall, riding time was awarded at the same time as the near fall. This means the differential was 14 points.

SITUATION 4: Wrestler A leads by 12 points and places Wrestler B in a pinning position. Wrestler A has earned, but has not been awarded, three near-fall points. Wrestler A commits a technical violation or uses an illegal hold. QUESTION: Should the referee penalize Wrestler A and continue wrestling, or has Wrestler A earned a technical fall? RULING: Wrestler A has scored a technical fall. According to Rule 2.13, a wrestler earning a differential of 15 points can lose only by committing an act of flagrant misconduct.

SITUATION 5: Wrestler A is leading Wrestler B, 26-12, without scoring a near fall. Wrestler A takes Wrestler B down to the mat, meeting a near-fall

criterion. After a consecutive three-count by the referee, the period ends. A technical fall has been earned. QUESTION: In a dual meet, would the technical fall be scored as four or five points? Similarly, in tournament competition, would the technical fall be scored as 1 or 1½ points? RULING: Wrestler A's team shall be awarded five points for the technical fall in a dual meet and 1½ points in a tournament. The final score shall be 30-12.

Rule 2.16 Default

SITUATION: Wrestler A is injured and wants to default to the next opponent and still continue to be eligible for competition. QUESTION: What is the correct procedure? RULING: In order for this wrestler to default to the next opponent, the match must officially begin and time elapse from the clock. *Note: It is not the intent of a default to be used for this purpose.*

RULE 3

Weight Certification, Classification and Weighing in

Rule 3.1 Establishing a Weight Class

SITUATION: Wrestler A's weight-loss plan form indicates that he or she can safely reach his or her lowest certified weight class of 149 pounds no earlier than November 20. Wrestler A enters an open tournament November 18, unattached, pays all expenses and does not use institutional wrestling equipment, weighs in at 149 pounds and competes. QUESTION: Do weight-management guidelines permit Wrestler A to wrestle 149 pounds before the date established by the weight-loss plan, even if Wrestler A does so on his or her own without institutional assistance? RULING: No. All rostered student-athletes must comply with all weight-management regulations. In addition, Wrestler A may be penalized for a weight-management violation. (See 3.1.10.)

Rule 3.1.2 Procedures for Two Certifications

SITUATION: A freshman wrestler appearing on an institutional squad list for the first time is required to complete both section one and two of the NCAA Weight-Certification Program. QUESTION: When must the mandated section two test be completed? RULING: The second certification cannot take place before the date indicated on the NCAA Weight-Loss Plan form. In addition, the second certification, which includes the hydration test, must be successfully completed before the student-athlete may wrestle at the established certified weight. If the student-athlete fails the test or elects to delay testing, the second certification must be successfully completed no later than the December date established by rule. (See 3.1.2, 3.1.4, 3.1.5.) A failed hydration test may not be repeated for 24 hours.

Rule 3.4.2 Weighing In

SITUATION 1: Team A wrestles Team B at 7 p.m. Both teams compete earlier that day, Team A at noon and Team B at 1 p.m. QUESTION: At what time will the weigh-in take place? RULING: All teams shall weigh-in one hour before the starting time of the first match of the day. In this situation, the weigh-ins shall take place at 11 a.m.

SITUATION 2: At the time of the weigh-in, Wrestler A is still working out in order to make weight. QUESTION: Can Wrestler A elect to bypass the weight class and weigh-in at the conclusion of the heavyweight class? RULING: No. All contestants are required to weigh-in with his or her respective weight class. No weight-loss activities are permitted once weigh-ins begin.

SITUATION 3: For a dual meet, Wrestler A weighs-in at 141 pounds, but is slightly overweight. QUESTION: Is it permissible for Wrestler A to weigh-in again after the heavyweight class in an attempt to make weight? RULING: No. However, Wrestler A may step on and off the scale three times at the time of the weigh-in to assure the scale has been properly zeroed and/or allow for mechanical inconsistencies in the scale.

SITUATION 4: Wrestler A fails to make weight at 125 pounds and chooses not to wrestle at a higher weight class. QUESTION: Is it permissible for Wrestler A to make weight and wrestle at 125 pounds for a future contest? RULING: Yes, as long as the future contest is not connected to the contest in which the wrestler failed to make weight (i.e., duals or tournaments requiring multiple weigh-ins).

SITUATION 5: A wrestler has been competing at 141 pounds. For the next competition, the wrestler weighs-in at 149 but does not wrestle. QUESTION: Can the wrestler return to 141 pounds for the next competition? RULING: No. Furthermore, 149 pounds has become the wrestler's new certified weight class.

Rule 3.9 Medical Checks

SITUATION: At medical checks held the day before tournament competition, a student-athlete is suspected of having a communicable skin disease and requires further examination. The student-athlete provides documentation as required by rule stating the diagnosis, culture results (if available), dates and times therapy began, and the exact name(s) of medication given for

treatment. QUESTION: What options does a medical examiner have in this situation? RULING: Based on the information available, the medical professional may delay final judgment as to disqualification until the next morning, after the examination and before the beginning of tournament competition, to make a final judgment.

RULE 4

Conduct of Meets and Tournaments

Rule 4.9 Postmatch Procedures

SITUATION: The match ends, and Wrestler A lifts Wrestler B into the air and brings Wrestler B to the mat with unnecessary force after the whistle has blown. QUESTION: Can the referee include illegal-slam penalty points in the match score, since the slam occurred after the third period ended? RULING: Yes. Since the wrestler was in the process of completing a takedown attempt, it should be considered as having occurred during the match. This situation might be considered unsportsmanlike conduct or flagrant misconduct, if the referee deems Wrestler A's action to be out of disgust or with the intent to injure Wrestler B.

Rule 4.10 Choice of Position

SITUATION: Wrestler A has choice at the end of the first period. Wrestler A selects the top position, and the referee tells Wrestler B to take the bottom position. Wrestler A's coach tells Wrestler A to choose bottom. QUESTION: How long does Wrestler A have to change choice of position? RULING: For consistency and to avoid delaying the match, once the wrestler with the choice verbally decides and the referee confirms this with the wrestler to prevent misunderstanding, the wrestler cannot change choice of position.

Rule 4.11.2 Overtimes

SITUATION 1: During the tiebreaker period(s), the offensive wrestler applies a hold meant to prevent the defensive wrestler from escaping by locking both arms around the lower leg. QUESTION: Should the referee call a stalemate or stalling? RULING: The referee shall call the tiebreaker period(s) in the same manner as he or she would the regulation match or sudden-victory period.

SITUATION 2: The first period ends with neither wrestler able to score (0-0). Wrestler A rides the entire second period accumulating two minutes of

advantage time. In the third period, Wrestler A selects the bottom position and escapes immediately. With the escape, Wrestler A leads, 1-0. With six seconds remaining, Wrestler B secures a takedown. The regulation match ends with the score 2-1 in favor of Wrestler B. The referee goes to the table and awards Wrestler A one point for advantage time. The score is now tied, 2-2. QUESTION: Which wrestler will have the choice of position in the first tiebreaker period? RULING: Wrestler B. The takedown resulted in the first offensive points scored in the match. Advantage time, although earned, can not be awarded until the conclusion of the regulation match.

SITUATION 3: The regulation match ends with both wrestlers having identical scores and no offensive points scored. QUESTION: When is the determination made as to which wrestler will have the choice in the first tiebreaker period? RULING: The determination will be made at the completion of the sudden-victory period and before the beginning of the first tiebreaker period by the tossing of the referee's disk.

Rule 4.13 Control of Mat Area

SITUATION 1: The referee is asked to come to the scorer's table at the request of Coach B. The referee instructs the wrestlers to remain in the center of the mat. Wrestler A walks to the edge of the mat to talk to A's coach. QUESTION: What is the ruling? RULING: The coach of Wrestler A would be in violation of control of mat area and therefore would be penalized according to Rule 4.13.4.

SITUATION 2: Team A has been warned twice and penalized once for control of mat area. A situation occurs in which the head coach and the assistant coach approach the table and begin a confrontation with the referee. The referee penalizes Team A according to Rule 4.13.4. QUESTION: This being Team A's fourth infraction, whom does the referee remove from the premises? RULING: The referee will remove the head coach.

Rule 4.15 Questioning the Referee

SITUATION: In a tournament, Team A has been warned twice and penalized once. The assistant coach begins badgering and arguing with the referee. The referee penalizes Team A according to Rule 4.13.4. QUESTION: Whom does the referee remove from the premises and for how long? RULING: The referee removes the last person penalized, who in this case was the assistant coach, for the duration of the tournament.

Tournaments

Rule 4.16 Tournament Committee

SITUATION: Wrestler A fails to report to the specified mat within five minutes after being called by the tournament announcer. QUESTION: How is the original time reference established? RULING: A tournament official will direct the announcer to start the first match of each round, and the announcer then will call the wrestlers to the first available mat. If the wrestlers do not report to the designated mat upon being called by the announcer, the head timer will start the five-minute count.

Rule 4.23 Medical Forfeit

SITUATION 1: Both competitors wrestling for fifth and sixth places in a tournament are forced, due to injury, to declare a medical forfeit. QUESTION: Which place, fifth or sixth, should each wrestler be awarded? RULING: Each competitor will be awarded sixth place. The placement points for fifth and sixth shall be equally divided between the two wrestlers.

SITUATION 2: A participant becomes ill or is injured during tournament competition and is granted a medical forfeit. QUESTION: Wishing to retain advancement and placement points earned during the tournament, must the wrestler weigh-in on a subsequent day(s)? RULING: No. The contestant who forfeits for medical reasons is eliminated from further competition and need not weigh-in.

RULE 6

Infractions

Rule 6.6.1 Flagrant Misconduct

SITUATION: The referee raises Wrestler A's hand at the end of the match. Wrestler A subsequently punches Wrestler B, and the referee calls flagrant misconduct. QUESTION: What is the penalty and what effect does it have on the match? RULING: Flagrant misconduct by the winner during the post-match period shall result in Wrestler A being disqualified, the deduction of one team point, the removal of the disqualified contestant from the premises and Wrestler B being declared the winner. A contestant so disqualified in a tournament is not entitled to placement points or an individual tournament award, nor will that contestant be credited with advancement and fall points earned before the incident. Further, the contestant shall be suspended from the team's next date of competition. (See Rules 4.9.2 and 6.6.)

Technical Violations

Rule 6.10 Stalling

RULING: The basic intent of 6.10.3 is to assure that both wrestlers are making an honest attempt to wrestle near the center of the mat. At the same time, the rule is not intended to punish a wrestler for moving to set up the opponent and to get out of a tie-up; however, the repeated movement away from the opponent without attempting a takedown is stalling. Therefore, if a wrestler repeatedly backs out of the center with no obvious reason other than to avoid contact, that wrestler is stalling. Backing out of the center to avoid an under-hook or body lock is not stalling as long as the defensive counter is followed with an offensive attack. Moving away from the center of the mat is not stalling as long as movement is followed by an offensive attack.

SITUATION 1: Wrestler A has legs on Wrestler B. Wrestler B stands up with the legs still on. The referee stops the match for a stalemate. Wrestler A again applies the legs on Wrestler B while on the mat. Wrestler B again stands up. QUESTION: Who should be called for stalling? RULING:

Wrestler B should be called for stalling for repeatedly standing up to break a legal move.

SITUATION 2: The defensive wrestler stands and controls the offensive wrestler's hands. The offensive wrestler attempts to bring the defensive wrestler to the mat, but is unable to do so. QUESTION: Should the offensive wrestler be called for stalling? RULING: The offensive wrestler shall not be called for stalling in this situation because the offensive wrestler is aggressively attempting to improve and return the defensive wrestler to the mat.

Rule 6.11 Interlocking Hands

SITUATION 1: Wrestler A is being reversed by Wrestler B. During the reversal, Wrestler A locks hands. The referee signals locked hands and allows the match to continue. Wrestler B continues with the reversal, but Wrestler A immediately comes back with another reversal and subsequently pins Wrestler B. QUESTIONS: Should the match have been stopped after Wrestler B reversed Wrestler A? Does Wrestler A's fall stand since there was a technical violation involved before the fall? RULING: The fall stands. Rule 6.11.2 states that if the defensive wrestler is successful with the escape or reversal, the match shall not be stopped to award points.

SITUATION 2: Wrestler A is injured by a technical violation (e.g., locked hands or figure-four body scissors) and cannot continue the match. QUESTION: Does Wrestler A win the match because of the illegal action of Wrestler B? RULING: No. If Wrestler A cannot continue, Wrestler A will default the match to Wrestler B. Technical violations are separate from illegal holds. Illegal holds generally have the potential to injure an opponent, whereas a technical violation, in most situations, does not; however, if a technical violation is executed with the intent to injure an opponent, the referee can call flagrant misconduct instead of a technical violation.

SITUATION 3: Wrestler A is on the bottom, stands up and turns into Wrestler B. Wrestler B's knees are on the mat and are supporting him. Wrestler B locks hands around both legs of Wrestler A in a double-leg situation with no loss of control. Wrestler B then lifts Wrestler A, brings Wrestler A to the mat, unlocks hands and moves up. QUESTION: Should Wrestler B be called for locked hands? RULING: The wrestler in the advantage position could lock hands once the bottom wrestler's weight is supported entirely by both

feet. Once the wrestler brings the opponent to the mat, the wrestler with the advantage has reaction time to break the grip.

SITUATION 4: The offensive wrestler applies a bear hug on the defensive wrestler, who is in a sitting position facing the offensive wrestler. After the bear hug is applied, the offensive wrestler attempts to pin the opponent.

QUESTION: Is this considered a technical violation for locked hands?

RULING: Locking hands around the body by the offensive wrestler while in a control position on the mat is a technical violation. In a control position, a wrestler cannot lock hands around the opponent and then take the opponent to a pinning situation. Once a near-fall criterion has been met, it is permissible to lock hands.

SITUATION 5: From a neutral position, Wrestler A applies a bear hug to Wrestler B and takes him directly to his back, nearly meeting a near-fall criterion. **QUESTION:** Can Wrestler A keep locked hands after a bodylock takedown when there is an imminent near fall?

RULING: A wrestler may keep locked hands after a bodylock takedown when there is an imminent near fall. The referee shall verbally alert the wrestlers if a near fall is imminent by saying “imminent,” which indicates whether the offensive wrestler may keep locked hands. If and when the referee says “not imminent,” the offensive wrestler shall be given reaction time to release his lock. Note that a bear hug is considered a bodylock.

Rule 6.12 Figure-Four Scissors

QUESTION: When does a leg scissors turn into a figure four around the body or both legs? **RULING:** When the foot is placed directly behind the knee (where the knee bends). The foot at the calf or lower is not a figure four.

Rules 6.17 and 6.18 False Starts and Incorrect Starting Positions

RULING: False starts and incorrect starting positions have been separated from the sequence of penalties in the Penalty Table. For example, this prevents a wrestler from being disqualified for having a foot off the starting line by one inch. This gives the referee some flexibility. Although false starts were separated from the incorrect starting positions, the penalties were not. Example: A wrestler false-starts twice, and cautions are awarded. If the wrestler repeatedly assumes an incorrect starting position, the referee

would then penalize the wrestler one point. The wrestler already has cautions for a false start.

RULE 7

Injuries and Timeouts

Rule 7.1 Timeout

QUESTION: What state of readiness should the wrestler assume at the completion of injury time? **RULING:** At the completion of the 1½ minutes of injury time, the injured wrestler should be prepared to rise and move to the center of the mat to restart the match.

SITUATION 1: A wrestler is injured. After being attended to, the wrestler returns to the center of the mat with the intent of continuing to wrestle. The referee has indicated that the injury-time clock be stopped. The wrestler has used one minute of injury time. The referee questions the injured wrestler's ability to continue. **QUESTION:** How does the referee use an official timeout to have the wrestler examined by medical personnel for consultation? **RULING:** As indicated in Rule 7.1.7, the official timeout is to be used in this situation only after the wrestler has used the entire 1½ minutes of injury time. In this situation, the referee would indicate that the wrestler's injury time be restarted and would call for examination by medical personnel. If the remainder of the wrestler's injury time is used and the medical examination has not been completed, the referee will use a referee's timeout at this point.

SITUATION 2: A second nonbleeding injury timeout is taken by Wrestler A between the end of the third period and the beginning of the sudden-victory period. Rule 7.1.1 states that Wrestler B will have the choice of any one of the three starting positions at the beginning of the sudden-victory period. Wrestler B chooses the top position and rides Wrestler A for the entire one-minute sudden victory period. **QUESTION:** Does Wrestler B win the match? **RULING:** No. Advantage time will not be used in any sudden-victory period. (See Rule 4.11.1.)

SITUATION 3: Wrestler A takes a second nonbleeding timeout between the first and second tiebreaker periods. Wrestler B has had the choice of positions in the first tiebreaker period. QUESTION: Does Wrestler B have the choice again as Wrestler A has taken a second nonbleeding timeout? RULING: Yes.

Rule 7.3 Match-Ending Injury

SITUATION: Wrestler A receives a neck injury. The referee will not allow Wrestler A to continue until receiving a physician's or certified athletic trainer's approval. Both are in the arena; however, it is obvious that neither one will reach the mat area to grant approval before the 1½ minutes of injury time expire. QUESTION: Does Wrestler B win by default? RULING: Once the injured wrestler claims to be recovered, the referee may take an official timeout until the physician or certified athletic trainer has time to evaluate the injured wrestler (within a reasonable amount of time).

RULE 8

Officials

Rule 8.3 Responsibility

SITUATION: During a match in a tournament, the referee and assistant referee are at the table with their backs to the wrestlers, who are at the center of the mat. One wrestler commits an unsportsmanlike act that is observed by a tournament referee not involved in the match. QUESTION: What should the nonworking referee do? RULING: Similar to the proper mechanics used by an assistant referee, the nonworking referee shall inform the referee who is in control of the match, who shall render a decision. According to Rule 8.3, the match referee is responsible for the match, but other referees involved with the competition can offer assistance and report violations.

Appendix A

Tournament Protest Protocol

- a. Coach informs the table scorer of his intent to protest. The protesting coach must declare his intention to protest before the match sheet leaves the table.
- b. The table scorer informs the head table who informs the announcer that a protest has been filed.
- c. The table scorer informs both the match referee and the assistant referee that the protesting coach has filed a protest.
- d. The match referee informs the non-protesting coach that a protest has been filed.
- e. The protest committee chair goes to the scorer's table to inform both coaches of the Misconduct Bylaw (31.1.10 in Division I and 31.1.8 in Divisions II and III).
- f. The protest committee chair informs the protesting coach that he has 10 minutes to provide a written account of the protest situation and pay the required fee. The written protest must include the specific rule being protested.
- g. A three-person committee, composed of the protest committee chair, the secretary-rules editor and the national coordinator of officials, reads the protest and listens to a verbal explanation of the protest to ensure understanding of the protest situation. The three-person committee determines if the protested situation is valid. This determination is made matside. Majority vote carries the decision. If the protested situation is deemed valid of further review, it is referred to the protest committee.
- h. If the protest situation is referred to the protest committee, the protest committee chair or his designee directs the scorer, all mat table personnel, the match referee and the assistant referee to be available if needed for a protest hearing.

- i. The protest committee chair or his designee decides whether to release the mat for continued wrestling.
- j. Once the protest committee has reached its conclusion, the protest committee chair informs 1) the protesting coach; 2) the non-protesting coach; 3) all mat personnel (referee, assistant referee and the table scorer); and 4) the head table who informs the announcer.

Appendix B

Blood-Borne Pathogens

April 1988 • Revised August 2004

Blood-borne pathogens are disease-causing microorganisms that can be potentially transmitted through blood contact. The blood-borne pathogens of concern include (but are not limited to) the hepatitis B virus (HBV) and the human immunodeficiency virus (HIV). Infections with these (HBV, HIV) viruses have increased throughout the last decade among all portions of the general population. These diseases have potential for catastrophic health consequences. Knowledge and awareness of appropriate preventive strategies are essential for all members of society, including student-athletes.

The particular blood-borne pathogens HBV and HIV are transmitted through sexual contact (heterosexual and homosexual), direct contact with infected blood or blood components, and perinatally from mother to baby. In addition, behaviors such as body piercing and tattoos may place student-athletes at some increased risk for contracting HBV, HIV or Hepatitis C.

The emphasis for the student-athlete and the athletics health-care team should be placed predominately on education and concern about these traditional routes of transmission from behaviors off the athletics field. Experts have concurred that the risk of transmission on the athletics field is minimal.

Hepatitis B Virus (HBV)

HBV is a blood-borne pathogen that can cause infection of the liver. Many of those infected will have no symptoms or a mild flu-like illness. One-third will have severe hepatitis, which will cause the death of one percent of that group. Approximately 300,000 cases of acute HBV infection occur in the United States every year, mostly in adults.

Five to 10 percent of acutely infected adults become chronically infected with the virus (HBV carriers). Currently in the United States there are

approximately one million chronic carriers. Chronic complications of HBV infection include cirrhosis of the liver and liver cancer.

Individuals at the greatest risk for becoming infected include those practicing risky behaviors of having unprotected sexual intercourse or sharing intravenous (IV) needles in any form. There is also evidence that household contacts with chronic HBV carriers can lead to infection without having had sexual intercourse or sharing of IV needles. These rare instances probably occur when the virus is transmitted through unrecognized-wound or mucous-membrane exposure.

The incidence of HBV in student-athletes is presumably low, but those participating in risky behavior off the athletics field have an increased likelihood of infection (just as in the case of HIV). An effective vaccine to prevent HBV is available and recommended for all college students by the American College Health Association. Numerous other groups have recognized the potential benefits of universal vaccination of the entire adolescent and young-adult population.

HIV (AIDS Virus)

The Acquired Immunodeficiency Syndrome (AIDS) is caused by the human immunodeficiency virus (HIV), which infects cells of the immune system and other tissues, such as the brain. Some of those infected with HIV will remain asymptomatic for many years. Others will more rapidly develop manifestations of HIV disease (i.e., AIDS). Some experts believe virtually all persons infected with HIV eventually will develop AIDS and that AIDS is uniformly fatal. In the United States, adolescents are at special risk for HIV infection. This age group is one of the fastest growing groups of new HIV infections. Approximately 14 percent of all new HIV infections occur in persons aged between 12 to 24 years. The risk of infection is increased by having unprotected sexual intercourse, and the sharing of IV needles in any form. Like HBV, there is evidence that suggests that HIV has been transmitted in household-contact settings without sexual contact or IV needle sharing among those household contacts^{5,6}. Similar to HBV, these rare instances probably occurred through unrecognized wound or mucous membrane exposure.

Comparison of HBV/HIV

Hepatitis B is a much more “sturdy/durable” virus than HIV and is much more concentrated in blood. HBV has a much more likely transmission with exposure to infected blood; particularly parenteral (needle-stick) exposure, but also exposure to open wounds and mucous membranes. There has been one well-documented case of transmission of HBV in the athletics setting, among sumo wrestlers in Japan. There are no validated cases of HIV transmission in the athletics setting. The risk of transmission for either HBV or HIV on the field is considered minimal; however, most experts agree that the specific epidemiologic and biologic characteristics of the HBV virus make it a realistic concern for transmission in sports with sustained close physical contact, such as wrestling. HBV is considered to have a potentially higher risk of transmission than HIV.

Testing of Student-Athletes

Routine mandatory testing of student-athletes for either HBV or HIV for participation purposes is not recommended. Individuals who desire voluntary testing based on personal reasons and risk factors, however, should be assisted in obtaining such services by appropriate campus or public-health officials.

Student-athletes who engage in high-risk behavior are encouraged to seek counseling and testing. Knowledge of one's HBV and HIV infection is helpful for a variety of reasons, including the availability of potentially effective therapy for asymptomatic patients, and modification of behavior, which can prevent transmission of the virus to others. Appropriate counseling regarding exercise and sports participation also can be accomplished.

Participation by the Student-Athlete with Hepatitis B (HBV) Infection

Individual's Health—In general, acute HBV should be viewed just as other viral infections. Decisions regarding ability to play are made according to clinical signs and symptoms, such as fatigue or fever. There is no evidence that intense, highly competitive training is a problem for the asymptomatic HBV carrier (acute or chronic) without evidence of organ impairment. Therefore, the simple presence of HBV infection does not mandate removal from play.

Disease Transmission—The student-athlete with either acute or chronic HBV infection presents very limited risk of disease transmission in most sports. However, the HBV carrier presents a more distinct transmission risk than the HIV carrier (see previous discussion of comparison of HBV to HIV) in sports with higher potential for blood exposure and sustained close body contact. Within the NCAA, wrestling is the sport that best fits this description.

The specific epidemiologic and biologic characteristics of hepatitis B virus form the basis for the following recommendation: If a student-athlete develops acute HBV illness, it is prudent to consider removal of the individual from combative, sustained close-contact sports (e.g., wrestling) until loss of infectivity is known. (The best marker for infectivity is the HBV antigen, which may persist up to 20 weeks in the acute stage.) Student-athletes in such sports who develop chronic HBV infections (especially those who are e-antigen positive) should probably be removed from competition indefinitely, due to the small but realistic risk of transmitting HBV to other student-athletes.

Participation of the Student-Athlete with HIV

Individual's Health—In general, the decision to allow an HIV positive student-athlete to participate in intercollegiate athletics should be made on the basis of the individual's health status. If the student-athlete is asymptomatic and without evidence of deficiencies in immunologic function, then the presence of HIV infection in and of itself does not mandate removal from play.

The team physician must be knowledgeable in the issues surrounding the management of HIV-infected student-athletes. HIV must be recognized as a potentially chronic disease, frequently affording the affected individual many years of excellent health and productive life during its natural history. During this period of preserved health, the team physician may be involved in a series of complex issues surrounding the advisability of continued exercise and athletics competition.

The decision to advise continued athletics competition should involve the student-athlete, the student-athlete's personal physician and the team physician. Variables to be considered in reaching the decision include the student-athlete's current state of health and the status of his/her HIV infection, the nature and intensity of his/her training, and potential contribution of stress from athletics competition to deterioration of his/her health status.

There is no evidence that exercise and training of moderate intensity is harmful to the health of HIV-infected individuals. What little data that exists on the effects

of intense training on the HIV-infected individual demonstrates no evidence of health risk. However, there is no data looking at the effects of long-term intense training and competition at an elite, highly competitive level on the health of the HIV-infected student-athlete.

Disease Transmission—Concerns of transmission in athletics revolve around exposure to contaminated blood through open wounds or mucous membranes. Precise risk of such transmission is impossible to calculate but epidemiologic and biologic evidence suggests that it is extremely low. (See section on comparison of HBV/HIV.) There have been no validated reports of transmission of HIV in the athletics setting^{3,13}. Therefore, there is no recommended restriction of student-athletes merely because they are infected with HIV, although one court has upheld the exclusion of an HIV-positive athlete from the contact sport of karate¹⁹.

Administrative Issues

The identity of individuals infected with a blood-borne pathogen must remain confidential. Only those persons in whom the infected student-athlete chooses to confide have a right to know about this aspect of the student-athlete's medical history. This confidentiality must be respected in every case and at all times by all college officials, including coaches, unless the student-athlete chooses to make the fact public.

Athletics Health-Care Responsibilities

The following recommendations are designed to further minimize risk of blood-borne pathogens and other potentially infectious organisms transmission in the context of athletics events and to provide treatment guidelines for caregivers. In the past, these guidelines were referred to as "Universal (blood and body fluid) Precautions." Over time, the recognition of "Body Substance Isolation," or that infectious diseases may also be transmitted from moist body substances, has led to a blending of terms now referred to as "Standard Precautions." Standard precautions apply to blood, body fluids, secretions and excretions except sweat, regardless of whether or not they contain visible blood. These guidelines, originally developed for health-care, have additions or modifications relevant to athletics. They are divided into two sections—the care of the student-athlete, and cleaning and disinfection of environmental surfaces.

Care of the Athlete:

1. All personnel involved in sports who care for injured or bleeding student-athletes should be properly trained in first aid and standard precautions.
2. Assemble and maintain equipment and/or supplies for treating injured/bleeding athletes. Items may include: Personal Protective Equipment (PPE) [minimal protection includes gloves, goggles, mask, fluid-resistant gown if chance of splash or splatter]; antiseptics; antimicrobial wipes; bandages or dressings; medical equipment needed for treatment; appropriately labeled “sharps” container for disposal of needles, syringes scalpels; and waste receptacles appropriate for soiled equipment, uniforms, towels and other waste.
3. Pre-event preparation includes proper care for wounds, abrasions or cuts that may serve as a source of bleeding or as a port of entry for blood-borne pathogens or other potentially infectious organisms. These wounds should be covered with an occlusive dressing that will withstand the demands of competition. Likewise, care providers with healing wounds or dermatitis should have these areas adequately covered to prevent transmission to or from a participant. Student-athletes may be advised to wear more protective equipment on high-risk areas, such as elbows and hands.
4. The necessary equipment and/or supplies important for compliance with standard precautions should be available to caregivers. These supplies include appropriate gloves, disinfectant bleach, antiseptics, designated receptacles for soiled equipment and uniforms, bandages and/or dressings, and a container for appropriate disposal of needles, syringes or scalpels.
5. When a student-athlete is bleeding, the bleeding must be stopped and the open wound covered with a dressing sturdy enough to withstand the demands of activity before the student-athlete may continue participation in practice or competition. Current NCAA policy mandates the immediate, aggressive treatment of open wounds or skin lesions that are deemed potential risks for transmission of disease. Participants with active bleeding should be removed from the event as soon as is practical. Return to play is determined by appropriate medical staff personnel and/or sport officials. Any participant whose uniform is saturated with blood must change their uniform before return to participation.

6. During an event, early recognition of uncontrolled bleeding is the responsibility of officials, student-athletes, coaches and medical personnel. In particular, student-athletes should be aware of their responsibility to report a bleeding wound to the proper medical personnel.
7. Personnel managing an acute blood exposure must follow the guidelines for standard precaution. Gloves and other PPE, if necessary, should be worn for direct contact with blood or other body fluids. Gloves should be changed after treating each individual participant. After removing gloves, hands should be washed.
8. If blood or body fluids are transferred from an injured or bleeding student-athlete to the intact skin of another athlete, the event must be stopped, the skin cleaned with antimicrobial wipes to remove gross contaminate, and the athlete instructed to wash with soap and water as soon as possible. NOTE: Chemical germicides intended for use on environmental surfaces should never be used on student-athletes.
9. Any needles, syringes or scalpels should be carefully disposed of in an appropriately labeled “sharps” container. Medical equipment, bandages, dressings and other waste should be disposed of according to facility protocol. During events, uniforms or other contaminated linens should be disposed of in a designated container to prevent contamination of other items or personnel. At the end of competition, the linen should be laundered and dried according to facility protocol; hot water at temperatures of 71°C (160°F) for 25- minute cycles may be used.

Care of Environmental Surfaces:

1. All individuals responsible for cleaning and disinfection of blood spills or other potentially infectious materials (OPIM) should be properly trained on procedures and the use of standard precautions.
2. Assemble and maintain supplies for cleaning and disinfection of hard surfaces contaminated by blood or OPIM. Items include: Personal Protective Equipment (PPE) [gloves, goggles, mask, fluid-resistant gown if chance of splash or splatter]; supply of absorbent paper towels or disposable cloths; red plastic bag with the biohazard symbol on it or other waste receptacle according to facility protocol; and properly diluted tuberculocidal disinfectant or freshly prepared bleach solution diluted (1:10 bleach/water ratio).

3. Put on disposable gloves.
4. Remove visible organic material by covering with paper towels or disposable cloths. Place soiled towels or cloths in red bag or other waste receptacle according to facility protocol. (Use additional towels or cloths to remove as much organic material as possible from the surface and place in the waste receptacle.)
5. Spray the surface with a properly diluted chemical germicide used according to manufacturer's label recommendations for disinfection, and wipe clean. Place soiled towels in waste receptacle.
6. Spray the surface with either a properly diluted tuberculocidal chemical germicide or a freshly prepared bleach solution diluted 1:10, and follow manufacturer's label directions for disinfection; wipe clean. Place towels in waste receptacle.
7. Remove gloves and wash hands.
8. Dispose of waste according to facility protocol.

Final Notes:

1. All personnel responsible for caring for bleeding individuals should be encouraged to obtain a Hepatitis B (HBV) vaccination.
2. Latex allergies should be considered. Non-latex gloves may be used for treating student-athletes and the cleaning and disinfection of environmental surfaces.
3. Occupational Safety and Health Administration (OSHA) standards for Bloodborne Pathogens (Standard #29 CFR 1910.1030) and Hazard Communication (Standard #29 CFR 1910.1200) should be reviewed for further information.

Member institutions should ensure that policies exist for orientation and education of all health-care workers on the prevention and transmission of blood-borne pathogens. Additionally, in 1992, the Occupational Safety and Health Administration (OSHA) developed a standard directed to eliminating or minimizing occupational exposure to blood-borne pathogens. Many of the recommendations included in this guideline are part of the standard. Each member institution should determine the applicability of the OSHA standard to its personnel and facilities.

Appendix C

Weight Loss— Hypohydration

Sport-Specific Introduction: Competitive wrestling can generate approximately 15 kilocalories of heat each minute; practice sessions can average over 600 kilocalories per hour. Additional heat can come from the environment if the wrestling room is too hot. Complete evaporation of one liter of sweat removes 580 kilocalories of heat. To maintain thermal equilibrium, a wrestler, or any athlete, needs to evaporate more than one liter (about one quart) of sweat for each hour of practice. Maintenance of body fluids is essential if sweating is to be maintained. This means that athletes must hydrate before, during and after practice.

One method to estimate replacement fluid requirements is to weigh athletes before and after practice. For each pound of weight loss, one should replace the lost weight with one pint of extra fluid.

Athletes should limit caffeine in coffee and colas since caffeine increases fluid loss in the urine. Alcoholic drinks, which interfere with rehydration by increasing urine production, also should be avoided.

Athletes themselves can assess their hydration level by observing the volume, color and concentration of their urine. Low volumes of dark, concentrated urine indicate a serious need for rehydration. Other signs of dehydration include a rapid resting or working heart rate, weakness, excessive fatigue and dizziness.

Dehydration

July 1985 • Revised June 2002

There are two general types of weight loss common to student-athletes who participate in intercollegiate sports: loss of body water or loss of body weight (fat and lean tissue). Dehydration, the loss of body water, leads to a state of negative water balance called dehydration. It is brought about by withholding fluids and carbohydrates, the promotion of extensive sweating

and the use of emetics, diuretics or laxatives. The problem is most evident in those who must be certified to participate in a given weight class, but it also is present in other athletics groups.

There is no valid reason for subjecting the student-athlete's body to intentional dehydration, which can lead to a variety of adverse physiological effects, including significant pathology and even death. Dehydration in excess of 3 to 5 percent leads to reduced strength and muscular endurance, reduced plasma and blood volume, compromised cardiac output (elevated heart rate, smaller stroke volume), impaired thermoregulation, decreased kidney blood flow and filtration, reduced liver glycogen stores, and loss of electrolytes. Pathological responses include life-threatening heat illness, rhabdomyolysis (severe muscle breakdown), kidney failure and cardiac arrest.

With extensive dehydration, attempts at acute rehydration usually are insufficient for body fluid and electrolyte homeostasis to be restored before competition. For example, in wrestling this is especially true between the official weigh-in and actual competition.

All respected sports medicine authorities and organizations have condemned the practice of fluid deprivation. To promote sound practices, student-athletes and coaches should be educated about the physiological and pathological consequences of dehydration. The use of laxatives, emetics and diuretics should be prohibited. Similarly, the use of excessive food and fluid restriction, self-induced vomiting, vapor-impermeable suits (e.g., rubber or rubberized nylon), hot rooms, hot boxes and steam rooms should be prohibited. Excessive food restriction or self-induced vomiting may be symptoms of serious eating disorders. (See Guideline 2f.)

Note: This is a general guideline that is not specific to wrestling. For the rules regarding these practices and substances in wrestling, see Rule 3.5 in the main body of this book.

Dehydration is a potential health hazard that acts with poor nutrition and intense exercise to compromise health and athletic performance. The sensible alternative to dehydration weight loss involves: preseason determination of an acceptable (minimum) competitive weight, gradual weight loss to achieve the desired weight, and maintenance of the weight over the course of the competitive season. Standard body composition procedures should be utilized to determine the appropriate competitive weight. Spot checks (body

composition or dehydration) should be used to assure compliance with the weight standard during the season.

Student-athletes and coaches should be informed of the health consequences of dehydration, educated in proper weight-loss procedures, and subject to disciplinary action when approved rules are violated.

Appendix D

Skin Infections

July 1981 • Revised June 2007

Data from the NCAA Injury Surveillance System (ISS) indicate that skin infections are associated with at least 10 percent of the time-loss injuries in wrestling. It is recommended that qualified personnel, including a knowledgeable, experienced physician, examine the skin of all wrestlers before any participation.

Male student-athletes shall wear shorts and female student-athletes shall wear shorts and a sports bra during examinations.

Open wounds and infectious skin conditions that cannot be adequately protected should be considered cause for medical disqualification from practice or competition. The term “adequately protected” means that the wound or skin condition has been deemed as non-infectious and adequately medicated as per treatment criteria listed under Guidelines for Disposition of Skin Infections and is able to be covered by a securely attached bandage made of nonpermeable material that will withstand the rigors of competition. (See WA-15.)

Medical Examinations

Medical examinations must be conducted by knowledgeable physicians and/or certified athletic trainers. The presence of an experienced dermatologist is recommended. The examination should be conducted in a systematic fashion so that more than one examiner can evaluate problem cases. Provisions should be made for appropriate lighting and the necessary facilities to confirm and diagnose skin infections.

Wrestlers who are undergoing treatment for a communicable skin disease at the time of the meet or tournament shall provide written documentation to that effect from a physician. This documentation should include the wrestler’s diagnosis, culture results (if possible), date and time therapy began, and the exact names of medication for treatment. The status of these individuals should be decided before the screening of the entire group. The

decision made by a physician and/or certified athletic trainer “on site” shall be considered FINAL.

Guidelines for Disposition of Skin Infections

Unless a new diagnosis occurs at the time of the medical examination conducted at the meet or tournament, the student-athlete shall provide a letter from the team physician documenting clinical diagnosis, lab and/or culture results, if relevant, and an outline of treatment to date (i.e., duration, frequency, dosages of medication).

BACTERIAL INFECTIONS (Furuncles, Carbuncles, Folliculitis, Impetigo, Cellulitis or Erysipelas, Staphylococcal disease)

1. Wrestler must have been without any new skin lesion for 48 hours before the meet or tournament.
2. Wrestler must have completed 72 hours of antibiotic therapy and have no moist, exudative or draining lesions at meet or tournament time.
3. Gram stain of exudate from questionable lesions (if available).
4. Active bacterial infections shall not be covered to allow participation. See above criteria when making decisions for participation status.

Note: An antibiotic resistant form of Staphylococcus aureus known as Methicillin-resistant Staphylococcus aureus (MRSA) is moving from acute care settings out into the community. Outbreaks have been documented in wrestling, football and fencing.

HIDRADENITIS SUPPURATIVA

1. Wrestler will be disqualified if extensive or purulent draining lesions are present.
2. Extensive or purulent draining lesions shall not be covered to allow participation.

PEDICULOSIS

Wrestler must be treated with appropriate pediculicide and re-examined for completeness of response before wrestling.

SCABIES

Wrestler must have negative scabies prep at meet or tournament time.

HERPES SIMPLEX

Primary Infection

1. Wrestler must be free of systemic symptoms of viral infection (fever, malaise, etc.).
2. Wrestler must have developed no new blisters for 72 hours before the examination.
3. Wrestler must have no moist lesions; all lesions must be dried and surmounted by a FIRM ADHERENT CRUST.
4. Wrestler must have been on appropriate dosage of systemic antiviral therapy for at least 120 hours before and at the time of the meet or tournament.
5. Active herpetic infections shall not be covered to allow participation. See above criteria when making decisions for participation status.

Recurrent infection

1. Blisters must be completely dry and covered by a FIRM ADHERENT CRUST at time of competition, or wrestler shall not participate.
2. Wrestler must have been on appropriate dosage of systemic antiviral therapy for at least 120 hours before and at the time of the meet or tournament.
3. Active herpetic infections shall not be covered to allow participation. See above criteria when making decisions for participation status.

Questionable Cases

1. Tzanck prep and/or HSV antigen assay (if available).
2. Wrestler's status deferred until Tzanck prep and/or HSV assay results complete.

Wrestlers with a history of recurrent herpes labialis or herpes gladiatorum should be considered for season-long prophylaxis with Zovirax (acyclovir) or Valtrex. This decision should be made after consultation with the wrestling team physician.

HERPES ZOSTER (chicken pox)

Skin lesions must be surmounted by a FIRM ADHERENT CRUST at meet or tournament time, and have no evidence of secondary bacterial infection.

MOLLUSCUM CONTAGIOSUM

1. Lesions must be curetted or removed before the meet or tournament.
2. Solitary or localized, clustered lesions can be covered with a gas-permeable membrane such as Op-Site or Bioclusive, followed by ProWrap and stretch tape.

VERRUCAE

1. Wrestlers with multiple digitate verrucae of their face will be disqualified if the infected areas cannot be covered with a mask. Solitary or scattered lesions can be curetted away before the meet or tournament.
2. Wrestlers with multiple verrucae plana or verrucae vulgaris must have the lesions “adequately covered.”

TINEA INFECTIONS (ringworm)

1. A minimum of 72 hours of topical therapy is required for skin lesions. The topical antifungals terbinafine or naftifine (Lamisil or Naftin) are suggested for treatment.
2. A minimum of two weeks of systemic antifungal therapy is required for scalp lesions.
3. Wrestlers with extensive and active lesions will be disqualified. Activity of treated lesions can be judged either by use of KOH preparation or a review of therapeutic regimen. Wrestlers with solitary, or closely clustered, localized lesions will be disqualified if lesions are in a body location that cannot be “adequately covered.” Covering routine should include selenium sulfide washing of lesion or ketoconazole shampoo (Nizoral), followed by application of naftifine gel or cream (Naftin) or terbinafine cream (Lamisil), then gas-permeable dressing such as Op-site or Bioclusive, followed by ProWrap and stretch tape. Dressing changes should be done after each match so that lesion can air dry.
4. The disposition of tinea cases will be decided on an individual basis as determined by the examining physician and/or certified athletic trainer.

Skin infections may be transmitted by both direct (person to person) and indirect (person to inanimate surface to person) contact. Infection control measures, or measures that seek to prevent the spread of disease, should be utilized to reduce the risks of disease transmission. Efforts should be made to improve wrestler hygiene practices, to utilize recommended procedures for cleaning and disinfection of surfaces, and to handle blood and other bodily fluids appropriately. Suggested measures include: promotion of hand hygiene practices; educating athletes not to pick, squeeze, or scratch skin lesions; encouraging athletes to shower after activity; educating athletes not to share protective gear, towels, razors or water bottles; ensuring recommended procedures for cleaning and disinfection of wrestling mats, all athletic equipment, locker rooms, and whirlpool tubs are closely followed; and verifying clean up of blood and other potentially infectious materials is done, according to the Occupational Health and Safety Administration (OSHA) Blood-borne Pathogens Standard #29 CFR 1910.1030.

Appendix E

Nutritional Ergogenic Aids

Dietary Supplements and Banned Substances

January 1990 • Revised June 2004

Nutritional and dietary supplements are marketed to student-athletes to improve performance, recovery time and muscle-building capability. Many student-athletes use nutritional supplements despite the lack of proof of effectiveness. In addition, such substances are expensive and may potentially be harmful to health or performance. Of greater concern is the lack of regulation and safety in the manufacture of dietary supplements. Many compounds obtained from specialty “nutrition” stores and mail-order businesses may not be subject to the strict regulations set by the United States Food and Drug Administration. Therefore, the contents of many of these compounds are not represented accurately on the list of ingredients and may contain impurities or banned substances, which may cause a student-athlete to test positive. Positive drug-test appeals based on the claim that the student-athletes did not know the substances they were taking contained banned drugs have not been successful. Therefore, student-athletes should be instructed to consult with the university’s sports medicine staff before taking ANY nutritional supplement.

It is well known that a high-carbohydrate diet is associated with improved performance and enhanced ability to train. The carbohydrate content of the diet should be 55 to 65 percent of total energy intake (about 5 to 10 gm/kg body weight). The lower end of the range should be ingested during regular training; the high end during intense training. High-carbohydrate foods and beverages can provide the necessary amount of carbohydrate for the high caloric demand of most sports to optimize performance. Low-carbohydrate diets are not advantageous for athletes during intense training and may not enhance performance. A high-carbohydrate diet consisting of complex

carbohydrates, fruits, vegetables, low-fat dairy products and whole grains (along with adequate protein) is the optimal diet for peak performance.

Protein and amino acid supplements are popular with bodybuilders and strength-training student-athletes. Although protein is needed to repair and build muscles after strenuous training, most studies have shown that student-athletes ingest a sufficient amount without supplements. The recommended amount of protein in the diet should be 12 to 15 percent of total energy intake (about 1.4 to 1.6 gm/kg of body weight) for all types of student-athletes. Although selected amino acid supplements are purported to increase the production of anabolic hormones, studies using manufacturer-recommended amounts have not found increases in growth hormone or muscle mass. Ingesting high amounts of single amino acids is contraindicated because they can affect the absorption of other essential amino acids, produce nausea, and/or impair kidney function and hydration status. A supplement which contains greater than 30 percent of calories from protein is not a permissible substance for distribution according to current NCAA rules.

Other commonly advertised supplements are vitamins and minerals. Most scientific evidence shows that selected vitamins and minerals will not enhance performance provided no deficiency exists. Some vitamins and minerals are marketed to student-athletes for other benefits. For example, the antioxidants, vitamin E, C and beta-carotene are used by many student-athletes because they believe that these antioxidants will protect them from the damaging effects of aerobic exercise. Although such exercise can cause muscle damage, studies have found that training will increase the body's natural antioxidant defense system so that megadoses of antioxidants may not be needed. The mineral chromium has been suggested to increase muscle mass and decrease fat, but studies have not substantiated this claim. Similarly, magnesium is purported, but not proven, to prevent cramps. To obtain necessary vitamins and minerals, student-athletes should eat a wide variety of foods because not all vitamins and minerals are found in every food.

Other substances naturally occurring in foods, such as carnitine, herbal extracts and special enzyme formulations, do not provide any benefit to performance. The high-protein diet has received recent attention, but data showing that this diet will enhance performance are weak, plus there is

concern that such a diet will negatively affect health. Creatine has been found in some laboratory studies to enhance short-term, high-intensity exercise capability, delay fatigue on repeated bouts of such exercise and increase strength. Several studies have contradicted these claims, and, moreover, the safety of creatine supplements has not been verified. Weight gains of one to three kilograms per week have been found in creatine users, but the cause is unclear.

Many other “high-tech” nutritional or dietary supplements may seem to be effective at first, but this is likely a placebo effect—if student-athletes believe these substances will enhance performance, they may train harder or work more efficiently. Ultimately, most nutritional supplements are ineffective, costly and unnecessary.

Student-athletes should be aware that nutritional supplements are not limited to pills and powders; “energy” drinks that contain stimulants are popular. Many of these contain large amounts of either caffeine or other stimulants, both of which can result in a positive drug test. Student-athletes should be wary of drinks that promise an “energy boost,” because they may contain banned stimulants. In addition, the use of stimulants while exercising can increase the risk of heat illness.

Student-athletes should be provided accurate and sound information on nutritional supplements. It is not worth risking eligibility for products that have not been scientifically proven to improve performance and may contain banned substances. Given the above information and consistent with NCAA Bylaw 16.5.2 (Nutritional Supplements), which states, “An institution may provide only nonmuscle-building nutritional supplements to a student-athlete at any time for the purpose of providing additional calories and electrolytes, provided the supplements do not contain any NCAA banned substances,” athletics staff should not distribute or endorse nutritional or dietary supplements.

The NCAA subscribes to the Resource Exchange Center (REC), which provides a confidential hotline and Web site to answer questions from student-athletes and athletics personnel on whether nutritional supplements and medications contain banned substances. This service is free of charge to all member institutions. To access the REC, go to www.drugfreesport.com/rec. The password is ncaa1, ncaa2, or ncaa3, depending on your divisional classification.

Appendix F

Prevention of Heat Illness

Sport-Specific Introduction: Any time physical work is performed, the majority of the energy produced is in the form of heat; therefore, the body must be proficient at dissipating heat. The use of hot rooms and rubber suits is completely contrary to this principle.

Rule 3, Weight Certification, Classification and Weighing-In, has been written to minimize the incentive to attempt rapid weight loss.

June 1975 • Revised June 2002

Practice or competition in hot and/or humid environmental conditions poses special problems for student-athletes. Heat stress and resulting heat illness is a primary concern in these conditions. Although deaths from heat illness are rare, constant surveillance and education are necessary to prevent heat-related problems. The following practices should be observed:

1. An initial complete medical history and physical evaluation, followed by the completion of a yearly health-status questionnaire before practice begins, should be required. A history of previous heat illness, and the type and duration of training activities for the previous month, also are essential.
2. Prevention of heat illness begins with aerobic conditioning, which provides partial acclimatization to the heat. Student-athletes should gradually increase exposure to hot and/or humid environmental conditions over a period of seven to 10 days to achieve heat acclimatization. Each exposure should involve a gradual increase in the intensity and duration of exercise until the exercise is comparable to that likely to occur in competition. When conditions are extreme, training or competition should be held during a cooler time of day. Hydration should be maintained during training and acclimatization.
3. Clothing and protective equipment such as helmets, shoulder pads, and shin guards increase heat stress by interfering with the evaporation of sweat and inhibiting other pathways for heat loss. Dark-colored clothing increases

the body's absorption of solar radiation. Frequent rest periods should be scheduled so that the gear and clothing can be loosened to allow heat loss. During the acclimatization process, it may be advisable to use a minimum of protective gear and clothing and to practice in T-shirts, shorts, socks and shoes. Excessive tape and outer clothing that restrict sweat evaporation should be avoided. Rubberized suits should never be used.

4. To identify heat stress conditions, regular measurements of environmental conditions are recommended. Use the ambient temperature and humidity to assess heat stress. (See Figure 1.) Utilize the wet-bulb temperature, dry-bulb temperature and globe temperature to assess the potential impact of humidity, air temperature and solar radiation. A wet-bulb temperature higher than 75 degrees Fahrenheit (24 degrees Celsius) or humidity above 90 percent may represent dangerous conditions, especially if the sun is shining or the student-athletes are not acclimatized. A wet-bulb globe temperature (WBGT) higher than 82 degrees Fahrenheit (28 degrees Celsius) suggests that careful control of all activity be undertaken. The value for caution may need to be adjusted down when wearing protective equipment. (See reference No. 6.)
5. Dehydration must be avoided not only because it hinders performance, but also because it can result in profound heat illness. Fluid replacement must be readily available. Student-athletes should be encouraged to drink as much and as frequently as comfort allows. They should drink one to two cups of water in the hour before practice or competition, and continue drinking during activity (every 15 to 20 minutes). For activity up to two hours in duration, most weight loss represents water loss, and that fluid loss should be replaced as soon as possible. After activity, the student-athlete should rehydrate with a volume that exceeds the amount lost during the activity. A two-pound weight loss represents approximately one quart of fluid loss. Urine volume and color can be used to assess general hydration. If output is plentiful and the color is "pale yellow or straw-colored" the student-athlete is not dehydrated.

Water and carbohydrate/electrolyte drinks are appropriate for exercise in heat. Carbohydrate/ electrolyte drinks enhance fluid intake, and the electrolytes aid in the retention of fluid. In addition, the carbohydrates provide energy and help maintain immune and cognitive function.

6. By recording the body weight of each student-athlete before and after workout or practice, progressive dehydration or loss of body fluids can be detected, and the potential harmful effects of dehydration can be avoided.

Those who lose five percent of their body weight or more over a period of several days should be evaluated medically and their activity restricted until rehydration has occurred.

7. Some student-athletes may be more susceptible to heat illness. Susceptible individuals include those with: inadequate acclimatization or aerobic fitness, excess body fat, a history of heat illness, a febrile condition, inadequate rehydration, and those who regularly push themselves to capacity. Also, substances with a diuretic effect or that act as stimulants may increase risk of heat illness. These substances may be found in some prescription and over-the-counter drugs, nutritional supplements and foods.

Student-athletes should be informed of and monitored for signs of heat illness such as: cessation of sweating, weakness, cramping, rapid and weak pulse, pale or flushed skin, excessive fatigue, nausea, unsteadiness, disturbance of vision and incoherency. If heat illness is suspected, prompt emergency treatment is recommended. When training in hot and/or humid conditions, student-athletes should train with a partner or be under observation by a coach or athletic trainer.

First aid for heat illness

Heat exhaustion—Symptoms usually include profound weakness and exhaustion, and often dizziness, syncope, muscle cramps and nausea. Heat exhaustion is a form of shock due to depletion of body fluids. First aid should include rest in a cool, shaded environment. Fluids should be given orally. A physician should determine the need for electrolytes and additional medical care. Although rapid recovery is not unusual, student-athletes suffering from heat exhaustion should not be allowed to practice or compete for the remainder of that day.

Heatstroke—Heatstroke is a medical emergency. Medical care must be obtained at once; a delay in treatment can be fatal. This condition is characterized by a very high body temperature and usually (but not always) hot, dry skin, which indicates failure of the primary temperature-regulating mechanism (sweating), and possibly seizure or coma. First aid includes immediate cooling of the body without causing the student-athlete to shiver. Recommended methods for cooling include using ice, immersion in cold water, or wetting the body and fanning vigorously. Victims of heatstroke should be hospitalized and monitored carefully.

Appendix G

Assessment of Body Composition

June 1991 • Revised June 2002

The NCAA Committee on Competitive Safeguards and Medical Aspects of Sports acknowledges the significant input of Dr. Dan Benardot, Georgia State University, who authored a revision of this guideline.

Athletic performance is, to a great degree, dependent on the ability of the student-athlete to overcome resistance and to sustain aerobic and/or anaerobic power. Both of these elements of performance have important training and nutritional components and are, to a large degree, influenced by the student-athlete's body composition. Coupled with the common perception of many student-athletes who compete in sports where appearance is a concern (swimming, diving, gymnastics, skating, etc.), attainment of an 'ideal' body composition often becomes a central theme of training.

Successful student-athletes achieve a body composition that is within a range associated with performance achievement in their specific sport. Each sport has different norms for the muscle and fat levels associated with a given height, and the student-athlete's natural genetic predisposition for a certain body composition may encourage them to participate in a particular sport or take a specific position within a sport. For instance, linemen on football teams have different responsibilities than receivers, and this difference is manifested in physiques that are also different.

Besides the aesthetic and performance reasons for wanting to achieve an optimal body composition, there may also be safety reasons. A student-athlete who is carrying excess weight may be more prone to injury when performing difficult skills than the student-athlete with a more optimal body composition. However, the means student-athletes often use in an attempt to achieve an optimal body composition may be counterproductive. Diets and excessive training often result in such a severe energy deficit that, while total weight may be reduced, the constituents of weight also change,

commonly with a lower muscle mass and a relatively higher fat mass. The resulting higher body fat percentage and lower muscle mass inevitably results in a performance reduction that motivates the student-athlete to follow regimens that produce even greater energy deficits. This downward energy intake spiral may be the precursor to eating disorders that place the student-athlete at serious health risk. Therefore, while achieving an optimal body composition is useful for high-level athletic performance, the processes student-athletes often use to attain an optimal body composition may reduce athletic performance, may place them at a higher injury risk and may increase health risks.

Purpose of Body Composition Assessment

The purpose of body composition assessment is to determine the student-athlete's distribution of lean (muscle) mass and fat mass. A high lean mass to fat mass ratio is often synonymous with a high strength to weight ratio, which is typically associated with athletic success. However, there is no single ideal body composition for all student-athletes in all sports. Each sport has a range of lean mass and fat mass associated with it, and each student-athlete in a sport has an individual range that is ideal for them. Student-athletes who try to achieve an arbitrary body composition that is not right for them are likely to place themselves at health risk and will not achieve the performance benefits they seek. Therefore, a key to body composition assessment is the establishment of an acceptable range of lean and fat mass for the individual student-athlete, and the monitoring of lean and fat mass over regular time intervals to assure a stability or growth of the lean mass and a proportional maintenance or reduction of the fat mass. Importantly, there should be just as much attention given to changes in lean mass (both in weight of lean mass and proportion of lean mass) as the attention traditionally given to body fat percent.

In the absence of published standards for a sport, one strategy for determining if a student-athlete is within the body composition standards for the sport is to obtain a body fat percent value for each student-athlete on a team (using the same method of assessment), and obtaining an average and standard deviation for body fat percent for the team. Student-athletes who are within 1 standard deviation (i.e., a Z-score of ± 1) of the team mean should be considered within the range for the sport. Those greater than or less than ± 1 standard deviation should be evaluated to determine the

appropriateness of their training schedule and nutrient intake. In addition, it is important for coaches and student-athletes to use functional performance measures in determining the appropriateness of a student-athlete's body composition. Student-athletes outside the normal range of body fat percent for the sport may have achieved an optimal body composition for their genetic makeup, and may have objective performance measures (i.e., such as jump height) that are well within the range of others on the team.

Body composition can be measured indirectly by several methods, including hydrostatic weighing, skinfold and girth measurements (applied to a nomogram or prediction equation), bioelectrical impedance analysis (BIA), dual-energy x-ray absorptiometry (DEXA), ultrasound, computerized tomography, magnetic-resonance imagery, isotope dilution, neutron-activation analysis, potassium-40 counting, and infrared interactance. The most common of the methods now used to assess body composition in student-athletes are skinfold measurements, DEXA, hydrostatic weighing and BIA. While hydrostatic weighing and DEXA are considered by many to be the "gold standards" of the indirect measurement techniques, there are still questions regarding the validity of these techniques when applied to humans. Since skinfold-based prediction equations typically use hydrostatic weighing or DEXA as the criterion methods, results from skinfolds typically carry the prediction errors of the criterion methods plus the added measurement errors associated with obtaining skinfold values. BIA has become popular because of its non-invasiveness and speed of measurement, but results from this technique are influenced by hydration state. Since student-athletes have hydration states that are in constant flux, BIA results may be misleading unless strict hydration protocols are followed. In general, all of the commonly used techniques should be viewed as providing only estimates of body composition, and since these techniques use different theoretical assumptions in their prediction of body composition, values obtained from one technique should not be compared with values obtained from another technique.

Concerns with Body Composition Assessment

1. *Using Weight as a Marker of Body Composition*—While the collection of weight data is a necessary adjunct to body composition assessment, by itself weight may be a misleading value. For instance, young student-athletes have the expectation of growth and increasing

weight, so gradual increases in weight should not be interpreted as a body composition problem. A student-athlete who has increased resistance training to improve strength may also have a higher weight, but since this increased weight is likely to result from more muscle, this should be viewed as a positive change. The important consideration for weight is that it can be (and often is) misused as a measure of body composition, and this misuse can detract from the purpose of body composition assessment.

2. *Comparing Body Composition Values with Other Athletes*—Student-athletes often compare body composition values with other student-athletes, but this comparison is not meaningful and it may drive a student-athlete to change body composition in a way that negatively impacts both performance and health. Health professionals involved in obtaining body composition data should be sensitive to the confidentiality of this information, and explain to each student-athlete that differences in height, age, and gender are likely to result in differences in body composition, without necessarily any differences in performance. Strategies for achieving this include:
 - Obtaining body composition values with only one student-athlete at a time, to limit the chance that the data will be shared.
 - Giving student-athletes information on body composition using phrases such as “within the desirable range,” rather than a raw value, such as saying “your body fat level is 18 percent.”
 - Providing athletes with information on how they have changed between assessments, rather than offering the current value.
 - Increasing the focus on muscle mass, and decreasing the focus on body fat.
 - Using body composition values as a means of helping to explain changes in objectively measured performance outcomes.
3. *Seeking an Arbitrarily Low Level of Body Fat*—Most student-athletes would like their body fat level to be as low as possible. However, student-athletes often try to seek a body fat level that is arbitrarily low and this can increase the frequency of illness, increase the risk of injury, lengthen the time the student-athlete can return to training after an injury, reduce performance and increase the risk of an eating

disorder. Body composition values should be thought of as numbers on a continuum that are usual for a sport. If a student-athlete falls anywhere on that continuum, it is likely that factors other than body composition (training, skills acquisition, etc.) will be the major predictors of performance success.

4. *Frequency of Body Composition Assessment*—Student-athletes who have frequent weight and/or skinfolds taken are fearful of the outcome, since the results are often (inappropriately) used punitively. Real changes in body composition occur slowly, so there is little need to assess student-athletes weekly, biweekly or even monthly. If body composition measurements are sufficient and agreed upon by all parties, measurement frequency of twice a year should be sufficient. In some isolated circumstances in which a student-athlete has been injured or is suffering from a disease state, it is reasonable for a physician to recommend a more frequent assessment rate to control for changes in lean mass. Student-athletes and/or coaches who desire more frequent body composition or weight measurement should shift their focus to assessments of objective performance-related measures.

Summary

The assessment of body composition can be a useful tool in helping the student-athlete and coach understand the changes that are occurring as a result of training and nutritional factors. However, the body composition measurement process and the values obtained can be a sensitive issue for the student-athlete. A legitimate purpose for body composition assessment should dictate the use of these measurement techniques. Health professionals involved in obtaining body composition data should focus on using the same technique with the same prediction equations to derive valid comparative data over time. Institutions should have a protocol in place outlining the rationale for body composition measurements, who is allowed to measure the student-athlete, who is permitted to discuss the results with the student-athlete and what frequency of body composition measurement is appropriate. The student-athlete should not feel forced or obligated to undergo body composition or weight measurement.

Everyone involved directly or indirectly with body composition measurement should understand that inappropriate measurement and use of

body composition data might contribute to the student-athlete experiencing unhealthy emotional stress. This stress can lead to the development or enhancement of eating disorders in the student-athlete. (See Guideline 2f.) All coaches (sport or strength/conditioning) should be aware of the sizable influence they may have on the behaviors and actions of their student-athletes. Many student-athletes are sensitive about body fat, so care should be taken to apply body composition measurement, when appropriate, in a way that enhances the student-athlete's well-being.

Appendix H

Weight-Certification Procedures

The NCAA Wrestling Committee and the NCAA Committee on Competitive Safeguards and Medical Aspects of Sports (CSMAS) have provided this information to assist those individuals who will perform the wrestling weight certification.

In order to protect and ensure the integrity of the wrestling weight-management medical assessment data, the CSMAS requires that an assessor perform the assessment and submit the data in the National Wrestling Coaches Association (NWCA) Optimal Performance Calculator (OPC) program at <http://www.nwcaonline.com>. **The assessor shall be a member of the institution's athletics medical staff**, (e.g., physician, certified athletic trainer or registered dietician). Coaches will have read-only access during the official certification process; however, head coaches will be required to confirm the information entered by the assessor as correct within 48 hours.

Coaches will have access to a separate preseason weight-management assessment portal to estimate 1) a student-athlete's estimated lowest allowable weight class and 2) the first date they may compete at that weight class as determined by the student-athlete's weight-loss plan. This portal has been developed for coaches as an educational and informational tool and is NOT the official weight-certification assessment.

Head coaches' and athletic trainers' OPC login ID and password will be included in a mailing from the NWCA office. The NCAA national office and the NCAA Wrestling Committee have approved the mailings.

Before the assessor may enter any Section I certification information and before a coach may use the preseason educational portal, each institution is required to have entered the current year's first day of practice, the team's competition schedule and the complete team roster in the roster-management page in the OPC system.

Student-athletes not competing in a fall sport may have their initial weight assessment not sooner than the first official day of classes in the fall semester, trimester or quarter and not later than the first official practice (144-day calendar in Divisions I and II, and 19 weeks in Division III per NCAA Bylaw 17). During the initial weight assessment, a wrestler's minimum wrestling weight class for the season will be determined.

In addition, it is mandatory that the NCAA Official Weigh-In form, generated by the NWCA Web site, be used for all competition. Please note, hosts of all individual-advancement tournaments, including preseason open tournaments, must record and retain a copy of the NCAA Official Weigh-In forms.

Sections I and II of the NCAA Weight-Certification Program and the Weight-Loss Plan are assessible by the NCAA Weight-Management Program liaison. Each institution shall retain a copy of all NCAA Weight-Certification Program forms for their files. DO NOT mail copies of Section I, Section II or the Weight-Loss Plan forms to the NCAA national office.

SECTION ONE: Initial Assessment to Determine Minimum Wrestling Weight—Institutions are required to enter the student-athlete's minimum wrestling weight assessment forms (Section I) on or before the first official practice (144-day calendar in Divisions I and II and 19-weeks in Division II per NCAA Bylaw 17). Should a student-athlete join the team after the first official practice, the individual's Section I form shall be completed before he or she begins practice.

Those student-athletes only required to complete Section I of the NCAA Weight-Certification Program have the option of weighing-in and competing only at the next higher weight class while modifying his or her weight, until reaching their lowest certified weight class, not later than December 16. It should be noted that a student-athlete shall not weigh-in more than one weight class above his or her lowest allowable weight class as determined by their weight-loss plan, without forfeiting the right to proceed to their minimum certified weight.

If a student-athlete joins the team after December 16 and he or she has been tested by an NCAA member institution through the NCAA Weight-Certification Program in a previous year, the institution shall perform a single certification by completing the Section I form prior to his or her first practice. A Weight-Loss Plan form will be created for the wrestler

after completion of the Section I form. A student-athlete reporting after December 16 does not have the option of modifying his or her weight until reaching their desired certified weight class.

LOWEST ALLOWABLE WEIGHT-ONE [LAW1]

Step No. 1. Determine Hydrated Weight (BW). In order to obtain an accurate body composition, the student-athlete must be in a hydrated state. Urine specific gravity has been selected as the most practical, cost-efficient measure of hydration.

Record date of test and have wrestler provide a witnessed urine sample.

A same gender member of the institution's athletics medical staff, (e.g., physician, certified athletic trainer or registered dietician) shall be required to visually witness the student-athlete produce a urine sample. The student-athlete must deliver the sample directly to the witness who ensures its delivery to the medical professional whose responsibility it is to determine body hydration.

Check urine sample for specific gravity using refractometer (gold standard) or urometer to provide a valid specific gravity value. [Test strips are no longer a permissible measuring device for specific gravity.]

If specific gravity is greater than 1.020, the wrestler must return no earlier than 24 hours in a hydrated state for a retest.

If specific gravity is less than or equal to 1.020, the wrestler's initial hydrated body weight is recorded to the nearest tenth of a pound (no rounding).

Step No. 2. Calculate Body Density (BD). Body density may be calculated by either (a) skin-fold measurement with calipers approved by medical personnel; (b) underwater weighing with a direct measure of residual volume; or (c) Bod Pod analysis.

Option A: Skin-Folds

- Measure in serial order, (e.g., triceps, subscapular, abdomen, repeat series two more times).
- Add median values for triceps, subscapular and abdominal skin-folds to get SUM SF, the sum of skin-folds.
- Median skin-fold measurement is:

- a. The middle (quantity, not space) value, if there are three distinct values, (e.g., 13mm, 11mm, 12mm. Median = 12mm); and
 - b. The duplicate value, if two or all three measurements are identical, (e.g., 12 mm, 12 mm, 15 mm. Median = 12 mm).
- SUM SF is inserted into appropriate body density equation and BD calculated.

Option B: Hydrostatic Weighing.

- Calculate a value for body density using standard underwater weighing technique with a direct measure of residual volume.
- Provide the following as an attachment to any form:
 - a. Residual Volume (RV) measurement technique;
 - b. Raw data and calculations associated with RV;
 - c. Raw data for underwater weighing; and
 - d. Calculations of body density.

Option C: BOD POD Analysis

- Provide body composition analysis printout.
- See Bod Pod protocol in preseason mailing related to the NCAA Wrestling Weight-Certification Program.

Step No. 3. Optimal Performance Calculator (OPC). The OPC will use the appropriate equation to automatically calculate the percentage of body fat (%BF), fat weight (FW), fat-free weight (FFW), and the lowest allowable weight-ONE [LAW1].

LOWEST ALLOWABLE WEIGHT-TWO [LAW2]

Step No. 4. Number of Days of Weight Loss. Number of days between initial assessment and December 16.

Step No. 5. Lowest Allowable Weight-TWO [LAW2]. The lowest allowable weight calculated by using 1.5 percent of body weight loss per week from the initial assessment to certification date. The OPC will use the appropriate equation $[BW - (.015/7) * \# \text{ of days} * BW]$ to automatically calculate the lowest allowable weight-TWO [LAW2].

Step No. 6. Minimum Wrestling Weight [MWW]. Select the higher value between the LAW1 and LAW2 to determine MWW.

Note: There will be no appeal process for minimum wrestling weight. If there is concern about results from a skin-fold measurement, analysis using the “gold standards” for specific gravity (refractometer) and body density (underwater weighing with a direct measure of residual volume) should be used. The use of Bod Pod analysis may also be used in this situation. The results of this analysis will be the final determination of the minimum wrestling weight and the appropriate wrestling weight class.

Step No. 7. Minimum Weight Class [MWC]. The assessment form will display the minimum weight class the wrestler is eligible for after the minimum wrestling weight is established. The minimum weight class will be determined if the minimum wrestling weight is less than a weight class but higher than the lower weight class.

SECTION TWO: Certification of Weight Class. The Section II certification shall be determined prior to the first competition at the certified weight class (not later than December 16, 2007) as mandated by the student-athlete’s weight-loss plan.

The NCAA Wrestling-Weight Certification Section II form shall be completed for a student-athlete whose name appears on an institution’s roster for the first time and who has not been tested through the NCAA Weight-Certification Program in previous years, (e.g., incoming freshman student-athlete, incoming two-year college transfer student-athlete or an incoming transfer student-athlete from a non-NCAA member institution).

A wrestler must have an assessor complete both the Section I and Section II weight-certification forms between initial weight assessment (Section I) and December 16 to modify his or her weight in a controlled manner that does not allow more than 1.5 percent of the original hydrated body weight to be lost per week over the weight-loss time period and does not go below the minimum wrestling weight. In order to successfully complete the second certification, the wrestler must weigh-in at the weight the wrestler wishes to certify and pass the hydration test. The second hydrated body weight determines the wrestler’s certified weight class. If the second, or subsequent, hydrated body weight falls between two weight classes on the final certification date of December 16, 2007, the higher value will be the certified weight class.

Institutions are required to submit the student-athlete’s Wrestling Weight-Certification Section II form online at www.nwcaonline.com not later

than December 16, 2007. A wrestler who is required to complete the two-certification process may not compete at their minimum weight class prior to completing the Section II certification. Should a student-athlete join the team after December 16 and he or she has not been tested through the NCAA Weight-Certification Program in previous years, the institution shall require the student-athlete to complete the procedures for two certifications. The Section I form must be completed prior to his or her first practice. In addition, Section II must be completed prior to the student-athlete's first competition at their minimum weight class. (See Rule 3.1.2) Such a student-athlete reporting after December 16 does not have the option of modifying his or her weight until reaching their desired certified weight class. (See Rule 3.1.5.) Please see Rule 3.1.4 for the regulations regarding fall sport student-athletes who come out for the wrestling team prior to December 16.

Examples

No. 1

Student-athlete A has a urine specific gravity of 1.025 on September 6. The student-athlete is instructed to return in 24 hours to be retested. Twenty-four hours later, the urine specific gravity is 1.011. The student-athlete is allowed to weigh-in and weighs 168 pounds. The skin-folds are measured and when calculated, give the student-athlete a body fat percentage of 12 percent. The fat weight of 20 pounds is calculated by multiplying 168 pounds by 12 percent. The fat-free weight of 148 pounds is calculated by subtracting 20 pounds from 168 pounds. The fat-free weight of 148 pounds and divided by 0.95 equals 156 pounds. This is the Lowest Allowable Weight-ONE (LAW1) calculated with five percent body fat.

Those student-athletes required to pass the two-certification program now have until December 16 to lose this weight if they so choose (a maximum of 15 weeks). The Lowest Allowable Weight-TWO (LAW2) is calculated over 15 weeks losing no more than 1.5 percent of the original body weight per week. Calculated out, the LAW2 is 130.2 pounds.

However, the minimum wrestling weight must take into account the LAW1 and LAW2. Therefore, the higher of LAW1 and LAW2 will be the minimum wrestling weight (MWW) for the season.

MWW=156 pounds.

1. Specific Gravity = 1.025
 - Specific Gravity = 1.011 (24 hours later.)
2. BW = 168 lb.
3. BF = 12%
4. FW = 168 lb. \times 0.12 = 20 lb.
5. FFW = 168 lb. – 20 lb. = 148 lb.
6. LAW1 = 148 lb. / 0.95 = 156 lb.
7. # of weeks = 15 weeks.
8. LAW2 = 168– (1.5% \times 15 wks \times 168) = 130.2 lb.
9. LAW1 = 156 lb. > LAW2 = 130.2 lb.

Therefore, LAW1 = MWW = 156 lb.

Two months later, the wrestler reports for the weight class determination. The urine specific gravity is 1.013 and the hydrated body weight is 156.3 pounds. Therefore, the weight class is set at 157 pounds for the entire season.

No. 2

Note: The following example only applies to those student-athletes who are required to complete both Section I and Section II of the Weight-Certification Program.

Using student-athlete A again, let's say that at the initial weight assessment, the weight was still 168 pounds, but the percentage of body fat was calculated to be six percent. That means the fat weight would be 10 pounds (168 \times 0.06) and the fat-free weight would be 158 pounds (168–10). The Lowest Allowable Weight-ONE (LAW1) would be 166 pounds (158/0.95). Therefore, student-athlete A would already be at the minimum wrestling weight and could not drop a weight class. Student-athlete A can use the Section I assessment as the Section II certification, because the wrestler is not allowed to go to a lower weight class.

1. Specific Gravity = 1.011
2. BW = 168 lb.
3. BF = 6%
4. FW = 168 lb. \times 0.06 = 10 lb.
5. FFW = 168 lb. – 10 lb. = 158 lb.

6. $LAW1 = 158 \text{ lb.} / 0.95 = 166 \text{ lb.}$
7. # of weeks = 15 weeks.
8. $LAW2 = 168 - (1.5\% \times 15 \text{ wks} \times 168) = 130.2 \text{ lb.}$
9. $LAW1 = 166 \text{ lb.} > LAW2 = 130.2 \text{ lb.}$

Therefore, $LAW1 = MWW = 166 \text{ lb.}$

No. 3

Our next example is student-athlete B. On October 25, the urine specific gravity is 1.016, hydrated body weight is 225 pounds and the percentage of body fat is 18 percent. This gives the wrestler a fat weight of 40.5 pounds (225×0.18) and a fat-free weight of 184.5 pounds ($225 - 40.5$). The $LAW1$ with five percent body fat is 194 pounds ($184.5/0.95$). The $LAW2$ is 198 pounds, calculated by losing a maximum of 1.5 percent of the original body weight per week [$225 - (0.015 \times 8)(225)$]. Since the $LAW2$ is greater than the $LAW1$, the $LAW2$ of 198 pounds becomes the MWW . Although close, the wrestler could not compete in the 197-pound weight class but must compete at heavyweight (285).

If desired, the student-athlete could retest using the gold standards of the refractometer and underwater weighing with a direct measure of residual volume. The Bod Pod is another viable option for retesting. The MWW achieved with these measurements would form the basis for the certified weight class.

1. Specific Gravity = 1.016
 2. $BW = 225 \text{ lb.}$
 3. $BF = 18\%$
 4. $FW = 225 \text{ lb.} \times 0.18 = 40.5 \text{ lb.}$
 5. $FFW = 225 \text{ lb.} - 40.5 \text{ lb.} = 184.5 \text{ lb.}$
 6. $LAW1 = 184.5 \text{ lb.} / 0.95 = 194 \text{ lb.}$
 7. # of weeks = 8 weeks.
 8. $LAW2 = 225 - (1.5\% \times 8)(225) = 198 \text{ lb.}$
 9. $LAW2 > LAW1$; therefore, $LAW2$ becomes MWW of 198 lb.
- Weight Class = 285 (HWT)

No. 4

Student-athletes C and D are an incoming freshman wrestler and a two-year college transfer student-athlete, respectively. As these two student-athletes would be appearing on the institutional rostered squad list for the first time and would not have been tested through the NCAA Weight-Certification Program in a previous year, they are required to complete Sections I, II and the Weight-Loss Plan form in the Weight-Certification Program.

Note: Two-year college transfers, even though previously tested at a two-year institution, must participate again in the two-certification program at the four-year institution.

No. 5

Student-athlete E is a four-year college transfer student-athlete who wrestled last year for an NCAA Division II institution. This wrestler is only required to complete Section I and the Weight-Loss Plan form of the Weight-Certification Program at the NCAA institution to which he or she transferred, as the student-athlete previously completed the NCAA Weight-Certification Program.

No. 6

Student-athlete F is a returning wrestler from the previous academic year. He or she must only complete Section I and the Weight-Loss Plan form of the Weight-Certification Program, showing how much body weight can be lost in a given week over the weight-loss period and still not go below the minimum wrestling weight. It should be noted that wrestlers weighing-in two weight classes above the minimum weight class are not allowed to proceed to the original minimum weight class. This includes preseason competition while a wrestler is making the descent toward their lowest allowable weight class. (See Rules 3.1.6 and 3.1.8.)

Additional examples may be found in the “Frequently Asked Questions - Weight Management” tab of the preseason mailing.

When an institutional assessor enters a student-athlete's Section I data incorrectly into the OPC, this procedure shall be followed:

- Contact the NCAA Weight-Management Program Liaison for wrestling (Ron Beaschler).
- Request a correction of the data entered.
- Submit in writing an explanation that is dated and signed by both the assessor and the athletics administrator in charge of wrestling detailing:
 - a. The incorrect entry and how it occurred.
 - b. The correction(s) the assessor wishes to make.
 - c. The date of the incorrect entry.
 - d. The name of the student-athlete.
- Submit a copy of the incorrect data sheet.
- Send to:

Appendix I

Individual Season Record Form Procedures

When completing the Individual Season Record Form, the person(s) who is responsible for its accuracy is reminded to record all required information. Failure to correctly complete the Individual Season Record Form may result in the assessment of an institutional penalty.

The following items are most often completed incorrectly or are omitted from the Individual Season Record Form:

1. Institutions are required to use the current NWCA-generated NCAA Weigh-In form (e.g., 2007-08).
2. It is required to list the first date a wrestler may compete at his or her lowest certified weight class as recorded on the Weight-Loss Plan form.
3. If applicable, it is required to list the date of the second certification.
4. It is required that the Individual Season Record form be signed by an athletics administrator and the head coach.
5. A wrestler who is unable to continue in a match due to injury loses by injury default and this must be counted as a loss on the form. The opponent is credited with a win by default. See Rule 5 for more information on scoring abbreviations.

A wrestler who is granted a medical forfeit during a tournament does not count matches lost by medical forfeit on the form. However, a wrestler winning by medical forfeit may count it as a win on his or her form. See Rule 5 for more information on scoring abbreviations.
